## How To Reduce Your Gas Bills!

This is the second advertisement in a series intended to help you keep your gas bills down.

If you only save a penny's worth of gas a day, it reduces you monthly bill

Don't heat a whole kettle full of water when you only need a pint or two.

Don't keep a high flame under anything that's boiling; turn down the flame or use the simmer burner.

Don't try to turn off the cock part way at meter; this only interferes with proper flow of gas and does not save it.

Don't expect to use gas economically on an old, wornout gas range or any range out of adjustment.

Don't heat your oven to bake a single pie; bake up what you need for several days ahead, cake, cookies, etc.

Don't heat the whole oven to brown a meringue; plan to have a complete baked dinner that day.

Don't make toast in the oven. Use a toaster that sets over a top burner.
