Dodge Brothers never chased any will of the wisps, such as chummy roadsters, sport models, coaches nor touring sedans with only two doors and tumble over seats which are familiar enough to all of us in our most popular and cheapest sedan. The newest Dodge Brothers Business Sedan—which you will see here soon—has four full sized doors, window elevators for each door, heater, and all the attributes of a real closed car. You need not unload "friend" wife into the street, nor disturb anyone nor any part of the car to let anyone in or out of the back seat. That is why we call it a regular closed car, ready at all times for the pleasure of your family and equally good for any business purpose.

Dodge Brothers have always used and built for themselves Dodge Brothers closed bodies, there never has been any skimping, no contracting of this high class work to the lowest bidder. They would no more think of having someone else build their bodies than to have another factory build their engines. Ours is one of the few factories to build their own bodies but they have the satisfaction of knowing it is done right. Dodge Brothers were the first to establish reasonable prices for a quality built medium sized car. Think of buying Dodge quality in a touring car for from \$5 to \$215 less than any other, the Coupe for \$200, less than two doored enclosed chummy roadsters, and our deluxe Sedan for \$300, to \$500, less than any comparable car. Compare quality, then prices and ask anyone of our 750 owners about the after service.

Your Home!!

EVERY family dreams of the day when it can have its own home, built after its own plans—or planning.

All very well—but it involves more responsibility and foresight than many folks imagine. The result usually is keen disappointments at the failure to take full advantage of building possibilities,—after good materials have been used and it is too late to alter plans.

Plans are easy. Experienced builders have worked out numerous plans for well arranged and comfortable homes. We can supply you with these.

That is but one of the features of service you get when we furnish building materials.

Come in and look over blue-prints, plans, perspective drawings and photographs of homes, barns, graineries, silos, etc., we want to help you plan.

But no matter what the job is—if you need Lumber, Cement, Lime, Shingles, Building Board, Tar, Lath, etc.—we want to supply you.

THE word "HOME" has been called the best known in the English language,—because it is there that all of our hopes are centered and our ambitions supported.

The husband and wife's responsibility, to their children—and to themselves—is to build a home which is an incentive to the best that is in them.

When you plan—think of a home which will be a lasting inspiration.
