NEMAH, - - - NEBRASKA

Men who are carrying to-morrow's burdens are not counting to-day's blessings.

The sharper a man is the more likely he is to stick into something and get rolled off.

"Can anybody make \$50,000,000 a year honestly?" Yes; Uncle Sam can—with his little mint.

It would be a real novelty to find a sympathetic strike in support of the brotherhood of man.

Many a man who prays for power to lift a world shuts his eyes when he sees a poor woman struggling with a heavy satchel.

Queen Olga, of Greece, is an honorary Russian general, and she bears the distinction of thus far having nothing which she regrets to report.

Louise, the eloping princess, announces that she is going to expose some scandals in high life. If anybody can do it Louise would seem to be the lady.

The loss of \$45,000,000 through the Colorado troubles is a small matter compared with the loss of respect for American institutions which they have produced.

The man who invited his wife into the back yard to see him blow out his brains was a trifle narrow. Doubtless his neighbors would have enjoyed the spectacle also.

A Silesian doctor announces the discovery that breathing coal dust is a rare for consumption. Remember this when you find your ton of chestnut coal to be half slack.

It is said that this has been a poor year for the summer resorts. The season has been comfortable, however, for those who stayed at home, a much more important consideration.

A certain species of fecund and undesirable thistle is termed in the United States the "Canadian" thistle. In Canada the same unpopular plant is disowned under the name "Scottish" thistle. Wonder what they call it in Scotland?

It's curious how easily a fortune-hunter from England can come over here and capture beautiful and highly bred American girls, when the same stamp of native would have no chance in the world. The sad shattering of Natalie Schenck's romance is a perfect case in point.

One of the discoverers of radium is rapidly receiving the recognition which is his due. The latest evidence of the appreciation of his genius by his countrymen appears in the creation of a professorship of physics in the University of Paris, and the appointment of Monsieur Curie to be its first occupant.

There is the story of ultimate naval efficiency. You must have the biggest and most powerful guns in the world. That means, of course, that you must have battle ships big enough and strong enough to carry such guns. Finally, you must keep your gunners practicing and practicing at the targets in time of peace until they can "hit the gold" at miles away; and then you will know that in time of war, if such time comes, they will send their bolts home to the vitals of the enemy's ships, as our men did at Santiago and as the Japanese did in the strait and in the Yellow Sea.

Insurance companies are constantly seeking new things to insure against. One of the latest is bad weather. Near all the large seacoast cities the beach hotels and restaurants depend much upon the Saturday to Monday patronage, and that, in turn, depends upon the weather. An insurance agent of New York has lately been sounding the proprietor of beach resorts near at hand in regard to insurance next summer against cold or stormy weeks. Doubtless the underwriters will not only be experts in meteorology, but also well-acquainted with the goose bone, the ground-hog and the muskrat.

There are more men employed for general housework, including cooking and all kitchen work, than most persons realize. It is affirmed by those who have placed their kitchens in such hands that affairs are conducted in a more businesslike way and that the service is much more satisfactory than it has ever been under the rule of the girl, that the efficient young men save more than the difference between the wages of girls and the higher wages of themselves. Should the scarcity of domestic servants be serious enough

men ready to undergo thorough instruction in housekeeping for the purpose of taking the places of the emancipated kitchen girls.

The son recently born to the Emperor of all the Russias is heir apparent to his father's throne. His birth is an important political event in the midst of one of the most critical and disturbing periods in the history of his people. His father's other children are all girls, who, by the law which has been in force for a century, are set aside in favor of male heirs. Had they grown up without a brother, they would have looked to their Uncle Michael as their father's successor. The little Czarovitch will be called Alexis, and if he reaches the throne, will be the second Czar of that name. The first was the founder of the house of Romanof and father of Peter the Great. The coming of a royal son at this distressing moment is hailed by the Russian people as an omen of better fortune. All the world hopes that the young prince may live to be a powerful and enlightened emperor. The father, Nicholas, will be envied by other European monarchs who have no male heir in direct descent—the Emperor of Austria, King Leopold of Belgium, King Carol of Roumania and Queen Wilhelmina of Holland.

