STRANGE THINGS ABROAD.

The "Giants' club" in Berlin admits to membership no one who is less than six feet in height.

Red socks have just killed a hostler at Stamford, England. The dye entered a cut in his foot, causing blood poisoning.

In Hamburg a dog is taxed according to his size; a little tax for a little dog, and a big tax for a big dog.

In the city of Brussels there is a clock which is wound up by the wind, and never by human hands.

Globular lightning set fire to a woman's dress near Angers, in France, during a recent storm, the burns causing her death soon after.

Some of the towns of Germany have their water pipes made of glass, protected with an asphalt covering, to prevent fracture.

A fire at a farmhouse near Axminster, England, was put out recently by pumping on it cider from hogsheads, as there was no water to be had.

Blondin's, the tight-rope walker's, stock in trade is offered for sale in Paris. Besides the tri-colored wheelbarrow, the harmonium, cornet and costumes, it includes the cable on which he crossed the river above the falls of Niagara.

Tiny, the smallest toy terrier in the world, died recently in London. He was less than four inches long. His late owner, Lieut. Gen. Sir Archibald MacLaine, has had the body stuffed and has presented it to the London Zoological garden.

At Persian funerals the mourners are supplied with wads of cotton, which they use to wipe away their tears. The cotton is afterward collected and squeezed, and the tears are bottled and preserved. They are supposed to possess restorative qualities in fainting fits.

Bicycle readings are the latest English novelty. They are a sort of Chautauqua on wheels. Clubs of literary young ladies are formed to read up on various subjects, and the members wheel away to the woods with their lunches and notebooks at stated times to hold their meetings under the trees. There is no international copyright on the idea, and it will bear importation.

CROWNED HEADS OF EUROPE.

Queen Victoria purchases almost every new book of note published, and her expenditure on literature of all sorts is over \$6,000 per annum.

Czar Nicholas has presented to the Magyar national museum at Budapest the sword of George Rakoczy I., prince of Transylvania, whom they have made one of their national heroes.

The king of Greece delights in taking recreation in the fields. He can plow, cut and bind corn, milk cows, and, in short, could at a pinch keep a farm going single handed.

Emperor William's latest fad is telegraph, and he is spending several hours a week learning to send messages by dots and dashes. He has already made considerable progress as an operator of the key.

Queen Wilhelmina of Holland has a miniature farm, the produce of which she gives to the poor and to the hospitals. Her Swiss chalet is stocked with the accumulated toys of 12 years or more, and here she learned to "keep house" in the most approved Dutch style.

For the first time since 1867 the queen of the Belgians has gone on a long visit to France. She is at Chantilly, the guest of the Duc d'Aumale. Chantilly is a place where training of horses for race courses is the staple business, and the queen has a passion for horses. The queen of Naples has a racing stud at this place.

Lost—A Point.

Historic are the instances of points missed in the retelling of a good story. Who has not heard of Charles Lamb's "badly tired" wheel twisted into "badly wearied" with a consequent loss of the point? And here is one that was overheard at one of the little French restaurants: One of the habitues of the place had just returned with a coat of tan that spoke even louder of a glorious vacation than any words. "I've been roaming around through the upper parts of the state," he said, and many quaint and curious things have I seen. One of them was an old inn, old as the hills, I guess. Its name, too, was particularly appropriate for a hotel, 'Dew Drop Inn.'" His hearers commented on the aptness and later in the evening, when a stranger joined the party, one of the number tried to tell about this hotel and could not understand why the late comer did not see the aptness when he told that on the signboard were the words: "Please Walk In."—N. Y. Herald.

Spring Cleaning.

Spring cleaning need not necessarily be made the drudgery it is if properly done. Paints, floors, hard walls and windows may all be cleaned without rubbing, by wiping over with strong suds made of Ivory soap and hot, soft water, then rinsed and dried. A room thus cleaned will be fresh and sweet, with no unpleasant odor of strong soaps or cleaning fluids.

Milton Reizenstein, a graduate student of the Johns Hopkins University, of Baltimore, has prepared a monograph as a thesis for a degree which he expects to receive next June. He has chosen for his subject the history of the B. & O. R. R. from its inception on the night of February 12th, 1827, when 25 of the leading business men of Baltimore met at the home of Philip E. Thomas and devised means whereby the trade of Baltimore with the West could be restored. It was at this meeting that the company was organized which afterwards built the B. & O. R. R. Mr. Reizenstein's monograph takes up the history of the road from that night until tracks were laid to Wheeling, W. Va., in 1853. The 70th anniversary of the B. & O. R. R. Co. was February 12th, 1897.

Probably the first thing every man resolves when he gets up in the morning is that he will go to bed earlier the next night.—Athenion Globe.

Rest assured that if your misdeeds find you out they will call again.—N. Y. Weekly.

OUR ENEMY STOLE IN

What has happened? Simply this: the cold has settled on your kidneys. They are overcharged with blood and inflamed. Instead of passing the waste matter out of the body they are damming it up in the blood. Every minute, yes, every heart beat adds to the poison in you. Normal action of the kidneys will purify the blood. Nothing else will.

The Electric Light of Mowerdom

NEW 4

The pine knot—the tallow candle—the oil lamp—gas—these are stages in the evolution of illumination, which today finds its highest exponent in the electric light.

Similar and no less striking has been the evolution of grain and grass cutting machinery. In 1831 the scythe and the cradle were superseded by the McCormick Reaper. The intervening years have seen many improvements, until now we have that model Harvester and Binder, the McCormick Right Hand Open Elevator, and that veritable electric light of mowerdom, the

MCCORMICK

New 4. It is not only the handsomest mower ever built, but it is, in every sense of the word, the best—and if your experience has taught you anything, it is that there's nothing cheaper than the best.
