**ALL FORD DEALERS:**

Several inquiries have recently come to us concerning the likelihood of another reduction in the price of our cars, and as these inquiries no doubt emanate from prospective purchasers, we want to state again with greater emphasis that Ford cars are already being sold at a figure actually below cost and for an indefinite period another reduction or change in design is entirely out of the question and not at all contemplated.

We believe the public will be fair enough to fully appreciate the frankness of above when they consider the extent of our recent price cut which was in fact the equivalent of several reductions in one, in our desire to contribute toward satisfying their demand for lower living costs notwithstanding our sacrifice in marketing our cars at a loss until we are able to materially reduce present costs through lower material prices and greater manufacturing efficiency. While we have of course made some progress in bringing down operating costs, we still have a long way to go before any thought can be given to further reductions in present car prices, so we have no hesitancy in making these open statements to acquaint you with the true situation.

You can therefore give assurance to prospective purchasers of Ford cars that now is their real opportunity to buy below cost and obtain delivery. Everyone is familiar with the heavy demand for Ford cars in the Spring and this year will be no exception, as in spite of conditions, business is already rapidly accumulating, so that many who desire Ford cars will be obliged to wait perhaps until mid-summer for delivery, causing considerable inconvenience and possibly financial loss, particularly to commercial customers.

We expect you to protect the interests of prospective buyers in your community by placing these facts before them.

Yours very truly,  
FORD MOTOR COMPANY  
W. A. RYAN,  
Manager of Sales.

**Getting Rid of the Cause of Asthma**

Asthmatic attacks are often preceded by chills, depression of spirits, vertigo, bronchial irritation and nervousness. During the attack breathing is in gasps and is an agonizing struggle. Speech is impossible. The attack may last several minutes or several hours.

Ordinarily the victim finds no correction that is of any permanent value, but is forced to endure the suffering in the knowledge that the attacks may disable him at any time. The cause is a degree of displacement of joints of the backbone at the base of the neck sufficient to cause pressure on spinal nerves affecting the bronchial passages. The sufferer from asthma usually has a hump or curve in the spine at the base of the neck. Chiropractic adjustments restore the joints to alignment and remove the nerve pressure. Hundreds of asthmatic sufferers have found this way the road back to health.
