

The SANDMAN STORY

PAPER DOLL'S DRESS

BETTY went to the country one summer to visit her grandmother and grandfather. She took with her all the toys she could carry easily in a trunk with her clothes and, among other things, she took Paper Doll.

For the trip Paper Doll had many new clothes which Betty made for her, and one was a very beautiful gold paper dress trimmed with gold paper lace.

No one would have guessed that the gold dress would have caused Paper

Doll anything but happiness, but it did, and was nearly the end of her, as you will soon learn.

The hired man on the farm had a pet crow that he had captured when it was young, in the cornfield. He kept it in the barn, but every day it would fly about the yard as high as the barn window.

Its wings were clipped so it could

not go far and many tricks had the farm man taught Jim Crow.

One day Betty was playing under the tree near the barn with her toys, and Paper Doll was there also, dressed in her very best dress, the gold one. She stood on top of a little table when Betty went in to her dinner, and when she came out Paper Doll had disappeared.

"She must have blown away," said Grandma, who came out to help look for Paper Doll; but, though they looked all around the yard, and even in the tree, nowhere could she be found.

By and by the farm man came along and Betty told him she had lost her doll dressed in her best gold dress, and nowhere could she find her.

Just then Jim Crow came fluttering to the shoulder of the farm man and sat there, turning his head from side to side, his bright eyes looking all around.

"Your doll wore a gold dress?" asked the man with a smile.

Betty told him it was a paper dress, all gold color, and then the man laughed out loud. "I should not wonder if I could find it for you," he said, going toward the barn.

In a few minutes he came out with Paper Doll in his hand. Her dress was all crumpled and her arms bent, but Grandma soon ironed her into shape and she was as neat and pretty as ever.

And where do you think Paper Doll had been?

In the barn, where Jim Crow hid all his treasures. He loves bright things, and when he saw Paper Doll and her gold dress he picked her up and carried her off.

Betty thought it was quite an adventure for Paper Doll, but she watched her things after that when

Gladys Walton

Handsome Gladys Walton became famous through her acting in a popular picture which recently absorbed the interest of the motion theater patrons. As a "movie" star Miss Walton is well at the top of the list.

Jim Crow was around, and when Paper Doll wore her best dresses again she sat in the window inside the house, where Jim Crow could not reach her.

WAS A BROKEN-DOWN WOMAN

Then I Began Taking Lydia E. Pinkham's Medicines

Donaldsonville, La.—"I write with pleasure to praise your medicine—Lydia E. Pinkham's Vegetable Compound—which has done so much to restore my health. I was a broken-down woman until my husband brought me a bottle of your Vegetable Compound and one of Lydia E. Pinkham's Blood Medicines. I had been having pains every month and at intervals between, was weak and seemed to be smothering at times, but in a week I felt like another woman. I also used Lydia E. Pinkham's Sanative Wash. It did me a lot of good too. I cannot praise your medicines too much and will be more than glad to recommend them to any woman who is suffering from female troubles. You may print my testimonial, as it is true."

Mrs. T. A. LANDRY, 612 Miss. St., Donaldsonville, La.

Note Mrs. Landry's words—"as it is true." Every letter recommending Lydia E. Pinkham's Vegetable Compound is genuine. It is a statement telling the merits of these medicines just as the women in your own neighborhood tell each other about them. For fifty years Lydia E. Pinkham's Vegetable Compound has sold on merit.

"What's in a Name?"

By MILDRED MARSHALL

FACTS about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel

AMELIA

AMELIA is derived from that remarkable word amal, which has formed the root of so many proper names. It appears in practically every language and means "work." As early as the days of the Vikings, it was incorporated into masculine and feminine names.

The first Amelias was an armorer in the court of King Nielung. Aumlung, another of the early versions, appears in the "Book of Heroes" as

naming Aumlung the Strong and there was a Duke Amelung recorded in Danish ballad lore.

