**FEDERAL AID ROADS INCREASED SIX HUNDRED MILES IN JULY**

Nearly 600 miles nearer the goal of a completed system of highways for the United States is the report of the Bureau of Public Roads of the United States Department of Agriculture for the month of July. The final goal, the construction of a system of approximately 180,000 miles of Federal-aid highway consisting of a network of trunk line and secondary roads reaching into practically every county is still a long way off, but we are 5,392 miles nearer than at the beginning of the year according to the bureau.

Completed Federal-aid roads now total 18,299 miles with 14,912 miles under construction and approximately 60 per cent complete. Including projects not yet under construction Federal-aid roads in all stages now total 40,338 miles.

There is no indication of any slackening of the greatly increased rate of progress which began with the season of 1921 as the States continue to pour in plans for new projects and place them under construction as rapidly as possible. Nearly twelve and one-half million dollars was obligated to new projects in June and July, and in the week ending August 5 reports were received of the letting of 68 new projects and announcements of 57 to be let.

At the present time the force of the bureau is taxed to the limit with the examination of new plans and projects, inspection of roads, under construction and the planning of the Federal-aid highway system which is being gotten into final shape.

**NOTICE TO CONTRACTORS.**

Notice is hereby given that the Mayor and City Council of the city of North Platte, Nebr., will receive bids for furnishing all material and constructing 1445 feet of ten inch sewer complete with one manhole, according to plans and specifications adopted and on file with the city clerk of said city.

Bids must be on file with the City Clerk, on or before eight o'clock P. M., October 3, 1922. They must be on the proposal in the specifications and must be accompanied by a certified check payable to the City Treasurer for an amount equal to three per cent of the bid made. Estimated cost of the sewer is \$1490.00.

The mayor and Council reserve the right to reject any or all bids. By order of the City Council of North Platte, Nebr., Sept. 19th, 1922.

E. H. EVANS, Mayor.

O. E. ELDER, Clerk. (Seal.)

**PROMPT ACTION AGAINST HOG CHOLERA SAVES HEAVY LOSSES**

Watch for the first hog to show signs of cholera, advises the United States Department of Agriculture. If the herd is treated immediately it is generally possible to save the herd with but few losses. If the disease however, is allowed to reach all the animals before the serum preventive treatment is applied heavy losses may be expected. Antihog cholera serum is a preventive and not a cure for hog cholera, the department points out.

Whenever a hog dies of an unknown cause the owner should watch his herd closely for at least a week, and if any more hogs in the herd begin to show signs of sickness a veterinarian should be called immediately, for the chances are that hog cholera has reached the herd and prompt action in applying the serum treatment is the only thing that will save the well animals. A high temperature, ranging from 105 to 108 degrees F., in a hog that staggers when it walks, is a pretty good indication of hog cholera. Such hogs should be segregated and not allowed to mingle with other hogs or to wander about, for they will spread the disease wherever they go, sometimes in places where it is impossible to disinfect. Hogs that die on the farm should be buried, or, preferably, burned, in order to prevent birds, insects, and animals that visit the carcass from spreading the disease.

Usually the disease is most prevalent during the fall months and losses are invariably heavy in herds where owners neglect to immunize their hogs before the disease reaches them, or fail to call a veterinarian immediately on its first appearance.
