Lack of Interest.

A Yankee with some gift for bragging as well as for getting out of a corner was talking to an Englishman. "We can lick you right amart," he said. "We've allus done it, and can do it again. At Lexington, Concord, Saratoga, Bunker Hill an lots of those places we jest gave you fita."

"Yes," said the Englishman, "I do remdmber those places, but then there was the battle of White Plains. We rather beat you there."

"Well, you did," admitted the Yankee. "I forgotallabout that, I shouldn't have thought of it if you hadn't 'a' spoke of it. But then, you see, at that battle the Americans somehow didn't seem to take any interest in the fight."

REPUBLICAN MATTERS.

A GENERAL PARALYSIS.

Susiness Is Just as Stagnant in the West as in the East.

The industrial paralysis is by no means confined to the Eastern manufacturing centers, as some of the Western free trade papers would make their readers believe. It is a condition that is general throughout the country. The wool and iron industries are commonly cited in arguments made to show the disastrous effects of the promised Democratic legislation because they belong to the more highly protected class, and because the number of wage earners affected is greater than

The \$77,000,000 that was paid out in wages in the wool industry in one year under the protection of the Mc-Kinley law means a great deal to the whole country, even though the mills are mostly located in the At-lantic states, but scattered all over the West are manufactories which feel the effects of the free trade threat just as sensibly.

An order went from a Kansas City house to an Ohio pump factory recently for a few pumps. Eighteen months ago an order could have been sent by wire and within twenty-four hours a carload would have been on its way here. It is not so now. To the order referred to, reply was sent that the pumps would have to be manufactured before shipment could be made. This means that in the present condition of trade the manufacturers are compelled to proceed on safe ground and that they are not manufacturing ahead of orders.

A reputable Kansas Cityan .as just returned from a business trip that took him through the manufacturing sections of Indiana and Ohio, where gas is used for fuel and the cost of power is reduced to the minimum. He informs the Kansas City Journal that stagnation exists everywhere and that the people are almost dumb with dismay.

Does anybody think it possible that the people are in doubt as to the cause of all this?

Will anybody not blinded by political prejudice say that relief can be had by opening our doors to the

competition of foreign manufacturers? It is a great, big, unquestionable fact that the industries of America, from Maine to California, are paralyzed, and that the condition is due to the un-American policies of the Democratic party.

A member of the Michigan club composed a song which was sung at the club's recent annual banquet. Here is the song which was sung to the tune of "The Bowery:"

Private John Allen, of Mississippi, is in a sad state. He feels himself absolutely affoat in darkness, without a single star to guide him. He tells the Washington Post that he came to congress with absolute reliance on three things as Democratic: 1. That the Democratic party was

"This bothered me, but I held on to the other two. Recently we voted to put a colored woman over American white men in Hawaii. That kept me awake all that night; but I said. 'I can cling to that principle about Reed. He certainly was a tyrant without a redeeming trait. A National Boss.

We now have a national boss. Any further pretense by him of a lofty virtue and of contempt for political trading would be as absurd as was Sir John Falstaff's claim to valor after he had made dents in his own sword and shown to Prince Hal as proofs of his fearful combat with the ten men in buckram. He has shown all the qualities necessary in a first class political boss. His sign is cut: "Offices Traded for Influence With Congress." Cheap Votes.

The New York legislature has been petitioned to enact such laws as will break up the white slavery as it exists in the metropolis known as the padrone system. Under this system imported Italians are made to work for the importers for seventy-five cents a day, while the importer receives from the city \$1.50, he himself pocketing the extra seventy-five cents, and at the same time making the slaves vote the Democratic

Right Kind of Free Trade.

The kind of free trade which the United States wants is free trade with Mexico and Canada. Between us and those countries the customhouses should be removed altogether, but against the rest of the world the barriers should be kept up. When the Republicans get into power again a movement for commercial union between us and our neighbor to the southwest and our other neighbor to the north must be started.

Cheeky Claimants.

The Chicago Herald says that Lincoln was the greatest Democrat of the last century. These Democratic papers are modest. Having had no leaders in the last part of the century worth bragging about, they propose to steal the good names which have made the Republican party illustrious. They will put Mc-Kinley and Tom Reed on their roll of fame after awhile.

Look on This, Then on That.

During the Harrison administra-tion the deposits in the savings banks of New York increased every year, and in the year ending January 1, 1893, the increase was \$40.-932,853. On January 1, 1894, the Cleveland administration had been in power nine months, and during the year then ending the deposits had decreased \$12,268,824.

Sizing Up Hill.

Hill of New York is a beastly sort of fellow; smart, but ugly, vulgar, coarse, vindictive. We don't much care how roughly he has brow-beaten and bully-ragged Cleveland, for it needed that sort of deal to knock the conceit out of the president. But Hill is likely to offend the country more and more as he is indulged by his party. -St. Louis Star-Sayings.

In January I stopped over in his town one day and went to his house to see him. Going up the lawn I noticed one of the last, specimens of terms and the rest. Going up the lawn I noticed one of the best specimens of terra cotta work I ever saw. It was a dog standing near the front door, and it was so natural I almost spoke to him as I went inside. After awhile I spoke to my friend about the specimen.

"That's the finest terra cotta dog you've got out there I ever saw, said I.

"What terra cotta dog?" said he, going to the window, from where I pointed out the dog to him.

In all diseases of the nasal mucuous membrane the remedy used must be non-irritating. Nothing satisfactory can be accomplished with douches, snuffs or powders, because they are all irritating, do not reach the affected surfaces and should be abandoned as failures.
