Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon

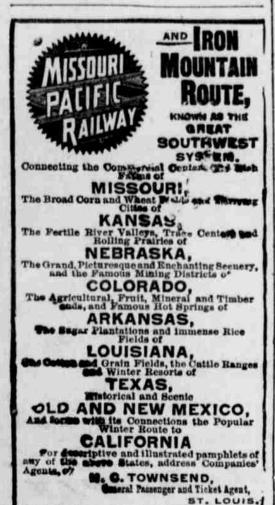

disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kldneys. If the child urinates too often, if the

urine scalds the flesh or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as

most people suppose. Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect o Swamp-Root is soon realized. It is sold by druggists, in fifty-cent and one dollar

sizes. You may have a sample bottle by mail free, also pamphlet tell- Home of Swattp-Root. ing all about it, including many of the thousands of testimonial letters received from sufferers cured. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper.

Huge Task

It was a buge task to undertake the cure of such a bad case of kidney disease, as that of C. F. Collier, of Cherokee, Ia., but Electric Bitters did it. He writes: "My kidneys were so far gone I could not sit on a chair without a cushion; and suffered from dreadful backache, beadache, and debression. In Electric Bitter, however, I found a cure, and by them was restored to perfect health. I recommend this great tonic medicine to all with weak kids neys, liver or stomach. Guaranteed by W. W. Mrs. E. D. Bickford is in receipt of a letter this week from her brother. Wm. Mason, who about a month ago went to Panama to accept a position on the government canal work. The letter is dated Calebra, May 11, and was ten days reaching its destination, Brownville. In the letter, Mr. Mason who has charge of a gang of natives on the work of rebuilding the Panama railroad, says he is well pleased with his work and very much enjoys the novel scenery. One northern man will do the work of five natives, he says. Very little sickness prevails at this time. the most of which is due to the way the people live. Schools and churches are as yet an unknown quality, but these will be provided for later on as Uncle Sam has no intention of compelling his workers from the privilige of church attendance and schools will soon be established through Nebraska out the zone. - Brownville Letter.

Ex-Gov. Furnas Died Last Night

News was received just as we go to press that ex-Governor Furnas died last night. Word had just been received at Brownville to this effect.

The many friends of ex Gov. R. W. Furnas of Brownville will regret to learn that he is dangerously sick at Lincoln. We understand a telegram received at Brownville Thursday said there was little hopes of his recopery. His death was reported Thursday night but this was probably a mistake, as the central at Brownville said this morning that he was alive late last night and no news of his death had been re-E. G. Ex-Gov, Robert W. Furnas, famous the country over as a horticulturalist is dangerously ill at the Lindell hotel Dr. R. E. Giffen, who has been treating him, says there is little chance of his recovery because of his age. Members of his family were sent for last night and were expected today.

The ex-governor, secretary of the state horticultural society, has been for twenty years afflicted with diabetes. For a week he has undergone treatment at St. Elizabeth's hospital. Res turning to his home in Brownville somewhat improved in the last two days be suffered a relapse.

Last night he came back to Lincoln to be under the care of his physician. He went to the Lindell hotel and there will remain, it was said this morning, unless there comes an improvement that will permit his removal to the hospital or his home. He was not taken to the hospital last night or this morning because it was considered that farther unrest would be prejudicial to his health.

The ex-governor is 83 years of age. He has maintained apparent good destroyer having succeeded in reaching health and strength for years, such as to warrant his repeated re-election to to the secretary of the state board of agriculture. After valiant services as the colonel of a regiment in the civil war, tireless aid in establishing the commonwealth of Nebraska he achieve ed national fame in horticulture. From the earliest territorial days he has been a powerful factor in the ups building of agriculture in Nebraska, through many vicissitudes. He was at the foundation of state fairs in territorial days and has continued unremittingly in the promotion of these annual displays of the state's resources always with foremost recognition on the board of agriculture.

Out in northwestern Nebraska there! Agricultural high schools, such as the sand hill region, and it was for the special "benefit" of this section that the so-called Kinkaid law was passed by Congress-a law which permits the entryman to take up 640 acres of government land. Ostensibly the law was enacted to encourage settlement and developement of this desolate country but so far its operation has worked mainly to enable landgrabbers to acquire large tracts of government land for grazing or speculative purposes, more easily and more extensives ly than before the law went into effect.

that thousands of acres of this same sand hill region of Nebraska are now being planted to forests by the National government. The forestry department has this spring had some 100,000 jack pine seedlings in Minnesota dug up and shipped to Nebraska for transplanting on the sand hills of that state, hoping thereby to reclaim from the desert thousands of acres. Speaking of this work of the government, a representative of the Forestry Bureau of the Department of Agriculture, under whose direction the work is being done, said:

"It is a settled fact that the forests will induce moisture. The pine is a native of a sandy soil, and we are sure it will grow and flourish there The pines which we are sending to Nebrasa ka are set out on what is known as the government experiment reserve near Thedford. The pines are set out in rows, in order that they may be cared

It has been fully demonstrated that the pines will grow in those sand hills and as the trees grow up the needles will fall off and make a mulch. In this way a bed of soil will be formed, which will hold water after a while, and cause springs and streams to appear.

It is expected that the work which the government is doing will encourage the settlers in that region to take up the work of planting pine trees on their land. Some of the farmers have already done so. The Burlington rails road, which runs through that section. is encouraging the work, and well it may, for it has much to gain by the development of the county.

If this forest planting by the governs ment proves successful, as undoubtedly it will, the people of Nebraska will soon realize that the Kinkaid law will be a great detriment to the settlement and development of that State. The people of other western States should see to it that all attempts to pass "square mile" homestead laws to apply to other sections of the arid or semi-arid West be promptly and effectively defeated -Maxwell's Talisman.
