

SNYDER SAYS PRO- DUCE MORE BUTTER

VALLEY PROSPERITY LIES IN
NUMBER AND QUALITY OF
DAIRY COWS

An inquiry was received recently from the U. S. Department of Agriculture, concerning the proportion of the agricultural products which are grown and used on the farm, and the proportion shipped out in an unfinished form. The letter accompanying this inquiry emphasized the idea that the way to reduce the freight charges is to ship the products of the farm in a concentrated form. When alfalfa and corn are reduced to pork or butter the freight charges are reduced very materially. We have advocated and are still advocating the growth of more hogs and the milking of more good cows on our valley farms. Changing a community from a grain and hay selling, to a pork and butter selling basis is a slow process. Profitable livestock husbandry requires a more intelligent and industrious class of farmers than is required for the production of hay and grain. Real live stock men are born such rather than trained to be such.

It is gratifying to see good live stock men move into the community. They are almost always an asset to the social and economical life of the community. It is just as gratifying to see our own farmers change their methods of farming so as to develop the live stock side of their work.

While we are still a long way from producing the pork and dairy products that could be produced with profit our farmers are working in this direction. The number of hogs produced has been increased very much. The farmers are beginning to realize that there is a wonderful difference between a good dairy cow and the cow that has been bred to produce only enough to sustain her calf until it is old enough to live on grass or other feed. A rough estimate indicates that 2,000 pounds or 250 gallons of milk, supplemented with grass or other feeds will grow a calf to the point where it requires no more milk. A good dairy cow will grow four calves. The average of 27 cows and heifers on the Substation farm last year was over 10,000 pounds. One cow produced enough milk to raise ten calves during the year. The fact that the ordinary farmers cow is more likely to be a source of loss than a source of profit when milked, and that a good dairy cow is a certain source of profit when properly handled, is slowly but surely finding its way among the farmers who are so situated that they feel warranted in producing milk.

The Experimental Substation last year started a herd by selling Mr. John V. Diener several grade heifers and a pure bred bull. Recently another herd was started when Mr. T. F. Zimmerman purchased twelve fine grade heifers and a pure bred bull. These heifers are sired by Varsity Derby Matador, the senior herd bull, and are from high grade Holstein cows. The average production of the dams freshening at the age of 3 years and 2 months was 8,350 pounds of milk containing 414 pounds of butter. It is twice the average production of the cows of New York state, one of the leading dairy states. These dams are real dairy cows. The heifers should be better than their dams. They should prove a fine foundation for a very fine high producing dairy herd. A herd of dairy cows bred for production, a fine lot of well bred pigs, and an abundance of alfalfa gives Mr. Zimmerman a trio that can be beaten only by a quartet composed of these three and a flock of chickens.

We do not advocate dairy cows for the ranchmen, but we do believe that good dairy cows are the only kind worth while for the man who sells dairy products, and especially for the small farmers about North Platte.

The market will develop to keep pace with the increase in the amount of milk produced. In fact a large production is likely to create a better market by developing the local manufacture of dairy products other than butter.

W. P. Snyder, Supt.
Experimental Substation

Miss Mabelle McFarland has taken a position with the Rexall Drug Store.

DOUCET MUSIC STUDIO

Teacher of Violin and Cornet

WEATHER CONDITIONS

The first snow of the season fell Saturday night. It also snowed all day Sunday and Sunday evening. The forecast says there will not be much change in temperature. It will be fair to-night and Wednesday. The highest yesterday was 29 and a year ago 41. The lowest last night 11 a year ago 24.

ARTICLE FROM THE ROUND-UP ON VALUE OF ATHLETICS AND RECREATION

Public recreation is neither a frill a fad nor a fancy. It is actually what the word itself means, a "new creation", the giving of a new life to both body and mind.

The children of today will be the citizens of the future. It is indispensable, economical that public provision should be made to insure that they should be so trained as to make them not only educated to understand their duties as citizens, but be physically trained so as to be healthy and strong. It is also just that they should be helped to be happy. Our public schools give them the education. Our recreation system helps to give the rest. To interest the children, both boys and girls, in athletics, is not only to give them a new pleasure in life and to build up their bodies and increase their strength and health by scientific methods of physical exercise but to teach them, through competitive games to be energetic persevering, prompt and resolute. It also accustoms them to work together efficiently and to submit to discipline in order to secure success. It also trains them to care for their bodies, to live clean lives, to avoid the temptations of the streets and be honorable, manly and truthful. The boy who is interested in athletics does not frequent the liquor habit, nor become a gangster.

The aims of physical education are educational, corrective, and hygienic. The Educational effect is secured in mental alertness and in prompt response to command; Corrective effect is sought by stimulation of good habits in posture. Hygienic effect produced by deepened breathing and quickened circulation.

The improvement in the children has been accomplished by a corresponding benefit to the schools. Those who are not interested in athletics are the ones who are most apt to neglect their studies and to be disobedient. The strict and wise rule that prohibits boys and girls from representing their schools in athletics unless their scholastic standing is good is therefore a powerful influence for good scholarship and discipline which never previously existed.

There has also been created a new and strong school spirit which is of great educational value. So with the sincere cooperation of the boys and girls and teachers of North Platte much may be done to accomplish what our department has set out to do.

Ruby Damme.

Mrs. A. Hasenyager of Paxton visited in the city with friends last week.

