Mr. Barriball, Scout Executive of the Local Council of the Boy Scouts, tells us of a prominent business man who recently described enthusiastically the wonderful success he had recently had with a certain Boy's Club in which he was interested. He explained that his problem of interest and attendance was solved by means of boxing wrestling and a "big feed" at every monthly meeting. A scoutmaster replied "Live stock will come to a feed; scouting has no problem of interest and attendance when the officials are trained."

Health After Chronic Indigestion

When a disease persists for a great length of time it becomes what is known as chronic. Many persons have chronic indigestion without apparently being unhealthy. They have to be constantly watchful of what they eat, and some things they like must be avoided entirely. When a disease becomes chronic it is a certain indication that the cause is deep-seated, that it lies in some structural defect of the body which can only be righted by chiropractic spinal

adjustments. When the spinal joints at "stomach place" are out of alignment and are pressing upon the spinal nerve opening, there is stomach weakness, either chronic or certain to become chronic, unless the structural defect is corrected by adjustments. This is the service the chiropractor of skill renders.
