OLD TIMERS CLUB

The Old Timers continue to be interested in the announcements of the club and names are being added daily. Send us your name for the club.

A copy of the Semi-Weekly Democrat, published at North Platte and dated Wednesday, September 11, 1872 was shown us the other day. T. C. Patterson was post master. One announcement says that parties sending to Grand Island for groceries can do better in town by purchasing of Foley and Co. James Belton was county clerk. J. H. Peake was the editor and he was supporting Horace Greeley for President and B. Gratz Brown for vice-president of the United States. The Chicago market reports were cattle choice to extra prime \$6 to \$7; hogs, live \$4.75 to \$5; butter choice 18c to 20c; eggs, fresh, 12c to 13c; spring wheat \$1.22 to \$1.23; corn No. 2 at 39 1/2c; No. 2 at 26 1/2c.

From the same paper we clip as follows: The U. P. railroad authorities have built and sent to this place a hose-cart on which to place the hose previously sent up. There is now at the round-house 1,150 feet of hose and it will reach from the plug at the shop to almost any portion of the town. We hope that some action will be taken to form a company to take charge of and "run the machine" in case of fire.

CHATS WITH YOUR GAS MAN

Do you always have your gas range oven well heated before using. You should do so for both the baking and broiling ovens. Ten minutes is a average allowance for the baking oven and five minutes for the broiling oven.

This method involves no waste of gas because if food is placed in a cold oven, the cooking will take just so much longer, besides the results will not be so good. If the recipe calls for a moderate oven, reduce the flame one-half at the end of ten minutes. For a quick oven, keep burners lighted during all or nearly all of the baking.

Also bear in mind that is better to bake in tin pans instead of sheet iron or agate pans. The iron absorbs the heat and is more liable to burn the contents at the bottom and sides before the baking is done. You may not have noticed this in using the coal range, but the heat of the gas range is much more intense and direct.

I am the Meter Reader

I am the contact man between you and your electric company. I meet a thousand types of people and my paths of travel are many. I meet courtesy contempt, indignation, insult and respect—all in my day's work. I follow one ironclad rule in my work—that rule is ACCURACY. I believe that in so doing I have your solid support. I call at homes even though the weather elements slow up all other community workers. I try to create a closer understanding between you and my company. I try to protect you against faulty meters. I help to make your electric service uninterrupted and the little courtesies I receive at your hands speed up my part of this necessary work. I am the meter reader!