Amala was the earliest feminine name formed from Amal. It was a favorite in Lombardy, but soon penetrated Germany, where it found vogue as Amalie. Meantime, France and Italy had adopted the Latin Amellia and through the similarity in sound, the two names were thought to be identical. France compromised the difference between Amellia and Amalie and produced Amelle, the name which has such vogue today.

Amelia is the English version. It has replaced all other forms—even in Germany—the French Amelle alone surviving.

The amethyst is Amelia's talismanic stone. It will guard its wearer from danger and protect her from contagion. According to ancient belief, the amethyst has a sobering effect upon rash or impetuous natures. To dream of it signifies freedom from harm. Saturday is Amelia's lucky day and four her lucky number. The prime rose, signifying simplicity, is her flower.

GETTING POSTED

Lord De Broke: I say, old dear, what is the usual procedure in catching an American heiress?

Very simple, old chap. Tell the girl how much you love her, and her father how much you owe.

A LINE O' CHEER

By John Kendrick Bangs.

A PARADOX

IN CASTING up accounts last night,

After a day of sheer delight in which I'd spent a fund of cheer Upon the highways dark and drear, And squandered stores of love on ways

Clouded with Evil's murky haze, I found not a diminished score, But really an increasing store.

A glad surprise? Well, I don't know.

For, as along my way I go, Squandering love and sympathy On all who look for it from me, I find the more I chance to spend The greater is my dividend, And giving cheer, and giving peace Is surely of Love's increase.

How Copper is Hardened.

There are several known methods of hardening copper, the most common being to combine with it a small quantity of cuprous oxide. The metal is also hardened by mechanical working.—Popular Science Monthly.

ROMANCE OF WORDS

"SABOTAGE"

THE spread of strikes and the resultant efforts of certain dissatisfied elements to cripple industry in every way possible brought into use the French word "sabotage" in such a way that it may be said to have been Anglicized, much as "valet," "barrage," "ballot" and "camouflage" have been Anglicized.

By "sabotage," as currently used, is understood the act of producing poor work or other damage either to machinery or to the good will of some commercial organization. The workman who is deliberately careless in the manufacture of some article, is as guilty of sabotage as is the workman who wrecks the machine itself—for both of them tend to injure the company for which they are working, either in its reputation or in its operation.

In its original French sense the word was a harmless one, entirely unconnected with crime of any kind, and meaning the cutting of shoes or sockets for rails in railroad ties, "sabot" being French for "wooden shoes." During the strikes which paralyzed internal commerce in France toward the end of the last century, many of the strikers tore up the railroad tracks or loosened the shoe so that the rails spread, thus giving the word its new application and the significance under which it has slipped into the language on this side of the Atlantic.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

DON'T BLAME THE WAR

DON'T you get tired of hearing people say, day after day, "Well, it was different before the war?"

A middle-aged woman said the other day that when she was a child she used to hear her mother and grandmother talk about the good old days before the war. She used to say to herself, with childish satisfaction, "Well, anyway, I'll never have to do that." But today she is doing just that same thing—talking about the good old days before the war.

Perhaps that is the way of the world. Perhaps our Colonial ancestors used to remember the pleasant conditions before the Revolutionary war. Perhaps France looked longingly back a hundred years ago to the days before the Napoleonic war. Perhaps mankind will always talk of pre-war days with longing.

But just remember that the really well-bred thing just at present is not to refer too often to the war, not to blame everything unpleasant in life to the war. You can find out just by trying that if you refrain from blaming the war for the unpleasant things of just one day, you will have made the war seem just that much farther away. One way for us to help the statesmen and politicians solve the peace problem is to forget the war.

White Flowers and Moths.

The reason why certain pale flowers smell sweetly when dusk falls is because they are pollinated by moths, which are dusk-flying creatures. The scent is a guide to the winged visitors, and the pale color also helps. Notice honeysuckle, night-scented stock, and the tobacco plant.
