The Standard Blood Purifier

Half of patience is don't care. **ASPIRIN**

Name "Bayer" on Genuine

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicycacid.

Radium is about as familiar to the masses as relativity.

Well Fixed.

"Ferdy seems to be making better progress with the girl he is courting. Now has the field to himself."

"Yes, he gave her a dog that will bite anybody he doesn't know. And the dog doesn't know anybody in this town but Ferdy."

Danger!

A girl doesn't care that your middle initial stands for Vernon, but when she begins calling you by your first name watch out, boy! She likes your last one.-Judge.

Suitable Arrangement, Nipp-Turn about is fair play. Tuck-Yes, the lawyer and the tailor have to go to each other for their sults.-Judge.

Not Then.

Mrs. Eye-Misery loves company, you know.

Mrs. Wye-Not always, my dear. I guess you never had on very tight shoes when company called and stayed three mortal hours,

DIARRHOEA

Quickly Relieved by WAKEFIELD'S Blackberry Balsam

Wakefield's Blackberry Balsam has been the surest and quickest remedy for Diarchosa. Dysentery, Choiera Infantum and Choiera Morbus for 76 years. While it is quick and positive in its action, it is harm-tess and does not constipate. It checks the trouble and puts the stomach and bowels in their natural, regular condition. Of the millions of bottles sold, no case has been reported where a cure was not effected when alrections were followed.

Every home should have a bottle or moro in hand ready for sudden attacks.

PEACE PLANS IN HANDS OF LEADER

To Associates in Dublin On His Return

Lord Curzon, Secretary for Foreign Af fairs States Government is Not Without Hope Regarding Final Outcome,

London.-The proposals of the British government, which it is hoped may form a basis of an Irish settlement, are in the hands of Eamonn De Valera, the Irish republican leader. Mr. De Valera will return to Dublin and submit them to the other leaders of opinion in southern Ireland, including members of the Irish republican parli-

The feeling in political quarters remains quite optimistic and Lord Curzon, secretary of foreign affairs, in a statement in the house of lords, inwithout hope regarding the final out-

It is authoritatively annougced that the truce in Ireland will continue indefinitely, which clearly indicates that there is no idea of a rupture of the negotiations on either side. ,

On the eve of returning to Ireland, Mr. De Valera requested the press to the courtesy and kindness with which | them. he and his colleagues had been received and treated during their stay in Lowdon, not only by the members of the government but by the general public.

Governor Small Indicted.

Springfield, Ill.-Whether or not Governor Len Small, indicted by a Sangamon county grand jury for the embezzlement of interest on state funds while state treasurer, is immune from arrest, is to be decided by Judge E. S. Smith of the circuit court.

Governor Small's attorneys advised him to resist arrest on the grounds that he would violate the constitution and betray the people by submitting.

If the court decides the governor is immune the warrant for his arrest would probably be withheld until expiration of his term, three and a balf

Germany Makes Payment.

Paris.—The reparations commission today announced that the German government has just paid to it 31,000,-000 gold marks in European currency on account of the three months' notes given in the latter part of May, In settlement of the 1,000,000,000 gold marks due before June 1.

Germany now has redeemed 114,-949,000 marks, making a total of 275,-376,000 marks paid on account of the 1.000,000,000 marks. The German government has informed the reparations commission that it is ready to remit immediately 41,000,000 marks more in European currency.

Chief Justice Taft Appoints Secretary. Washington, D. C .- Chief Justice Taft announced the appointment of Wendell W. Mischler, Cincinnati, as his secretary, continuing an association begun seventeen years ago, when Mr. Taft was secretary of war. John J. Byrne was appointed law clerk to the chief justice, a post he held under the late Chief Justice White,

Asks Right to Quit Switzerland.

Paris.-Former Emperor Charles of Austria-Hungary has demanded that he be allowed to leave Switzerland for Denmark, according to news received in official circles here which expressed belief that this move concealed a plan for another attempt eventually to restore Charles to the throne of Hungary.

Purchase Home for Ambassador. Washington, D. C .- The home of Fraklin MacVeagh of Chicago has been purchased by the Mexican government to be used as the home of the ambaseador of that country at Washington.

