LABOR UNIONS.

FREE TRADERS HAVE NO USE FOR SUCH INSTITUTIONS.

Regard Them as "Dangerous" to Cheap Labor and Monopoly Ideas-Approv Free Imports of Foreign Prison Made

We reproduce elsewhere a report of the last general annual meeting of the members of the Cobden club, which was held in London Aug. 17. Lord Farrer seems to have been spokesman of the day and he noted with satisfaction an 1887 there was a falling off of nearly colonies and the United States. At the tween 1882 and 1893 a decrease of 642 in same time, however, Lord Farrer found the number working. The production it necessary to "strongly advise all freetraders to keep a careful watch upon point, 718,200 tons, in 1883, and fell to Lord Salisbury's doings," as he "wished to have protective duties upon foreign said that the policy of free-trade in the manufactures in order the better to United Kingdom has been beneficial to fight the foreign tariffs."

We are not surprised to find Lord Moreover, it is never likely to be. Farrer regarding trade unions as "dangerous," because they always must be in free-trade countries where the sole desire of the manufacturers is to depress the value of labor and make men, the eggs purchased in this country an-

erature in this country. We are very have unwittingly aided their enemy.

Iron Trade and Free Trade.

Some interesting statistics are furnished by Ryland's Iron Trade Circular, published at Birmingham, of Aug. 24. They give the condition of the iron industry at South Staffordshire, England, under free-trade. The result hardly shows conditions that would justify the enforcement of such a policy in the United States, that is with the idea of benefiting the American iron industry.

The construction of new furnaces stopped in 1878, and the number of furnaces in blast in South Staffordshire decreased from 108 in 1871 down to 18 in March, 1895, and 19 last June. With the reduction in the number of furnaces in blast the output per furnace per annum increased from 6,720 tons in 1871 to 14,360 tons in 1894. The total cutput of the furnaces, however, fell off from 725,716 tons in 1871 down to considerably less than half-315,924 tons in 1894.

The history of the puddling furnaces is somewhat similar. Between 1871 and oach to free-trade in the Australian 1,000 in the number erected, and beof puddled fron reached its highest 389,013 tons in 1894. It can hardly be the iron industry of South Staffordshire.

Egg and Poultry Values.

tionists for funds to aid them in the that have few or no factories, than in dissemination of their destructive lit- the industrial centers of the East. The resolute, energetic pioneers who are corry to say that many protectionists building up states such as Montana, Tormented Woman Through Her Child. the Dakotas and Washington, regard the establishment of new industries as the only sound basis of prosperity. Such men study practically the growth of commonwealths, and become, as the result, active, zealous protectionists.

> Protection Increases Exports Protectionists desire earnestly an expansion of our export trade.

they are entitled. This country ought, in large quantities instead of buying it export trade by opening the gates to foreign products of all kinds do not know how American manufactures have with difficulty acquired a footing abroad and retained it. Protection enabled them to do it.

ceipts within \$50,000.

rather hear of "banner days" at American factories, on which more goods would be made and more wages paid than ever before. There is something absurd in this boasting of the influx of foreign goods at a time when many worthy people are out of work and many more are working for low wages.

The McKinley bill can stand the implied sneer in the above paragraph. It did not destroy foreign commerce as its opponents held it would, but it held in check foreign imports that competed with home industries. It was not framed to create a "banner day" at the custom house.

When Free Imports Were Largest. From the last report of the Bureau of Statistics we are enabled to present a summary of our imports during the last

TWO MOTHERS.

Bereavement Brings Truth Home to a

When the well-to-do boarder's little boy died she called in the woman who swept and scrubbed halls, attended to the furnace and did scullery work in general about the place and showed her the little fellow as he lay in his flower-decked coffin, so sweet and pretty in his last peaceful sleep.

The scrubwoman had a boy of her own just a few days younger than the dead child, and when the well-to-do boarder's message came she hastily grabbed up her baby and took him in

The two women stood over the thay casket for a time in silence. At last the mother's self control gave way and she bowed her head over the body and bathed the little cold face with the tears that blinded her aching eyes and scalded her thin, care-worn cheeks.

The scrubwoman sat her baby on the floor and folded her arms stoically.

"Don't, ma'am," she said without a quaver in her coarse, strong voice. You ought to give thanks with all your soul. I wish to God it was my boy lying there instead of yours."

The boarder laid her hand over the woman's mouth and interrupted the impassioned speech.

"Don't say that," she cried. "You don't realize the meaning of your words. It might come true. Your boy might die."

The scrubwoman smiled.

"There's no such good luck as that," she said bitterly. "It's always such as yours that goes and such as mine that stays. He's never been well, and he never will be well. He's a torment to himself and to me, and to everybody about the place. It's a continual scratching to keep body and soul together, and if I should die what would become of him then? It ain't that I'm annaturally hard-hearted, but pinching and scraping along makes brutes of anybody. Anyway, he'd be better

"You'll be sorry some day," the other replied, turning again to her little one. The boarder moved away, and it was three years before the women met again. A few days ago the well-to-do woman was going through a locality the ins and out of which had not been familiar to her for many months, and among the scrubwomen on the steps of a large building she saw her former charwoman of the boarding house.

"How is Freddy," she asked, the first greeting over.

The woman's lips trembled.
"Freddy's dead," she said, puttting down her brush and drying her eyes on the corner of her apron. The boarder grasped her hand in

ready sympathy. "I'm so sorry," she said simply. "It just happened last week," the

HOW SNAKE EATS FROG.

