### CHATS WITH YOUR GAS MAN

It is difficult for a cook who is used to a coal range to realize the great intensity of gas range heat. When cooking on a gas range is once started it is almost impossible to use too little heat, but it is easy to use too much.

Almost all kinds of stewing or boiling should be done with the burner turned low; the results will be very much better.

Hard cooking will often spoil the food. The proper method is to start the boiling over a single burner with full flame, and when the boiling point is reached, turn the flame very low, or transfer the saucepan to the simmering burner.

Some cooks light the giant burner for everything. This is wasteful and unnecessary. The simmering burner is an important aid to economy. It burns the smallest possible amount of gas and can be used for a great deal of cooking and for keeping things warm.

**FORD NEARS OUTPUT**  
OF 5,000 A DAY  
Dealers Call For 194,750 Cars, Trucks And Tractors For June

Ford Dealers in the United States have asked for a total of 194,750 Ford Cars, Trucks and Tractors to meet their June requirements, says a statement issued by the Ford Motor Company, Detroit, Michigan.

As a result the estimated output for June has been boosted to 140,000 which is an increase of 10,000 over the present month, and, of course, will set a new high record, in spite of the fact that the May output will show a substantial increase over the previous highest month.

Ford sales have been constantly increasing since the first of the year, the demand growing during the past two months faster than it has been

possible to increase production. Monday, May 16 brought forth a new record of cars built for one day, the figures reaching 4878 at the close of the day's work. This was an increase of 16 over May 15th when the previous high mark was established.

On May 18th, the six millionth Ford motor was assembled. No. five million came off the line May 28th, 1921.

Ford officials state that every attempt is being made to build a sufficient number of cars and trucks to fill the retail requirements of their 8,000 dealers.—Advertisement
