DEBS AGAIN HEARD.

HE DOES NOT FAVOR COMPUL-SORY ARBITRATION.

WOULD NOT PROVE SATISFACTORY.

The American Railway Union President Recalled by the Arbitration Commission-President Compers of the American Federation of Labor Gives His Views of the Labor Movement.

CHICAGO, Aug. 27 .- President Debs of the American Railway Union was recalled to-day by the strike commission. He stated that he did not favor compulsory arbitration in settlement of labor troubles. He did not believe that such a method would prove universally satisfactory. Asked if he knew of any dissatisfaction among the Rock Island employes previous to the strike, he said that there had been trouble among the telegraphers of the road and there was much dissatisfaction. The statement that there were not more than 200 American Railway Union men on the Rock Island was absurd. The fact that the road was completely tied up effectually disproves such a story.

Samuel Gompers, president of the

American Federation of Labor was the next witness. He prefaced his testimony by a brief outline of the aims and principles of the federation and gave figures showing the mem-bers of the organization. He told of the calling of the conference of the heads of the labor organizations at the Briggs house here and said that after long deliberation the delegates decided to request President Cleveland to attempt to settle the strike.
"We thought," he declared, "that
if Mr. Gladstone could do so much good service in the Eng-lish coal strikes such an attempt could not be beneath the dignity of the president of the United States. Accordingly a telegram was sent to Mr. Cleveland asking his aid. To that message he did not deign to reply. In fact, he took not the slightest notice of it. Mr. Debs was then called upon and gave a history of the boycott, the Pullman trouble and the railroad strike. We considered the matter carefully, and finally decided that we could not order a general strike. That it would be a usurpation of power and would for many reasons be unwise. The delegates expressed their sympathy with the movement

and soon afterwards we adjourned."
Mr. Gompers explained that to effect a general strike all the unions participating must agree and said it would have been impossible for the Briggs house conference to have de-clared a general sympathetic strike. Asked for his opinions as to methods for preventing strikes, he said: "I do not condemn strikes as heartily as do some men. I believe that so long as present conditions exist they are necssary and I believe that all strikes do good in calling attention to the fact that laboring men will not be driven further down into poverty. I think the action of the strikers in paralyzing the railroads of the country was justifiable."

Gompers was frankly uncomplimentary in his opinions regarding the strike commission. "I think this thing is rather late in the day," he said. "This examination by the com-missioners is rather in the nature of an inquest on a dead body. I don't anticipate great good from the pres-ent investigation."