As Soon as Serpent Has Captured Hind Legs, Good-by Frog.

telling. The writer distinctly remembers witnessing a dramatic meal of this kind, in which, of course, the snake came out the winner, getting his dinner in excellent style and completely vanishing the frog. Though a snake may seem at first sight an organism that is extraordinarily slow of comprehension, any well regulated ophidian knows, nevertheless, exactly how to satisfy the wants of nature in the most approved manner. A snake invariably grabs a frog by the hind legs. This preliminary struggle is one of the most impressive features of the combat. With a well-defined natural instinct the chief effort of the frog is to keep his other hind leg far away from the snake's mouth, in the hope that he may speedily exhaust his enemy's strength, and also because he feels that if his other hind leg is made captive he will have less power to fight. Once both hind legs are within the serpent's fangs the act of swallowing begins. Inch by inch the struggling frog is drawn further and further into the yawning orifice that expands at each gulp. The channel through which to arise in the near future through the the frog has to pass is gradually en- growing importance of China and Jathe frog has to pass is gradually en-larged by slow efforts on the snake's pan and the approaching absorption of ull the unclaimed islands of the sea by part, accompanied by flercer and flercer convulsions of the wretched wiggler. The gullet of the snake in its natural proportions is quite large enough to contain the limbs of the frog, but as by frequent gulps the body is drawn further and further into the gullet the difficulty of swallowing increases. Gradually the ophidian's throat is dislended, gradually the frog is compressed and drawn out. Finally the latter is double his normal length and half his circumference. As the process of expansion on the one hand and contraction on the other goes on, the frog is worked down little by little, until he it regularly. starts in on his afternoon nap.

How He Judged Character. "So you want a situation?" said the business man.

"Yes, sir," replied the applicant.

"Hum-do you ever go fishing?" "Occasionally." "When were you fishing last?"

Shells for Wall Pockets.

"I have often wondered," said a fisherman, "that somebody didn't fix up a lot of horseshoe crab shells and put them on the market as wall pockets. They are commonly used for that purpose in fishermens' houses for catchalls and for slipper holders, and very pretty they are. too. The horseshoe crab is in two parts, joined by a hinge across the back about two-thirds of the way from the front. In making a wall pocket the rear part of the shell is cut away; that leaves the top of the shell as it hangs, crescent-shaped. A hole is bored in each part of the crescent for the ends of the cord or ribbon that is to support the shell, which is backed with pasteboard. Some dye them with analine dyes, but oftener they simply varnish them, showing the natural color of the shell, which is a dark brown.-New York Sun.

Beware of Ointments for Catarrh That Contain Mercury,

As mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is tenfold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure, be blood and mucous surfaces of the system. In buying Hall's Catarrh Cure, be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Sold by druggists; price, 75c per bottle. Hall's Family Pills, 25c.

Soon Managed It.

A Liverpool merchant recently went to his head clerk and said:

"John, I owe about £10,000, and all I possess is £4,000, which is locked up in the safe. I have been thinking that this is the right time to make an assignment, but what plausible pretext I can give my creditors, I know not You have plenty of brains; think the matter over and let me have your deision in the morning.

The clerk promised to do so. On entering the office the next morn-

ng the merchant found the safe open, the money gone, and in its place a let-ter which read as follows:

"I have taken the £4,000 and have gone to South America. It is the best excuse you can give your creditors."-London Tid-Bits.

Inc. 156,206,502 3,581,858 360,336,066 The increase in the number of fowls was 153 per cent. between 1880 and 1890. and of eggs 79 per cent. Estimating the value of our eggs as being worth twelve 1893 421,856,711 cents a dozen on the farm the year 1894.. .. 275,199,145 through, we would have the egg supply 1895.. .. 368,729,601 of the United States worth \$55,000,000 in 1879, and \$98,000,000 in 1889. This is, period under the threat of free-trade. Taking the farm value of the fowl at 25 cents, we should have \$64,618,039 as the representative value of all American hens. Adding this to the \$98,000,000 for ergs, we get \$162,618,039 as the value of the fowl crop of the United States. This is 150 per cent. greater than the value of all American sheep this year, and \$62,000,000 greater than their value in 1890. Our imports of eggs have largely increased under the Gorman tariff, hence the value of the American hen

may now be lower.

A Side Issure Shelved. The outlook is becoming clearer. The attempts made to concentrate public attention on the currency question have failed signally. It would have gratified free-traders to have sown strife among the protectionists by creating new issues. Such strife might have undoubtedly weakened the protectionist cause and enabled free-traders to accomplish their aims stealthily. But the patriotism and intelligence of the people have saved them from any such misfortune. Protectionists are earnest, active and united. They are strong in numbers and are gaining in strength all the time. They are refraining wisely from disputes over details and holding firmly to the broad principles on which protection to home industry is founded.

Why the West Grows.

Protectionist sentiment continues their publications, as 'a ques-gards' prevents them." The the criefs here, but "the the criefs here, but "the and more. Why? Because the value whose dishused in the protection of manufactures are better and benefit of manufactures are better they have do an an understood among places a century.

policy is to establish firmly home industries and let American ingenuity and enterprise do the rest. Thus, the manufacture of watches at Waltham, Mass., Elgin, Ill., and elsewhere has been followed by the export of American watches to Europe, Mexico, South America and Australia. This export trade is due primarily to the success attained at home under protection. If we did not first make good watches at Waltham and elsewhere we could not have encountered Swiss competition abroad. What is true of the watch industry is true of many others. It would apply to a great many more industries if they had received, in the past years, the encouragement to which for instance, to be exporting tin plate from Great Britain. The flippant writers who clambr for the development of our
