Summer Children Are Tall.

That children tall for their ages are generally born in the summer is a novel theory. As far as boys alone are concerned those who first see light during autumn and winter are not so tall as those born in spring and summer. Those born in November are the shortest, in July the tallest. Averages for girls show that those born in winter and spring have less length of body than those born in summer and autumn. The tallest girls are born in

School Boys Being Demora ized.

-A New York superintendent of schools says: "We have had more cases of corporal punishment to investigate this year than usual. Our boys seem more than ever given to fighting. I think it is due to the way in which most of the newspapers exploit the doings of prize fighters. Not only is a great deal of space devoted to prize fights, but the pugilists and scenes at the ringside are fully illustrated. Now, all this has a bad effect on the boys and is the cause of most of their disorderly acts.

Another Orphan Child.

Another trust has just made its appearance in free trade Great Britain. The London Economist of November 11, 1899, announces the formation of the United Indigo and Chemical company, limited, this being an amalgamation of eight firms which comprise the leading indigo manufacturers of the United Kingdom. It does not appear that the Dingley law is responsible for this British trust, or that the absence of a protective tariff constitutes any serious bar to the formation of trusts.

From Candles to Electricity. Siberia has made the most wonderful leap in progress in the nineteenth century. The people of that country never have seen illuminating gas used. From candles they have jumped into the electric age. The towns are lighted by the arc light and the houses by incandescent lamps. The Siberians understand the handling and care of electric light apparatus so well that accidents are extremely rare. It has been suggested that perhaps their immunity from accidents may be explained by the fact that hey wear heavy rubber overshoes.

Love Letters Received by Murderers-One Man Averages Sixty a Month-Daughter of a Chicago Millionaire Becomes Hypnotized.

Vacher, who was recently sentenced to death in France, has been the recipient of quite a quantity of loving messages from women of all ranks of society, and it is stated that one lady very well known in Parisian fashionable circles has indited several affectionate letters to the felon breathing pity and sympathy for him, though it is hard to understand how so callous a wretch can have excited a vestige of commiseration even in the most kind-hearted, says Tid-Bits. Before the trial a young milliner wrote Vacher to the effect that she would like to become his wife should he be allowed to live, she adding that she would wait patiently for him through out the duration of any sentence of imprisonment which he might under go. The writer of the letter was a

young and gentle girl. Mrs. Maybrick has received innumerable letters of sympathy, and at the time of her trial was deluged with of fers of marriage from all sorts and conditions of men. In her case the offers in question are perhaps not so remarkable, because a very large number of people believe her to be inno-

A monster who had committed a se ries of murders in Chicago was duly sentenced to the extreme penalty of the law, and during the interval between the sentence and the execution he received daily a long letter from a young lady, who proved to be the daughter of a well known millionaire. The letters were most affectionate, and numberless kisses were conveyed to the convict by means of the time-honored "crosses." The prisoner received the communications with cynical con-

America would seem the paradise of wrongdoers so far as love letters can go toward constituting an earthly Eden, for a man on trial for several daring burglaries in the city of at. Louis, Mo., received daily baskets of flowers from an extremely pretty girl. who actually had the temerity to hand the loving tokens to the prisoner in the dock. Nor was this all, for each basket contained in addition to the floral offerings a tiny note of love and encouragement, couched in the most endearing terms.

Women have been known to indite poems to criminals who have enlisted their affections, and the writer is assured that the following verse formed part of a letter addressed by a Bristol lady to a notorious bigamist, who had married several women, spent their money and then callously dethe prisoner in prose the lady dropped into indifferent poetry:

received from the fair sex, many of whom had fallen in love with him while in the dock. He averred that on one occasion he had received no fewer than sixty such communications in a month, one-third of this number coming from the same person.

Value of Cheerfulness. Cheerfulness, says the Northwestern Christian Advocate, can become a habit, and habits sometimes help us over hard places. A cheerful heart seeth cheerful things. A lady and gentleman were in a lumber yard situated by a dirty, foul-smelling river. The lady said: "How good the pine boards smell!" "Pine boards!" exclaimed the gentleman. "Just smell this foul river!" "No, thank you," the lady replied, " I prefer to smell the pine boards." And she was right. If she, or we can carry this principle through our entire living, we shall have the cheerful heart, the cheerful voice, and, cheerful face. There is in some houses an unconscious atmosphere of domestic and social ozone which brightens everybody. Wealth cannot give it, nor can poverty take it away.-Ram's

Envelopes Passe.

Among the ultra fashionables of New York, the mucilaged envelope has succumbed to sealing wax, wafers, and folded paper. This necessitates writing on a big sheet, and it also requires some definess in the folding of the paper. Of course, the manufacturers are always ahead of the styles, and for that reason the daintlest little wafers can be found to match the envelopes-for that is the strictly correct point to be observed about the fad.
