Tuesday afternoon Mrs. R. I. Brown brought us a sample of polk root raised by Uncle Jack Smith on the poor farm. This plant is a common one in the eastern states, but so far as we know is not raised in Nebraska, and it is probable Uncle Jack is the first one to raise it here. Last spring Mrs. Brown received some flower seeds from Ohio and it is probable there was a polk root seed or two in the others, as it grew in the flower row.

Last Friday a number of the men of Nemaha and vicinity did some good work on the road to the cemetery, which was in bad shape from the corner of the Quiller farm east. There were seven teams, with plows and scrapers, and men with axes, spades, etc., and all did good work. The next day there were five teams and by noon the trees had been grubbed up and the road graded up. It is now in fine condition, and the cemetery association, with the help of our citizens, will endeavor to keep it that way.

One of the most interesting of the bulletins issued by the state bureau of labor is the "Statistics of Nebraska." Many interesting items may be gleaned from its pages. It gives the number of acres, value and average value of taxable land and value of live stock, by county, in 1904; number of head of live stock; acreage of cereals; acreage of miscellaneous crops; acreage and value of hay; yield by counties of four principal crops of Nebraska for 1903; value of same and per capita value; bank deposits of Nebraska. A short history is also given, and many interesting items.