Graft Charged by Governor. Austin, Tex.-Governor Pat M. Neff, in a special message to the lower house of the legislature, reiterated his charge that "graft and extravagance" exists in the state capital.

Table Mountain Tipping.

Golden, Colo .- A section of Table Mountain, 600 feet long, is reported to be moving again. Tons of rock and dirt on the Middle Golden read are loosening and irrigation facilities on the mountain are reported damaged.

North Dakota Needs Harvest Hands. Fargo, N. D.-About 25,000 men are needed in North Dakota to harvest the wheat and other crops, Mrs. M. B. Bowe, head of the federal employment service announced.

Approves Purchase of Sanatorium. Secretary Mellon has approved purchase of the Central New England Sanatorium association property at Rutland, Mass., to accommodate 300 former soldiers, tuberculosis patients.

Cholera Becomes Epidemic in Russia. Rign.-The Moscow Izvestia, a copy of which has been received up here. reports the registration up to July 13 of 27,779 cholera cases, as compared with 13,476, which had been registered up to July 6.

TIME TO TALK DISARMAMENT

Washington Believes Public Sentiment Over World Lining UP Favorably. Scope Seems

Broader.

Washington, D. C .- While the state department is advancing its negotiations for the disarmament conference as rapidly as it considers practicable, there is a well defined feeling here that time and preliminary discussion are working on the side of the United THE TRUCE WILL CONTINUE | States in its effort to include troublesome diplomatic problems within the scope of the conference.

It has been apparent that President Harding and his advisers were counting on the aroused public opinion of the world as their greatest aid in moving for armament legislation, and they have read press reports and the comments of foreign diplomatists with keen interest to discover how impelling is the sentiment in favor of a frank exchange of ideas on all subjects threatening interactional discord. This survey, so far as officials have been willing to comment, has aroused in them general satisfaction.

Press reports from Japan, indicating that the question of full participation is one of the liveliest debates there, are taken as a welcome sign. The same may be assumed also with regard to Lendon dispatches, indicating that dicated that the government is not British opinion hopes for a complete acceptance by Japan.

There also has been some thought of Russia's possible relation to the skein of diplomatic reconstruction to be won by the powers. There is a profound realization that the resources and capabilities of the Russian nation cannot be left out of consideration, even though the Russlan people have acknowledge his great appreciation of one representative present to speak for

possibility that the labor The element may be recognized as an influential factor in the conference was suggested by a meeting between President Harding and Samuel Gomper, head of the American Federation of

Krupps Making Machinery. Berlin.-The Krupp works, which in the past were synonymous with war, are literally beating swords into plow-

The metal derived from scrapping cannons, tanks and other engines of destruction is being employed by the reorganized Krupps concern in manufacturing agriculture machinery, locomotives and other peace commodities

House to Have 460 Members. Washington, D. C.-Reapportionment legislation providing for a house of representatives of 460 members as compared with the present membership of 435, was agreed upon by the house census committee.

Under the reapportionment legislation, two states, Maine and Missouri, would each lose a member, and sixteen states would gain members.

Train Passed Over Lad.

Sloux City, Ia .- The fifteen-months old child of Mr. and Mrs. J. J. Jakich played on the railroad tracks near the home and a freight came along and before the engineer could stop, the tocomotive and eight cars had passed over the child, who was uninjured except for a few bruises where he had been hit by a hanging rod,

Taft To Be Toastmaster. Cincinnati, O .- William H. Taft, former president and now chief justice of the supreme court of the United States, will be toastmaster at the annual dinner of the American bar as-

sociation meeting here in his home town August 30 to September 2. Cotton Credit to Germans. Berlin.-The first million dollar American cotton credit bas just been negotiated between the American Products Export and Import corporation of Charleston, S. C., and the Darm-

anteeing repayment. Canada Will Reduce Army to 3,600 Ottawa, On.-Canada will reduce its permanent military force by 10 per cent after July 31, in the interest of economy, it was announced by the militia department.

stadter bank of Berlin, the latter guar-

This means that the force will have a maximum of 3,600 officers and men instead of 4,000.