Fathers and mothers handle their children in a very different manner. Mothers, it seems, soften their children with endearments and rescue them from discipline. Fathers are so lenient, having rubbed up against the world. There are two schools of opinion, not well defined perhaps, but none the less in existence, about the proper method of training youth to sustain the shock of battle in life and escaping strong and victorious. Some are for the hardening process. "Throw the boy into the stream," they say, "and let him swim for it; the way to teach one to bear hard knocks is by experience, with hard blows, and if he is ever to amount to anything he must fight for his life." The defenders of the hardening process can point to the fact that the over-solicitous parent who follows the child's footsteps endlessly and takes care that the breath of heaven does not too sharply blow on him, who stands between him and all responsibility, acts for him and does his thinking for him, finds that the most carefully nurtured and closely guarded young man is without the capacity to act alone because some one else has been acting for him, and falls lamentably to stand up under the weight of responsibility and care when finally he meets it. On the other hand, there is the newsboy who was thrown into the street, aged 4 to battle for fortune and later became a college president; there is the bootblack who is a railroad magnate and owes thanks only to his stout heart and quick wit; there is the homeless country boy left destitute and friendless in his tenderest years, who succeeds in winning fame and fortune. These, if not familiar examples, are talked about enough to give one the impression that the proper way to become great is to forego all the advantages of home training. There is chance for serious deception. The boy who achieves success under such discouraging circumstances is a remarkable young man—one in a million. His career is a glorious thing and is an inspiration and an encouragement to the nation. But he is the kind of boy who would have succeeded under any circumstances. The other side of the picture where boys have lacked parental care and guidance is not open to the casual gaze of the world, but may be studied in every house of correction, reformatory and jail. Young men and women, it is true, will never learn to be strong in character from hearing lectures on right living. They must have the practice and learn by doing. They will never learn to be strong if some one else does everything for them. Some strong men have stood the terrible strain of being thrown upon the world as waifs and have come out triumphant, but it is still as true of character as of physical strength that it is in general of slow and gradual growth. The sure way of winning an athletic contest is to train for it, and the best training possible for life is none too good.

**Cool Audacity.**  
This story is told of a resident in a London suburb. As he was waiting at the railway station of the suburb in which he resided his train drew up but the only second-class "smoker" was already full. He summoned the guard and ordered him to inspect the passengers' tickets, as he was sure that some one in the carriage had only a third class ticket. Overawed by his manner the guard meekly obeyed, and, sure enough, one passenger was found in the suggested plight and promptly ejected. His seat was taken by the arbitrary one, who remarked genially to the rest of the carriage, as the train stomped out of the station:  
"I was very sorry to turn that gentleman out, especially as I have only a third class ticket myself!"  
It is dangerous to place confidence in a man who brags ever having had

Some of the red wood trees in California are said to be 2356 high and 156 feet in circumference.

The harp of Mary, Queen of Scots, was once bought by the Society of Antiquaries of Scotland for \$4,500.

More than ten thousand Japanese women have already volunteered to go to the front to act as nurses.

The area covered by the St. Louis fair is 1,204 acres, that under roof is 128 acres.

The average annual contribution in American Protestant churches is \$12 per capita.

A man turns 12,000 spades of earth in digging an acre and moves in all a weight of 850 tons.

### Cured Her Rheumatism.

Deep Valley, Pa., Oct. 31.—(Special.)—There is deep interest in Green county over the cure of the little daughter of I. N. Whipkey of Rheumatism. She was a great sufferer for five or six years and nothing seemed to do her any good till she tried Dodd's Kidney Pills. She began to improve almost at once and now she is cured and can run and play as other children do. Mr. Whipkey says:  
"I am indeed thankful for what Dodd's Kidney Pills have done for my daughter; they saved her from being a cripple perhaps for life."

Dodd's Kidney Pills have proved that Rheumatism is one of the results of diseased Kidneys. Rheumatism is caused by Uric Acid in the blood. If the Kidneys are right there can be no Uric Acid in the blood and consequently no Rheumatism. Dodd's Kidney Pills make the Kidneys right.

There are 155 women commercial travelers on the road in Great Britain.

The Russian population of Siberia now numbers not far from 8,000,000.

A portrait of the Crown Prince Michael Alexandrovitch brother of the Czar Nicholas II. Emperor of Russia is a feature of the World's Fair. It was executed by the Russian artist Boldieff.

