Gen. Wood Assigned to Philippines for a Definite Purpose.

Affairs in the Islands Will Be Put on a Wholesome and Hygienic Basis, Morally and Physically—Polygamy and Slavery to Go.

Washington, March 10.—The "twin relics" of barbarism, slavery and polygamy, which we annexed with a lot of other things when we retired Spain from her Pacific colonies in 1899, are now to be wiped out in the Asiatic United States, as they have been in the United States of North America. That is the real purpose of the assignment of Gen. Leonard Wood to duty in the Philippines. In all the official reference to his new duties, the impression has been conveyed that he was to go into the Moro country to "clean it up" and put things of a more wholesome civic and hygienic basis, as he did in Santiago after the close of the Cuban war; and it is further known that his ultimate destiny is the supreme command in the Philippines, which his friends hope he will be able to make the stepping stone to the head of the army at home.

Burning oil was hurled over the crowd and the consuming heat enmeshed many victims. The exact number is at present unknown because the intense heat renders it impossible to reach the bodies, which are being incinerated. One estimate is 20 dead and twice that number burned seriously.

## PROSPERITY IN CANADA.

The Farmer in Western Canada Achieves Wonderful Success.

One of the first things that the man who wishes to change his residence endeavors to find out is where he may go and succeed. It need be a matter of little doubt or indecision now. During the past four or five years the development of Western Canada has been so rapid, and the conditions of life there so widely known, that upwards of 100,000 Americans have taken up their homes there, and the experience of these people is that they are thoroughly satisfied with their choice of home.

The methods of farming there are similar to those adopted in the United States, but the operations are simpler, the yield of grain greater, and the profits more satisfactory. Ranching is carried on with lots of success. Mixed farming is always profitable, while the results in grain-raising are as certain as splendid soil, excellent climate and lots of sunlight can give. The yields of — but nothing is as satisfactory as the experience of the farmer himself, and extracts are selected from one.

A good, intelligent farmer, named Mears, John Mears, to be exact—left Cavalier County, North Dakota, two years ago, and followed the thousands who had already gone to Canada. He had twenty-five years' experience in Minnesota, in buying grain, including flax. But in all his experience he never saw a district so well suited to the growth of flax as Western Canada. The financial results of Mr. Mears' operations in a single season are as follows: Wheat, 3,000 bushels, 1 hard at 57½¢, \$1,785.00, 2,680 bushels, 1 Northern at 54¢, \$1,452.80; oats, 1,750 bushels, at 35¢, \$612.50. Speltz, 154 bushels at 75¢, \$115.50. Flax, 324 bushels, at \$2, \$628. Total, \$4,598.20.—A return of more than \$4,500 from a little over 250 acres, an average of \$18 per acre—is surely testimony sufficiently strong to satisfy the most incredulous as to the money to be made out of the soil of the Canadian West. It is to facts like these—arguments expressible and demonstrable in dollars and cents, that the steady northward movement of American farmers is due. Mr. Mears is settled near Arcola, Assa.

A number of Americans who have chosen Western Canada as a home had the idea that a man enjoyed less freedom in Canada, but they soon found their mistake, and say the laws of Canada are the most liberal in the world, and such as prevent the litigation which breeds so much bad feeling between people in the United States and costs them so dear in lawyers' fees.

The Government has established Agencies at St. Paul, Minn.; Omaha, Neb.; Kansas City, Mo.; Chicago, Ill.; Indianapolis, Ind.; Milwaukee, Wis.; Wausau, Wis.; Detroit, Sault Ste. Marie, and Marquette, Mich.; Toledo, Ohio; Watertown, S. Dakota; Grand Forks, N. Dakota; and Great Falls, Montana; and the suggestion is made that by addressing any of these, who are the authorized agents of the Government, it will be to the advantage of the reader, who will be given the fullest and most authentic information regarding the results of mixed farming, dairying, ranching and grain-raising, and also supply information as to freight and passenger rates, etc.
