EDITORIAL

Peter said—"The Lord is long-suffering and not willing that any should perish but that all should come to repentance."

Nathan Hale said—"I regret that I have but one life to give to my country."

One man rustles cattle and another shoots partly grown prairie chickens out of season. Neither has any sense of shame left. Each thinks he is mighty clever if he can do the act and not get caught.

There is one idea about the recent primaries which is being repeated time and time again and that is that it costs too much to make a campaign for congress or for a state office.

One of the finest things we have read for some time was written by William T. Ellis and clipped from one of the state papers but we do not remember which one.

The man who does not investigate the offerings of his home town merchants before buying elsewhere is guilty of a form of treachery to his fellow citizens.

Selling season tickets for the Chautauqua is no fun. It is a form of community service which some people will contribute and do it gladly.

TEST PAVING

The public meeting held Monday evening by the city commissioners for the express purpose of hearing any complaints Kearneyites might voice against paving in any of the districts where work is now under way, seems to have been a good thing for all concerned.

It left the property owners convinced they were getting what they paid for. Checked the propagandists of those who might deliberately circulate ideas reflecting upon paving in general, and letting contracts in particular and incidentally gave the commission a chance to take the tax payers into their confidence.

A number of protests were heard, but the most conspicuous fault finding was levied against alleged failure of the contracting firms laying paving here of doing their work according to specifications, particularly as regards thickness of the asphalt surfacing.

Following the meeting, a group of these men, accompanied by members of the commission, adjourned to Eighth avenue. There were pointed out a number of places, for making of tests, but the paving at these points appeared to be all O. K. as to depth.

All paving laid in Kearney is done under careful supervision. The mixture made in laying the base and the thickness to which it is poured, the binder and the asphalt surfacing alike must meet their tests.

The commissioners, in calling a public meeting following the hearing of complaints, have set a new precedent which promises to be very popular.

NEBRASKA HOGS GROW BIG WHEN THE PURE BRED STOCK IS USED

Sam-McKelvie, of Fairfield, Gov. McKelvie's father says Ohio and Pennsylvania are noted for floods, Illinois and Iowa for mud, California for earthquakes, Kansas and Oklahoma for cyclones, hell is raised in Texas, and hogs and corn in Nebraska.

The late Henry Wallace once said "To much corn is good for hogs." Nebraska's corn has enabled her to produce consistently through the years, America's largest hogs, according to Tom Cavett, the Nebraska veteran Poland-China breeder.

"For one-third of a century, Nebraska has stood at the front in good, big hogs. When the so-called hog states were running down hill after the little white points called hot-bloods, Nebraska was raising hogs—the big smooth kind that everybody wants."

"Twenty years ago, H. C. Dawson showed 'Expansion', weighing over 1,000 pounds, taking first at our state fair. Only last year the grand champion boar of Iowa, Iowa Timm was a Nebraska bred boar, and we have only to look back a few years to see this great boar's sire, Big Timm, owned by William Ferguson, being made grand champion of Nebraska, weighing at the time 1,050 pounds.

"The commission, in calling a public meeting following the hearing of complaints, have set a new precedent which promises to be very popular. In the future, they will follow the same course, call a special meeting, make it public, invite everyone interested to 'take a hand' in the game and then govern themselves accordingly in their future policy."

"Little Corporal" was the title familiarly bestowed upon Napoleon Bonaparte by his admiring soldiers after the Battle of Lodi (1796), in allusion to his small stature, youthful appearance and surpassing bravery.

McQUAY-NORRIS PISTON RINGS, PISTONS & PINS

The three most vital units in motor performance are the piston rings, the pistons and the piston pins. Wear, improper design or inaccurate fit in these units results in loss of power—gasoline waste—oil and carbon troubles—noise and unsatisfactory operation.

When new piston rings alone are needed, we have a McQuay-Norris ring for every price and purpose—all

made from Electric Iron. When new pistons and pins are also required, we have the McQuay-Norris Wainwright line especially designed and made for replacement.

Regardless of where you plan to have your car overhauled, we can supply all sizes or over-sizes promptly.