During the past year the night shelters of Paris received 67,283 men, 211,006 women and 388 children.

A novel custom with regard to the dead has become popular in Paris. On a man's tombstone an oak box is placed. When his friends visit his grave they drop their cards through a slit in the top of the box. His near relations are supposed to open the box occasionally to find out by whom his memory is cherished.

In portions of Africa the girls have husbands picked out for them at early age. On the day of their birth they are betrothed to a baby boy a grade older than themselves, and at the age of twenty they are married. The girls know of no other way of getting a husband, and so they are quite happy and satisfied.

The Icelanders believe that all waters which flow to the north are drawn hitherward by a suction created by the oceans tumbling downward through the hollow which they firmly believe exists at the pole. Their authority for this curious belief is the "Utama Saga," a semi-sacred work written early in the fourteenth century.

Mrs. Mary E. Meserve, of Salisbury, Mass., was cured of Anemia, a disease in which there is an actual deficiency of the blood, by the use of

### Dr. Williams' Pink Pills for Pale People

She says: "The first symptom was an unusual paleness. Later the blood seemed to have all left my body. I had shortness of breath and fluttering of the heart; was depressed, morose and peevish. I suffered for two years. Physicians did me little good but I am now a well woman because I took twelve boxes of Dr. Williams' Pink Pills."

These pills really make new blood and have cured obstinate cases of rheumatism, scrofula and erysipelas. They are especially useful to growing girls.

Sold by all Druggists.

### Pumpkin Marmalade.

Cut a pipe, yellow pumpkin into large pieces, pare, scrape out the seeds, and then weigh. To every pound allow a pound of sugar and an orange or lemon. Grate the pumpkin on a coarse grater, and put it into a preserving kettle with the sugar, the grated rind of the orange or lemon, and the strained juice. Let it boil slowly, stirring frequently and skimming well until you have a smooth, thick marmalade. While still hot pour it into glass or china jars or tumblers, filling not quite full. When cold, pour over the top a covering of melted paraffin, cover with the lid or brown paper, and keep in a cool, dark place.

### Apple Shortcake.

Make a dough of a pint of flour sifted with two teaspoonfuls of baking powder and a little salt; rub a tablespoonful of butter thoroughly into the flour, and add a teaspoonful of sweet milk, or enough to make a soft dough; divide into three equal parts and roll, handling as little as possible; lay one in a greased pan, lightly grease the top of dough with butter; lay on the second sheet, grease, and add the last sheet of dough; bake in a hot oven till done. Separate the sheets and spread between them warm apple sauce seasoned with sugar, butter, and a pinch of salt. Serve warm with cold cream or rich milk.

### Chicken Jelly.

Let two or three chickens cook slowly in a small quantity of water until the meat loosens easily from the bones, and season with salt and pepper. As soon as it is cool enough to handle, remove bones and skin. Place the meat in a deep mold, and use gizzard, liver and heart. To the water left in the settle add half a box of gelatine dissolved first in a little warm water, and boil until reduced to about a pint. Pour this over the chicken in the mold and set away to cool. Cut in slices with a very sharp knife.

### Chicken Eruth.

Half a chicken, or the inferior joints of a whole one, a quart of water, half an onion, a bunch of pot herbs, a stick of mace, and salt to taste. Put all together in a saucepan and simmer gently for an hour and a half, constantly skimming the broth. When done, strain and set away to cool; take all the fat off the top and warm a little at a time, as required.

### Beef Tea.

Put one pound of lean beef chopped fine into a jar without any water, cover and set in a pot of cold water. Heat gradually to a boil, and boil for three hours. Season with salt, and strain. Chicken tea may be made in the same manner.

### Onion Gruel.

For a cold nothing is better than onion gruel. Slice a few onions and boil them in a pint of milk. Add about a teaspoonful of oatmeal and a little salt. Boil until the onions are tender. Swallow this very hot and go to bed.

### Egg in Milk.

Beat thoroughly the yolk of an egg and stir it into a glass of milk, which must be chilled. Add two lumps of sugar. Beat the white of the egg to a froth and drop on the mixture, with a dash of grated nutmeg.

### Toast Water.

Brown lightly some slices of toast, add enough boiling water to cover them and let them steep until cold. Strain and sweeten, and place a piece of ice in each glassful.

