PLUNGED ON WHEAT.

An Unknown California Magnate Stands to Lose a Full Million Dollars.

SAN FRANCISCO, Sept. 17.—Somebody stands to lose a million dollars on wheat, and San Francisco grain men are wondering who it is. For months L. F. McGlaughlin bought wheat for some unknown speculator until he had accumulated between 175,000 and 200,-000 tons for which he paid an average price of \$1.20 per cental. At present prices he cannot realize within thirtyfive cents of as much as he paid per cental for this immense quantity of wheat. It is said by grain dealers here that ex-Senator James G. Fair is the only man on the coast who has enough ready money to back Mc-Glaughlin in such a big deal and it looks as if he had made an error in his calculations that will involve the loss of \$1,000,000. When McGlaughlin began to buy last winter wheat was never before so low. Under the stimulus of big purchases the price went up but it soon fell and wheat is now lower than ever. It is calculated that there are at present between 800, 000 and 900,000 tons of wheat in that a market must be found for. All this wheat must be shipped out the country and ship owners are holding back for high charters.

UNCLE SAM'S FINANCES.

Internal Revenue Receipts Very Small and Customs Returns Only Moderate.

WASHINGTON, Sept. 17 .- The revenues of the government have fallen almost \$13,000,000 during the first fourteen days of this month as compared with the last half of August. The receipts from customs for the first fourteen days of this month amounted to \$9,227,000 (in round numbers) against \$6,730,000 for the last half of August, while the receipts from internal revenue were but \$2,292,000, compared with \$20,634,000 for the latter half of August. The loss is due to the enormous sums paid on whisky withdrawn for consumption just before the new tariff act increasing the tax from ninety cents to \$1.10 per gallon went into effect. The receipts from internal revenue for the first fourteen days of the month dwindled to \$2,927,000-about \$450,000 below the normal and were not counterbalanced by an increase in the receipts from customs due to heavy importations under the reduced rates immediately following the enactment of the new law, the custom receipts increasing only about \$3,000,-000. The receipts from internal revenue are now confined almost en-tirely to the tax paid on beer, cigars, cigarettes and tobacco, and average about \$250,000 per day, while for July and August, when so much whisky was being withdrawn, they averaged over \$1,000,000 daily. It is not expected the receipts from

the tax on alcoholic spirits will reach normal again before January 1, 1895. This will have the effect, it is believed, of keeping the receipls of the treasury down to about two-thirds of the normal, or in other words to about \$22,000,000 per month until Jan-uary 1. This estimate leaves out of account any large increase in the importations arising from the operations of the new tariff law. The expendi-tures have averaged about \$34,000,000, but without the sugar bounty, which is now a thing of the past, they will be reduced to about \$31,000,000. For the next four months it is estimated that the receipts will be about \$88,-000,000 and the expenditures about

SENATOR HILL TALKS

HE MAKES AN ADDRESS AT A COUNTY FAIR.

Ten Thousand People Listeu to His Utterances-He Tells Them That the New Fangled Political Heresies Are Bad-Declares That the Income Tax Is the Greatest Danger in Our Government-Impartial Tariff Laws Must Be Passed.

SOMERVILLE, N. J., Sept. 15 .- Ten thousand people from all parts of the state attended the Somerville fair yesterday-the great majority drawn to see and hear Senator David B. Hill and other notables. Mr. Hill made an address in which he said:

'To-day I plead for general legislation, which, rejecting the claims of the classes, recognizes no distinction of class, which embraces all occupations, harmonizes conflicting demands, condemns political and business selfishness, and exalts the use of pure, genuine and sunadulterated patriotism. It is true good laws may aid us and bad laws retard us in the great struggle of life. Still the fact should be impressed on every one that good, bad or indifferent laws do not of themselves alone ordinarily make men rich or poor, good or bad, vicious or virtuous, but that much, if not almost everything essential, de-pends on individual efforts and ten-dencies, tastes and inclinations. "New fangled political heresies

teach the government should own and control everything used by man. The railroads, the banks, the telegraphs and many other of the manifold in-dustries and enterprises now conduc-ted by individual effort and capital should all come under this plan. I shall concede that it is wise and best the government should regulate all semi-public enterprises and institu-tions, but it should not own nor control them in the sense in which the teachers of these fallacies claim. Such a condition would be fatal to our government. To bring about these things would be the most fatal of mistakes. It would be unwise to add to the official patronage of a national administration, especially as that patronage is not always wisely dispensed, nor would it be wise to in-

crease the channels of expense.

"If real estate is to be taxed all such property should be taxed alike. If incomes were to be taxed there should be no distinctions as to the amount. Small incomes should pay in proportion as well as in proportion as well as the large ones. There should be no discriminaones. There should be no discrimina-tion. Such things are dangerous. They engender classes. This is the greatest danger of the government. If the rich had to pay the taxes you may rest assured it would not be long before they would want to control the government. When that time comes, as I hope it never will, the mistakes of the past will be seen. Tariff laws must be passed which will show no favorition to any one. There must be no favored few. The laws should be made for all."

CENSUS WORK ABOUT DONE. Only One Division Not Yet Up-Years of Printing to Come.

WASHINGTON, Sept. 15 .- The work of the eleventh census is about completed, the work on population and vital statistics being all that remains to be done. The portion of the work on population remaining uncompleted is that on occupations. The vital the figures on population and have been held back largely on account of the work in the population division. Chief Clerk Down thinks that in less than five months the work from of the census will be completely closed and the present force of 400 employes reduced to forty or fifty at the outside. These will be experts who will have charge of the proofs from the printing office. An additional supplement to the compendium of the census is yet to be issued.

But while the census work proper will thus be finished in a few months, it may be several years before the work of printing is all done and the completed work published. The completion of the work at so early a is unusual, and to Superintendent Wright's skill and experience in handling statistics this is largely attributed.