No More Peek-a-boo Walsts.

Zion City, Ill.-Orders to sell no more peek-a-hoo waists, mosquito net stockings, or shadow skirts were given to the stores here by Wilbur Glenn Voliva, overseer of Zion.

Tried to Smoke Out a Snake,

Augusta, Ky .- A six-foot blacksnake refused to budge from his den under an old stump. W. H. Winter, farmer near Augusta, decided to smoke out the reptile. Fire spread from the stump to a twenty-acre field of hay. The field was dry. Appeals were sent to the fire department when the flames shot out in every direction.

Farmers for miles around hurried to the scene and with the aid of a timely shower of rain, managed to save the city. The snake escaped.

Bloomfield Still Without Phone Service. Bloomfield, Neb .- "Striking" patrons of the Union Telephone Co. are still sitting tight but business is moving along in the same old way.

It is rumored that the company is circulating a petition among the farmers asking for a restoration of service, but that little success is attending the move. It is said that a few have

signed the petition. The community has been without local phone service since the first of April.

Grandeur P Mount Rainier

Avalanche Lily Slope, Rainler National Park.

Prepared by the National Geographic Society, Washington, D. C.) As the famous Japanese mountain, Fuji, dominates its section of Japan, so the great white cone of Mount Rainler dominates the Pacific Northwest, a landmark and beauty-spot from the populous cities of Puget sound. from the prairies of eastern Washington, and even on clear days from far at sea. It is the glacier mountain without a peer in the United States, and is estimated by one authority to radiate a greater volume and area of ice than any other one mountain in

is estimated at 52,000 acres. To the stranger in Puget sound it appears to be less than ten miles away, but on further inquiry the tourist learns that it is more than forty miles distant in a direct line from sea-level at Puget sound, from where mountain survey measurements are made and all Rainier park travel starts,

the world. Its area of glacial surface

Studying it more in detail, he begins to comprehend its size and rugged anatomy. But the scene is beginning to change; the sun is low in the west; the lower end of the glaclers, white a few minutes ago, become a graded tint of rose pink; the blue has changed to a purple, but the summit is still white, for it is 7,000 feet higher than the snow-line and projects up into the white rays of the setting sun. The red rays are slowly moving up the mountain; the summit has changed to rose hue, the last coloring of day, which it holds for some minutes after the sun has left the landscape, and then changes back again, finally, from warm to the cold purple afterglow that generally pre-

night on Puget sound. Its Cap a Weather Sign. Viewing Mount Rainler after the weather has been fair for some days, it is common to see the summit covered with a cloud. This cap is very interesting and is always looked at for a forecast of a change of weather, especially when it forms immediately in contact with the summit, hugging down closely like an inverted saucer. When the cap forms suddenly, like the sudden drop of a barometer, the change of weather is not long coming. The cap does not always touch the mountain top, but is occasionally some distance above and holds its shape

during a whole day or more. From a far distance this cap appears to be a still cloud with no motion, but in studying it from close range one will observe that at the west edge the cap develops rapidly, dissolving to invisible condition at the east edge. Evidently it is a stationed point of condensation, but not a stationed accumulation of moisture.

The crater of Rainler, concerning which many questions are asked, is not dangerous, but rather a life-preserver, and has been so used during storm. There are no openings within the crater large enough to be dangerous. The whole circle of 1,600 feet diameter is filled with fallen black lava and covered with a thick pack of snow the year round, except at the edges near the crater's rim. The main crater was the mountain's principal vent of of the flowers are of light tint, but eruption, but there is one other place there are a liberal quantity of blue, called the little crater; it and a few other spots near the top are also warm.

The first parties to the summit always made the crater their inn, where they stayed at night, warmed by the steam that issues from the small fissures just within the crater's rim: but of late the plan has been to reach the summit from Camp of the Clouds (elevation, 5,500), starting about 1 a. m., reaching the summit just after noon, and, after some hours' rest, returning to camp the same evening.

