SEVERAL weeks ago the deer in J. P. Latta's park at Tekamah suddenly died. It was thought at first they were poisoned, but Dr. Schaefer, a veterinary surgeon, after examining the bodies gave it as his opinion that the cause of their death was anthrax. So interested was he that he took some blood from one of the animals and sent it to Dr. Billings of Chicago for examination. Dr. Billings pronounced it anthrax and states that it is a very dangerous disease, and that the burial place of the deer should be securely fenced and pro-tected for years, as the ground about the bodies will be full of germs of an-thrax, which can be carried to the surface by earthworms. Dr. Schaefer says it is the first case he has ever known in Nebraska.

JAPANESE WIN ANOTHER BIG

THE VICTORY AN IMPORTANT ONE.

Marshal Oyama's Orders Obeyed to the Letter and Seventeen Thousand Chinese Surrounded and Forced to Surrender-The Japs Have Now a Clear Road to Moukden, the Ancient Capital.

LONDON, Oct. 29. -Still another victory, almost as decisive as that of Ping Yang, has been placed to the credit of the Japanese army advancing into China from Corea, and one more obstacle to the capture of Moukden, the ancient capital of China and the treasure city of the Manchurian dynasty has been overcome.

This latest victory has carried dismay into the ranks of the Chinese soldiery in the many forts between the Yalu river and Moukden, and there is now every reason to believe that the Japanese will successfully carry out their undertaking of cap-turing the old town before November turing the old town before November 3, the birthday of the mikado, and thus securing countless millions of money which has for years been stored in that place.

The latest victory was the capture of Kiuren Castle, which was defended by over 17,000 picked Chinese, with several Krupp field guns. The orders of Marshal Oyama were carried out to

After an artilery duel, Marshal Oyama gave the signal for a general assault and the Japanese advanced simultaneously from all sides. The Chinese resisted desperately and the fighting was very severe, but the Japanese were not to be withstood, and finally the Chinese fied. Two hundred Chinese were killed, hundreds wounded and several thousand captured. The Japanese secured a

large quantity of provisions and much ammunition.

BICYCLISTS HAVE RIGHTS. Not Responsible if Horses Are Fright-

ened by Their Wheels. Sr. PAUL, Minn., Oct. 29.-The su-

preme court of Minnesota has rendered a decision of decided interest to bicyclists all over the country.

A few months ago, N. A. Thompson was driving along a Minnesota county road and met W. M. Dodge on a bicycle. Thompson's horse saw the bicycle, ran away, smashed the buggy to splinters and injured Mr. Thomp-son. The latter brought suit for heavy damages, but the supreme court decided in favor of the

clist. Judge Buck says in his decision: "Bicycles are vehicles used very extensively for convenience, recreation, pleasure and business, and the riding of them upon the public highway in the ordinary manner, as is now done, is neither unlawful nor prohibited, and they cannot be banished because they are not ancient vehicles and were not used in the Garden of Eden by Adam and Eve."

Washington, Oct. 29. -- Captain Henry W. Howgate, ex-chief of the signal service, who stole \$105,000 in 1880 and fled from justice in 1881 and was only recently rearrested, in the criminal court of the District of Columbia to-day, through his attorney withdrew his plea of not guilty to all the indictments entered against him in October, 1881, and entered a demurer to each of them. There are seven indictments for em-bezzlement and four for forgery.

To the embezzlement indictments the demurrers were that the facts averred in the indictment constituted no offense under the laws in force in the District of Columbia prior to the filing of the indictment; that they did not state any offense of which the court had jurisdiction and were too general and uncertain. The forgery indictment demurrers were much of the same import, without definiteness being alleged.

John Bruce Ford, who was formerly engaged in the publishing business in New York, has died at his home in Brooklyn, aged 79. He published the works of Henry Ward Beecher, Mrs. Stowe and William Cullen Bryant. THE CZAR'S CONDITION.

Conflicting Reports in Regard to His Physical Situation.

London, Oct. 25 .- To-day's reports in regard to the condition of the czar of Russia are far more conflicting than those of any previous day. The official bulletin made public in

St. Petersburg as 10 o'clock this morning which was signed by the five physicians in attendance on the czar read: "The czar slept a few hours last night. This morning he is

not drowsy and has some appetite."
From Berlin comes the report that a leading Russian court official has received the following dispatch from Livadia: "It is not expected that the death of the czar will occur within the next forty-eight hours and it is probable that his majesty's life will

be prolonged for a much longer time."
Further, the St. Petersburg correspondent of the Paris Gaulois telegraphs that he has the authority of a member of the czar's suite for stating that the reported shrinking of the sufferer's kidneys is not so serious as reported and that his majesty's physicians have every reason to hope for a permanent improvement of the pa-tient's condition.

Against these somewhat favorable

reports are following from Paris: "A dispatch received here from Livadia by a government official says that the death of the czar is expected in a few hours. There is growing anxiety in French government circles." A dis-French government circles." A dispatch to the Figaro from Odessa, dated 11:30 o'clock last night, said that the czar's end was imminent in the near future, and added that drowsiness had already set in. An imperial decree was published

at St. Petersburg to-day, declaring Grand Duke Michael, third son of the czar, the heir to the throne in succes sion to his brother, Grand Duke Nicholas, the czarowitz, and present heir apparent. The Grand Duke George, the second son, has renounced his rights of ascension, in view of the fact that his condition is considered hopeless.

A medical correspondent telegraphed from Livadia that the czar had been much relieved by the puncture of his legs, which was reducing the oedema. The correspondent added that preparations were making for the operation of thoracentesis, in order to relieve the effusion into the thoracic cavity, which will doubtless relieve the distressed breathing of the patient and lower the action of his heart. Oxygen inflations, it is stated, have already strengthened the action of the heart, and the czar has enjoyed many hours of full consciousness. But, says this correspondent in conclusion, there is little or no improvement in his malady.

TRADE WITH MEXICO.

The Effect of the New Tariff Bill Causes Large Mexican Exportation.

WASHINGTON, Oct. 25.-In a report to the department of state, United States Consul Gormann at Matamoras. says the effect of the new American tariff is being felt in increased trade with Northern Mexico. Large ex-portations of dressed hides, mules, to the usual exports hereto-fore made and the prospects for a large spring business are most cheering. Under the operation of the McKinley act all live stock ceased to be exported the twiff on beauty and be exported, the tariff on horses and being \$30 each, from two to three times the selling value of the animals in Mexico. This amounted to a total prohibition, and until September 1 not a live animal of any kind had been exported. Large ex-portations of dressed hides and ther show another new feature that shares the benefit of the Wilson