Alton Weib of Paxton was a business visitor in the city Thursday.

Jack Crook of Paxton transacted business in the city Thursday.

J. M. Bricker of Paxton visited with friends in the city for a few days last week.

A number of local people attended the barbecue and dance at Hershey Saturday evening.

Jesse Smith returned Saturday from Central City after transacting business for several days.

Mr. and Mrs. P. A. Norton left Sunday evening for a months visit with relatives in Clinton and other Iowa points.

Adam Christ, a conductor for the Union Pacific was taken sick while out on the road yesterday. He was taken to a Cheyenne hospital. No particulars as to his sickness are known.

Poem by UNCLE JOHN

If I was a woman—as sweet as a rose—attractin' admirers wherever she goes,—I'd exercise judgment and never would fret to marry the fust man I thought I could get. . . . It's powerful resky to marry too fast, an' fetch up in heart-breakin' tatters at last!

If I was a woman—I'd shorely object to masculine drivell that's short of respect. I'd gather a brick-bat, and throw it to hurt—at the two-legged varmint that called me a "skirt," and I'd knock the face off'n the perverted swain, that chucked all politeness, to call me a "Jane."

If I was a woman that pined for a mate, I wouldn't step sideways to monkey with "fate." . . . I wouldn't trust nothin' that couldn't be proved—till I fished up a jay that was fit to be loved.—An' I'd practice all virtues, an' live in restraint—if I was a woman,—but, golly, I ain't!

LOCAL AND PERSONAL

Fred Traver of Paxton was a business visitor in the city Friday.

Mrs. Jessie Crider of Hershey shopped in the city Saturday.

Mrs. W. H. Stegall and children spent the week end in Hershey visiting with relatives.

Razor blades sharpened, one cent each. Price is same for single or double edge. All work guaranteed. Stones Drug Store.

Misses Eleanor and Angela Roddy returned from points in California Sunday. Mrs. Roddy and Marguerite will visit friends in Cheyenne several days before returning.

Mr. and Mrs. E. E. Atkinson of Brady transacted business in the city Friday.

Vesper McCormick of Paxton visited in the city with friends for a few days last week.

returned from Wyoming the last of the week. He and Mrs. Kierig have spent the summer there.

Mrs. Ed Yates attended the North Platte-Columbus football game at Columbus Friday.

Miss Julia Johnson attended the football game at Columbus Friday afternoon.

Lee Marr, a Mexican died yesterday. He was thirty years old. No funeral arrangements have been made.

CITY AND COUNTY NEWS

Clintons for spectacles.

Miss Mary Ellsworth spent the week end in Hershey visiting with her parents Mr. and Mrs. Jos. Ellsworth.

Mr. and Mrs. George Holstlander of Lincoln spent last week in the city visiting with friends.

Miss Ida Carlson returned to her home in Brady last week after receiving medical treatment in a local hospital for some time.

Elmhurst Farm Shorthorns

AT PUBLIC AUCTION

Farnum, Nebr. Thursday, November 23.

35 Head of Registered Cattle

Highest class registered Shorthorns, 8 bulls and 27 cows and heifers.

WHY SHORTHORNS?—England, the home of the Shorthorn cow that furnishes 90 per cent of the milk consumed in London. We believe true dual type does not sacrifice beef making on the altar of milk production.

TERMS—Cash unless other arrangements have been made with the clerk before the sale.

E. W. Crossgrove & Sons.

A. W. Thompson, W. H. Bick, C. A. Hudson, O. H. Peterson
Auctioneers, S. F. Parker, Clerk.

HOOOSIER

Demonstration Sale Ends Saturday

The end of the week is drawing near. Our supply of Hoosier Beauties and the free cutlery sets is dwindling rapidly.

If you have any idea of winning freedom from the most depressing drudgery of your housework, don't wait until Saturday.

Come in at once and see the Hoosier demonstrated. You will not be urged to buy unless your reason tells you that you should.

But at least you will not have neglected your greatest opportunity to secure America's favorite kitchen convenience offered.

And, remember, it is our claim that nothing you can put in your home will bring you so much joy and comfort as the Hoosier. We honestly believe it to be the best designed, most helpful household convenience ever offered to American woman-kind. And over two million Hoosier owners endorse that statement.

You can't afford not to investigate the Hoosier.

FREE

TO PURCHASER
This \$7.50 Set
OF DEXTER CUTLERY

As an extra inducement to buy your Hoosier during this big demonstration sale, we will give you FREE with your Hoosier Beauty the complete Dexter Domestic Science Kitchen Set. This set has the unqualified endorsement of such eminent authorities as Good Housekeeping Institute, Miss Alice Bradley, Mrs. Christine Fredericks and many others

SPECIAL This week Only

- 1 A small payment down on our special contract plan puts the complete Hoosier in your home.
- 2 You pay the balance in deferred payments of convenient amounts
- 3 No extra charge for these easy terms or for the free cutlery.
- 4 The low 1922 cash price prevails.
- 5 Your cabinet delivered on receipt of your initial payment, under the factory guarantee "Money Back if not Delighted."
- 6 A free set of Dexter Domestic Science cutlery—worth \$7.50—included with each Hoosier Beauty.

Included With Your Hoosier Beauty

—as regular Hoosier equipment—
this splendid 14-piece set of crystal glassware, the largest set of glassware ever included with a kitchen cabinet.

W. R. Maloney Co.