Hot Steam of the Crater. In making a trip to the mountain's summit, August, 1911, the writer took | mit of the highest peak. along a thermometer to ascertain the steam temperature, and found the other places where the heat is above botting point.

vapor through the same general open- a few hours' drive. ings. It seems to contain no gas or fumes, and is of feeble force and little volume, soon disappearing in the high, the summit previous to storm.

Publications stating that smoke and fire come from this volcano during seismic disturbance have no foundation of fact, for it is evident that no civilized man ever witnessed such a sight, and that volcanic action in this section is a phenomenon of the long past. People have been misled in seeing a cloud that appears like smoke. Since 1870, when the first ascent was

made, hundreds of people have stood on the summit of our great white "Templed Hill." A climb to the summit and return the same day is a long, wearisome undertaking, slightly dangerous, especially at one place rounding the upper part of Gibraltar rock, from which there is an occasional shower of small pleces of rock that thaw loose from the snow patches above. So far as is known, there has been but one life lost in climbing the mountain, due to natural cause; the few others were lost owing to recklessness and lack of judgment. The crevasses are very bad if one gets into them, but they have generally been cleverly avoided.

Studying the crevasses and the actinic blue coloring they reflect will repay any one who has a day to devote to the climb. The higher up, the more curious are the carvings of the snow surfaces, which would indicate that the winds are the chief factor in making the peculiar whittlings.

This great pile of lava, heaped to an elevation of nearly 15,000 feet, is characterized by several features deserving of special individual study. The geologist, geographer, botanist, poet, painter, landscape gardener and specialist all find a wealth of interest throughout this 324 square miles of reserve, besides much adjacent territory comparatively unexplored.

Special Features of Interest. To a woods-dweller the timber is a matter of course, but to those who have not been amid large forests it is one of the very special features of the reserve and an educator in forestry of the best kind. From the dense forests of the valleys and on the lower slopes, where trees grow to a height of over 300 feet, some with a diameter of 12 feet, the forester can trace the diminution of growth as the ascent is made to the scrubby brush-like trees at timber-line, struggling, as it were, for their existence.

The unvisited portions of the Rainler park without doubt contain, yet unseen, such features as hot and cold springs, falls, small lakes, and botanical rarities. High on the ridges and slopes of the neglected corners of the park the wild goats make their home, Sometimes they have been seen in numbers of 30 or more together. The deer, which are more abundant than any other of the large game, are occasionally seen from along the government road. The black and brown bear are also seen, and at rare intervals the stealthy cougar or puma.

At between 5.000 and 8,000 feet elevation the botanist finds Rainier park his paradise, wherein there have already been found over 250 varieties of plant life, a dozen or more kinds belonging to this region alone. The majority red, and yellow, so deep and pure of color that artificial pigments fail to imitate them. The distribution of several species of heather is a technical touch of finish in the evergreen. tipped in summer with clusters of small bells in colors purple, pink, yellow, and white.

The first white man to visit the mountain was Dr. William F. Tolme, of the Hudson's Bay Company, from Fort Nisqually, who in 1833 closely approached some of its glaciers. Gen. A. V. Kautz, in 1857 made an attack en the mountain, but it has never been affirmed that he reached the true sum-

The Rainler park was not much visited until 1909. In the years since steam of the main crater in places to then thousands of tourists have be about 150 degrees F. There are registered at the park entrance each season. Since the days of early travel by pony and stage have given place The steam is evidently snow water to railway and auto, the tourist can that seeps down and comes in con- make the journey from Seattle or tact with the internal heat, returning in Tacoma to the mountain snow-line in

No Rust.

If you go away for several months dry atmosphere. It is not seen from during the summer, apply kerosene oil a far distance and is not a factor in to your stove with a soft cloth before producing the cloud cap that forms on leaving. When you return the stove will be in excellent condition.

Get Back Your Health

Are you dragging around day after day with a dull backache? Are you tired and lame mornings—subject to headaches, dizzy spells and sharp, stabbing pains. Then there's surely something wrong. Probably it's kidney weakness! Don't wait for more serious kidney trouble. Get back your health and keep it. For quick relief get plenty of sleep and exercise and use Dodn's Kidney Pills. They have helped thousands. Ask your neighbor!
