

## CHATS WITH YOUR GAS MAN

Why not test your appliances yourself to see if they are working correctly or if they are the correct appliances? It's a very simple thing to do. Just use these tests:

Do burners light easily?

Do they turn off quietly?

Are flame tips on range and water heater burners about  $\frac{1}{2}$  to  $\frac{3}{4}$  of an inch long?

Are they sharp and distinct with blue cone and purple edge?

Can they be turned down and still burn evenly?

Do cooking utensils keep clean where heat from burner tips strikes them?

If "yes" is not the answer to all of these questions, let us know.

### GOVERNMENT HUNTER KILLS BIGGEST ARIZONA GRIZZLY BEAR

The biggest and most notorious grizzly in Arizona was killed during the first week in June by a Government hunter employed by the Biological Survey of the United States Department of Agriculture, after considerable time and effort had been spent in trying to capture him.

The skin and skull of the bear were turned over to the predatory animal inspector for the district who placed them on exhibit for a few days in a prominent store in Phoenix, Ariz., and then sent them on to Washington. This bear is positively identified as a grizzly, although its body was nearly black and its nose and flanks were a cinnamon color. It weighed from 1,200 to 1,500 pounds and its skin measured 7 feet 3 inches from tip to tip. When standing on its hind legs the bear could have stretched up a distance of 8 feet. The skull is 16 $\frac{1}{4}$  inches long.

The grizzly's persistent preying on live stock cost cattle owners at least \$25,000, according to conservative estimates. One man, however, upon whose range the bear lived most of the time expressed the belief that the bear had eaten fully \$75,000 worth of his cattle. The Biological Survey inspector reported that the bear killed 12 head of cattle within one week, among them a pure-bred Hereford bull weighing 1,800 pounds. Cows and young calves were the bear's favorite food. He would eat the udder of a cow or the stomach of a calf and then kill another animal. He never went back to the carcass a second time.

### Plan of the Progressive type.

### HIS CREED

If elected to Congress he pledges that he will work strenuously

To make our Government more truly of, for and by the people.

To reduce taxes.

To secure proper reduction in freight and passenger rates, by forcing the railroads to accept fair and reasonable profits upon true values only.

To prevent public service corporations from taking from the people exorbitant profits and large earnings on millions of watered stock.

To obtain for the farmer, stock raiser and laborer, fair prices for their products and to prevent the loss of such large amounts between the producer and the consumer.

To develop arid and semi-arid lands of Western Nebraska by government irrigation projects.

To secure a soldier bonus, not by a tax upon the already overtaxed people, but out of the foreign debt, the interest on which will largely pay the same, and also by levying upon the millions collected by war profit-

ers, if any way can be found to get hold of the same. To raise the bonus by taxation would require the soldier to pay taxes to pay his own bonus.

To stop the increase of power at Washington and restore to the States much of the power that has been taken from them in recent years.

To secure an amendment to the Constitution of the United States, preventing its Supreme Court from declaring a law unconstitutional, except upon a vote of two thirds of its members. At the present time by a 5 to

4 vote this court overturned a law passed by almost 400 congressmen, 90 senators and the President of the United States. By such a method this Court has killed the Child Labor Law and the law preventing gambling on stock exchanges.
