A Weak Digestion

Strange as it may seem, is caused from a lack of that which is never exactly digested—fat. The greatest fact in connection with

Scott's Emulsion

appears at this point—it is partly digested fat—and the most weakened digestion is quickly strengthened by it.

The only possible help in Consumption is the arrest of waste and renewal of new, healthy tissue. Scott's Emulsion has done wonders in Consumption just this way.

After 25 Years Cured by S. S. S.

After 25 years ago I was afflicted with a disease which the doctors pronounced SCROFULA. I was treated by several physicians and specialists without being benefited...

BRIGANDS IN GREECE.

The Authorities seem powerless and the Whole Country is Alarmed. Public attention in Greece has of late been directed toward the marked increase of criminality, so bold that it defies legislation and fills the inhabitants with alarm.

The most daring of these malefactors are those less sought for or suspected by the police. These having passed beyond brigandage, extort from peasant or townsman according to opportunity. Moreover, encouraged by the immunity they have enjoyed, they have had the hardihood to enter villages, small towns and even the larger cities.

Brigands and their exploits still possess a mysterious fascination for the people, and especially the inhabitants of the cantons of continental Greece, furnishing a reminiscence of the rude wars of history preceding the great revolution. In many places no opprobrium is attached to the word brigand.

An attempt was made to suppress brigandage in 1870, which resulted most disastrously. Troops were ordered to trace these criminals to their haunts. At that time the parents of a certain captive endeavored through every means to circumvent the authorities pending negotiations for his release.

Men and women who went to school thirty years ago find it difficult to rid themselves of a false impression gained through the eye from the maps in the school geographies those days. The South and West being then of less importance relatively to the New England states than now were represented upon maps of smaller scale, so that despite the story of the statistics Southern and Western states seemed small in area and the states of the Northeast relatively large.

For twenty years the Swiss government has been making observations through its forestry stations on the temperature of the air, of the trees and the soil in the forests. These observations show that the temperature in the forests is always below the temperature outside. The temperature also varies according to the trees composing the forests.

Some Book Learning. Lady—Have you any Turkish towels? New Boy—Turkish towels? "Yes. Haven't you ever heard of Turkish towels?" "I've read a good deal about Turks, ma'am, but I never knew they used towels."

Room for a Few More. Statisticians claim that the earth will not support to exceed 5,994,000,000 people. The present population is estimated at 1,467,000,000, the increase being eight per cent each decade. At that rate the utmost limit will be reached in the year 2072.

Took Her Nap Standing Up.

Janitor Eastman of the new school-house in Perryville, Maine, says that while the pupils were at play in the yard the other day he looked out of the window and saw a number of them gathered around a little girl. Their actions indicated alarm, and he went out to see what the trouble was.

The Complexion of a Chinese is not yellower than that of an unfortunate individual who a liver complaint has assumed the chronic form. The eye balls of the sufferer assume a saffron hue, the eyes dull pain in the region of the organ affected, the tongue is coated, breath sour, sick headaches usually but not always occur, and there is sometimes dizziness arising from a sitting posture.

The Locomotive Whistle. When locomotives were first built and began to trundle their small loads up and down the newly and rudely constructed railways of England the country roads were for the most part crossed at grade, and the engine driver had no way of giving warning of his approach except by blowing a tin horn.

Every one gives it the highest praise. H. Gradel, Druggist, Walnut and Allison Sts., Cincinnati, O., says of his trade: "I sell my share of Dr. Bull's Cough Syrup and my customers that have used this preparation speak of it in the highest terms."

Don't Polish Your Nails. If you want to be quite up to date don't polish your finger nails any more. It isn't considered good style to have them shine as though they had just been dipped in the butter.

Breathing Upon Bees. There is a difference between blowing and breathing on the bees. To breathe on them in the way you would on a light of glass you were polishing would instantly result in your getting one of the most sudden and smarting lessons you could think of, but if you form your lips as though you wanted to concentrate your breath on the smallest possible point, and blow with vigor, as though you were trying to cool a cup of tea or coffee, you will find it to have quite a different effect, and to exert a soothing influence over the few bees you direct the stream of air against.

Two Famous Etchings. The Passenger Department of the New York Central has just issued a series of five beautiful etchings, which artistically outrank anything of the kind ever issued by a railroad company.

A Mexican Kitchen.

A Mexican kitchen contains no cooking stove nor even a fireplace. Instead, on one side of the room a shelf is built into the wall about breast high, on the center of which a small fire burns built of gnarled and knotty sticks, which thrifty American housewives would consider unfit for use.

Tortillas are the staff of life in Mexico, and consist simply of crushed corn which has been previously boiled in a weak lye, rolled into balls. Dishwashing in a Mexican kitchen is conducted on a novel plan. There is no soap, no dishcloth and no wiping towel, much less a table provided with a dishpan and draining rack.

Can't be beaten! Mr. J. G. Wittig, Blue Mound, Ill., writes: "I have used Salvation Oil with wonderful success for inflammatory rheumatism in my foot. It cannot be beat."

A Scotch preacher who found his congregation going to sleep one Sunday before he had fairly begun, suddenly stopped and exclaimed: "Brethren, it is nae fair. Wait till I get a start, and then if I am nae worth listening to gang to sleep; but dinna nod your paws before I get commenced. Gi'e a mon a chance."

Every one gives it the highest praise. H. Gradel, Druggist, Walnut and Allison Sts., Cincinnati, O., says of his trade: "I sell my share of Dr. Bull's Cough Syrup and my customers that have used this preparation speak of it in the highest terms."

Weed Pest of the Northwest. The worst weed ever introduced into the wheatfields of America is reported from the northwest. The thistle resembles the tumbledweed in appearance, but may be readily distinguished from it by the sharp spines in clusters of three each, the absence of flat leaves, denser growth, dark color, and by the red color in the fall.
