COUNTY ORGANIZATION OF ILLINOIS
PEOPLE TO HOLD
MEETING

The Lincoln county Illinois society will hold its annual picnic at the City Park Thursday August 31. Dinner will be at noon and the events of the day will follow. I. L. Stebbins, president of the society says in his announcement—"An old-time Illinois Family Basket Dinner where every family comes prepared with, everything from fried chicken (yum yum) to Melons. Melons will be ripe then. Fill off the ball and chain for one day. Only an oyster remains forever at the old homestead. You will meet people from Illinois that you didn't know lived in Lincoln County. Make August 31 a vacation to your family for one day, eventually you may not be able to name the spot where your next picnic will be held.

WEATHER CONDITIONS

Wednesday and Thursday were both clear days with an average temperature of 95. It will be fair tonight, probably becoming somewhat unsettled Saturday. Not much change in temperature. The lowest temperature last night was 53 and a year ago 64.

TO THE MEMORY OF DR. McCABE

By the members of North Platte Lodge No. 985 Benevolent Protective Order of Elks.

The blue of springtime in your eyes,
Was never quenched by pain;
Winter brought your head a crown
Pure without a stain—
A pure mind and true heart,
You kept until the end,
And never faltered in your work,
And never failed a friend.
We placed upon your folded hands
The wreath of Asphodel,
And spake above your peaceful face
The tender work farewell;
For well you fare, in God's care
Somewhere within the blue—
And know today your dearest dreams
Are true—yes ever true.

O. O. H. Weidner,
Maxwell, Nebr.

Miss Irene Schott left this morning for Denver, Colo. and Raton, New Mexico where she will spend several weeks visiting relatives.

Come in and see our new line of fancy hair pins and barrettes.

COPPER-CLAD RANGE

"Oh—you beauty." That's what comes to your mind every time you go in the kitchen and see the Copper-Clad Range. It is an inspiration because the finest known example of the artificers art in range making. It is a picture because so pleasing.

This SET OF ELEGANT ALUMINUM WARE Free

"Free" means that this ware does not cost Copper-Clad buyers a single penny. It is a reward for buying while the "Copper-Clad Crank" is here and is offered by him to justify you in attending this sale.

This ware is very substantial and just the kind that you would select if buying for your own use. The 7-in-1 convertible cooker takes the place of seven different vessels as shown by figures 1, 2, 3, 4, 5, 6 and 7. You can use this utensil in some form every day.

Free to every Copper-Clad buyer during this sale.
Come—See the Asbestos Sweat

SEE WHY COPPER-CLAD RANGES DO NOT RUST OUT

A section of a range body is heated and there on the iron body is the sweat from the asbestos. Right before your eyes you see just exactly what happens every time you build a fire in your range. You see why the sheet of copper is used and what it does and how it does it. You take nobody's word—you see—you know—absolutely, positively.

SAVE A THOUSAND SHOVELS OF COAL EVERY YEAR

You know how the many walls and air spaces of a thermos bottle hold the heat. You know that a house with a single wall is not as warm as the house with two walls and an air space. You know that storm windows, two windows with a space between, are much warmer than a single window even if it is as thick as the two windows.

The Copper-Clad Range has four walls and an air space. See what it means in fuel saving. See the water sizzle and boil away on the 3-ply sam-

ple while it stands on the Copper-Clad sample. See how the heat is wasted by radiation on the three-wall construction and how it is saved by the fourwall thermos construction.

Suppose that you save but one shovel of coal at each meal; in a year's time you would have over a thousand shovels of coal. Pay? Of course, it will pay; and you owe it to yourself to see these two great demonstrations and know for your own self what range lasts longest—is most economical—cooks best—and looks best.

Copper-Clad means that Pure Sheet Copper is placed BETWEEN the sweaty asbestos and range body. To place it elsewhere would be like climbing on top of a roof to get out of the wet.

SPECIAL DEMONSTRATION AND SALE OF COPPER-CLAD RANGES

FOR ONE WEEK ONLY

SEPTEMBER 4th TO 9th

DERRYBERRY & FORBES, Inc.
