A LETTER FROM PROF. SCHELL.

The following is an extract from a letter written by Prof. C. D. Schell, a brother-in-law of D. H. Clark, who is teaching in the Philippine islands:

"Mrs. Schell and I have had excellent health since we reached the islands. Our worst misfortune so far occurred the other day when Margaret fell downstairs and struck at the bottom on her forehead, making a deep gash, which exposed the bone. The army surgeon at San Isidor sewed it up, but it did not heal and so he was compelled to take out the stitches. In a few days he will try it again, when we hope for better results. Margaret speaks Tagalog well, and her mother and I use her for our interpreter.

"Our school has been growing very fast since February. Last month our enrollment was 512 pupils, and our average daily attendance was two hundred more than during May, 1902. But we still have room for growth, as the school population of Gapan is over 3,200. We have only six native teachers and our buildings are full. We have ordered 125 more double seats.

"There is a very large stone church here, the finest in the province, and the band is considered the best in North Luzon. It is in great demand to play at the fiestas in the other provinces. In Gapan it plays at the fiestas and at the funerals. When a baby is named the band follows it home from the church.

"According to the census, 5,587 of the 11,285 people in Gapan can read and 1,870 can write, but most of the people read Tagalog only, and very little of that.

"Mrs. Schell and I get as many letters as all the rest of the people in Gapan."

Catarrh of the Stomach.

When the stomach is overloaded; when food is taken into it that fails to digest, it decays and inflames the mucous membrane, exposing the nerves, and causes the glands to secrete mucus instead of the natural juices of digestion.
