An Excellent Report from Wisconsin

and Minnesota Delegates. The opinion of five delegates from Minnesota and Wisconsin, published by the Edmonton Bulletin over their names is very complimentary to

Northern Alberta. The report says: 'We must say with all sincerity that driving all over the country for six days, we have not found one settler who was not more than pleased with the country and its productions, and will not return to the land he left. We have seen people here from all parts of the states and all doing well. We met a Dakota farmer by the name of McLean, who has informed us that he has raised more grain here in three years than he did in thirteen where he came from, on half as much ground. We have seen a number of others, both men and women, and all speak in the same strain about Alberta. They all look well and contented; even the children are happy. In our drive over the country, in passing the countless school houses we could only see happiness in the faces of the little ones. We noticed them all well dressed equal if not better than the same class of children in the state of Minnesota. The wheat that is raised here is just beautiful, the kernel full and plump and may well be termed golden grain, yielding 30 to 55 bushels to the acre. This statement is not from one farmer but from hundreds who tell the same tale. Oats yield from 70 to 100 bushels to the acre, barley from 40 to 60 bushels and potatoes from 300 to 400 bushels to the acre. We have taken par-ticular notice of the climate in regard to the difference between this country and our own. When we left Ada, Minnesota, we were in the midst of a real Dakota blizzard. When we arrived at Edmonton we found the people on the streets still wearing summer clothing, no mittens on their hands and far less use for them. The country is simply more than we ever dreamed of. The printed matter sent out by the government does not half tell of the grand country in Alberta, open for millions of people to make beautiful homes for themselves. Too much can not be said in praise. It

ton and farmers can secure coal at the mines themselves for 75 cents per load. Before closing we say to you one and all, come to Alberta, where there are homes for millions and a promise for something to lay by for an old age. We are well satisfied with this country and as evidence have each bought a half section of C. P. R. land in township 35, range 21 west of the 4th initial meridian, and will return next spring to reside. Hoping this may be of some benefit to the overburdened farmers of the United

B. & O. New Steel Rails.

The recent purchase of 28,000 tons of 85-pound steel rails by the Baltimore & Ohio Railroad brings the total amount of rail bought since March 1, 1896, up to 115,300 tons, enough to relay 870 miles of track. Of the new rail ordered eight thousand tons is to be laid on the lines west of the Ohio river, and twenty thousand tons is to be used as follows: Forty-four miles on the Philadelphia division, 11 miles on the Second division, 13 miles on the Third division, 30 miles on the Fourth division, 21 miles on the Fifth division, 10 miles on the Connellsville division and 21 miles on the Pittsburg division. Much of the rai? that will be taken up is still good enough to be relaid on branches where traffic is not heavy. The Southwestern division, between Parkersburg and St. Louis, will have forty thousand tons of rail to lay this spring.
