IN view of the president's decision in the case of the bid of the Detroit Dry Dock Co. that under existing treaties naval vessels cannot be built on the great lakes, the navy department will now press upon congress the importance of allowing its estimate of \$500,000 for the accumulation of a supply of rapid fire rifles for the auxiliary navy.

THE secretary of the interior has decided that Oklahoma territory was entitled to certain school indemnity lands on the Kickapoo reservation which was settled upon when the country was opened by President Cleveland, and the settlers will have to give possession. When they arrived at the scene of the disaster they found the bodies of the cook and fireman floating near the sunken tug.

The church was elegantly decorated, and Walter Damrosch and his symphony orchestra played selections. Bishop Littlejohn was assisted in his duties by Bishop Potter and Rev. John W. Brown, rector of the church. William K. Vanderbilt gave his daughter away and then left the church. PRACTICALLY all of the Clyde engineers were idle on the 7th, as the bulk of them had refused to go to work as a protest against the action of the ship-builders locking out 25 per cent. of the union employes in their yards, and the extent to which the other industries were affected was incalculable, for when the ship-building on the Clyde is at a stand-still a general stagnation of business in the west of Scotland is the result. The coal and iron industries were most affected, and numbers of miners and iron workers will probably be thrown out of work.

MONA McDONALD, the 18-year-old son of H. D. McDonald, proprietor of the Oxford (Kan.) Register, was murdered in Chicago on the 7th by one of three burglars whom he surprised while attempting to rob a house where he was staying. THE legislature of the Chickasaw nation has passed a bill declaring the intermarried persons of that nation non-citizens and not only disfranchising them, but taking away their right of holding land, participating in annuities and holding any official position under the Chickasaw government. There was great excitement in the nation and the question will be fought in the courts and in congress, as the law will make all of those coming under it paupers.

THE steamer Business, with a cargo of wheat, was sunk in Lake St. Clair by a whaleback barge striking her. She will be raised, but her cargo will be insured.

ADDITIONAL DISPATCHES.

A THREATENED riot at Ishkoota mines, near Birmingham, Ala., was quelled by the mine boss, Perry Watkins, who killed two men and mortally wounded another on the 9th. THE Chicago Post said that a gigantic pool, embracing not only all rail traffic from Chicago to the seaboard, but all lake traffic and all that of the Erie canal as well, was contemplated and that when it goes into operation the whole traffic of the northwest will be at the mercy of the carriers. E. T. ROOPS, who was a delegate from Indiana to both national conventions that nominated ex-President Harrison, said recently that the latter was a receptive candidate, that friends were at work in his interest in every state in the union and that Indiana would again send a delegation for him in 1896.

An estimate of \$12,000,000 is made for the free delivery service next year. Money orders were issued during the past year to the amount of \$156,732,083.

Cultivating Bacteria. To the un instructed mind, it may smack of absurdity to say that at no distant day the bacteria of butter and cheese will be cultivated as we now cultivate any other commercial products. A writer on this subject says: "The fermentation of cream and cheese is already as much of an art as the fermentation of malt in the manufacture of beer. In the curing of tobacco the same activity is discovered, and the day is not far distant when commerce in high bred tobacco bacteria will be an established fact. In short, we may look forward to the day when the bacteria active in agriculture will be carefully cultivated, and the bacterial herd book will be found along with those of the Jersey cow and the Norman horse." On a par with this is the sterilization of products, which process is necessary before the thoroughbred bacteria is introduced.—N. Y. Ledger.