### Short Suggestions.

If you heat your knife slightly you can cut hot bread as smoothly as cold.

Equal parts of currant juice and sugar give a delicious flavor to canned black raspberries.

Linoleum and oilcloth can be restored to their original polish by washing them with milk.

Rub the hands on a stick of celery after peeling onions, and the smell will be entirely removed.

Don't risk spoiling a can of choice fruit for the cost of a new rubber band for the top of the fruit jar.

To clean Japanese trays wipe with a cloth wrung out of soapy water, then dust a little dry flour over and polish with a soft duster.

Lamp wicks soaked in vinegar some twenty-four hours before being used will give a clearer flame and a steadier light than those not so treated.

Before boiling milk rinse out the saucepan with cold water. This will prevent the milk from burning as quickly as it would do otherwise.

Before using the rope you have bought for a new clothesline, boil it and let it dry. In this way it is properly shrunken and it is also made more durable.

### Happy Woman.

Mrs. Pare, wife of C. B. Pare, a prominent resident of Glasgow, Ky., says: "I was suffering from a complication of kidney troubles. Besides a bad back, I had a great deal of trouble with the secretions, which were exceedingly variable, sometimes excessive and at other times scanty. The color was high and passages were accompanied with a scalding sensation. Doan's Kidney Pills soon regulated the kidney secretions, making their color normal and banished the inflammation which caused the scalding sensation. I can rest well, my back is strong and sound and I feel much better in every way."

For sale by all dealers, price 50 cents per box. Foster-Milburn Co., Buffalo, N. Y.

An eminent physician of Vienna asserts that rheumatism can be thoroughly eradicated by a plentiful diet of ripe fruit.

### Cataract Cannot Be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Cataract is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Cataract Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Cataract Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combustion of the two ingredients is what produces such wonderful results in curing Cataract. Send for testimonials, free.

F. J. CHENEY & CO., Props., Toledo, O. Sold by Druggists, price 75c.

Hall's Family Pills are the best.

The propellers of the fast auto boats revolve 1,250 times a minute, giving a speed of 25 miles an hour.

There is only one woman admiral in the world. The Queen of Greece is an Admiral in the Russian navy.

There are only five doctors in Alaska, which has a population of over 32,000.

Horses are so plentiful in Buenos Ayres that even the beggars beg on horseback.

Mexico has little trouble in finding soldiers. They are recruited from the prisons.

The dissection of human bodies by medical students has been practiced since B. C. 320.

### MAKE YOUR SON INDUSTRIOUS

Fathers, bring up your sons to be industrious—to love labor. It is essential for a young man to learn a trade, even though he does not intend to obtain a livelihood by it. He will then have something on which to fall back in case of need. Should misfortune, in the years to come, assail him, he will have something upon which to rely—the skill which will enable him to earn a living. Boys who are allowed to idle their time make the dronish men we so often see, who hate next to absolute starvation everything that bears the name of work, and never accomplish anything, either for themselves or for the world. "Train up a child in the way he should go, and when he is old, he will not depart from it."

### BY PROXY.

#### What the Baby Needed.

I suffered from nervousness and headache until one day about a year ago it suddenly occurred to me what a great coffee drinker I was and I thought may be this might have something to do with my trouble, so I shifted to tea for a while, but was not better, if any thing worse.

"At that time I had a baby four months old that we had to feed on the bottle, until an old lady friend told me to try Postum Food Coffee. Three months ago I commenced using Postum, leaving off the tea and coffee, and not only have my headaches and nervous troubles entirely disappeared, but since then I have been giving plenty of nurse for my baby and have a large, healthy child now.

"I have no desire to drink anything but Postum and know it has benefited my children, and I hope all who have children will try Postum and find out for themselves what a really wonderful food drink it is." Name given by Postum Co., Battle Creek, Mich.

Both tea and coffee contain quantities of a poisonous drug called Caffeine that directly affects the heart, kidneys, stomach and nerves. Postum is made from cereals only, scientifically blended to get the coffee flavor. Ten days' trial of Postum in place of tea or coffee will show a health secured worth more than a gold mine. There is no reason.

Get the book, "The Road to Well-Being," in each pkg.
