DEERING AT PARIS IN 1900.

The Famous Chicago Harvester Company Received More and Greater Honors than Were Ever Before Accorded an American Exhibitor in the History of Expositions.

'America may well feel proud of the interest which her citizens took in tho Paris Exposition and the elaborate exhibits which were prepared with consummate skill and displayed in a manner not excelled by any other country. Those of Harvesting Machinery in particular were most complete and interesting. The Deering Harvester Company, of Chicago, America's foremost manufacturer of this line of goods, was accorded the position of honor, having contributed more to the advancement of the art of harvesting than any other manufacturer, living or dead, and with a greater array of important inventions to its credit than any other company in the world.

Visitors to the Exposition were prompt to accord the Deering exhibits supreme honors, and it only remained for official mandate to ratify the popular verdict, which was done in a manner as substantial as it was well-merited. Each one of the seven Deering exhibits secured the highest award in its class.

In addition to four high decorations, the Deering Harvester Company received twenty-five awards, or twenty-nine in all, as follows: Decoration of Officer of the Legion of Honor, Decoration of Chevalier of the Legion of Honor, Two Decorations of Officer of Merite Agricole, a Special Certificate of Honor, The Grand Prize, Six Gold Medals, Six Silver Medals and Eleven Bronze Medals, including Deering Collaborator Medals.

The Decoration of the Legion of Honor was instituted by Napoleon Bonaparte when First Consul in 1802, and is only conferred in recognition of distinguished military or civil achievements. It is the highest distinction in the gift of the French Republic.

The Decoration of the Merite Agricole is an honor of but slightly less importance, which is conferred upon those who have contributed greatly to the advancement of agriculture.

An Official Certificate of Honor was accorded the Deering Retrospective Exhibit, which showed the improvements in harvesting machinery during the past century, and excited the highest praise of the French Government Officials who had entrusted to the Deering Harvester Company the preparation of this most important exhibit. By special request this exhibit has been presented to the National Museum of Arts and Sciences at Paris, where it has become a permanent feature of that world-famed institution.

The Deering Twine Exhibit and Corn Harvester Exhibit, both of which received the highest awards, have by request of the French Government been presented to the National Agricultural College of France. There was no field trial, either official or otherwise, in connection with the Paris Exposition, but the most important foreign contest the past season was held under the auspices of the Russian Expert Commission at the Governmental Farm of Tomsk, Siberia, August 14th to 18th. All the leading American and European machines participated and were subjected to the most difficult tests by the Government Agriculturist. The Expert Commission awarded the Deering Harvester Company the Grand Silver Medal of the Minister of Agriculture and Domain, which was the highest award.

COMMISSIONERS TO PAR-AMERICAN

Mutual Hog Insurance Law-Nebraska Oil Inspectorship-Miscellancous Matters Here and There.

LINCOLN, Neb., April 6 .--- The new supreme court commission will probably be divided into three distinct branches, each to consist of three members. Assignment of cases will be made by the court proper, which will remain in full possession of the present supreme court rooms. The commission will occupy a series of ante-rooms on the second floor of the building and some of the oral arguments wil be heard in the senate chamber. It is presumed the three judges will devote their attention almost exclusively to arguments on motions, leaving the preparation of opinions to the commissioners, subject, of course, to the court's approval.

Governor Dietrich was interviewed by several persons interested in the appointment of the Nebraska commissioner to the Pan-American exposition. There are already five applicants for the position and still other names are frequently mentioned in connection with the appointment. Among them is Representative Hibbert, author of the bill creating the office, who has strong endorsements and is making a vigorous fight for the place. Although the governor has given no intimations, it is understood that he will select some one who has had experience in managing exhibits, or who has in some way been connected with an exposition.

Various ideas for the state's exhibit at the exposition have been advanced. Some would have the state represented by a typical sod house and others believe a small but modern cottage, characteristic of Nebraska's most upto-date architecture, would make a better showing. Whatever may be the nature of the building, one thing is settled, and that is that no effort will be spared to show to as good advantage as possible the agricultural and educational resources of the state. The legislature enacted few laws

which will in any way affect the insurance interests of the state. The most important measure of this class a branch of the Lake Shore road, is the act repealing the mutual hog

German Geography from Nature. On misty days in autumn the schoolboy of the Black Forest is marched to the peak of some high hill. From there geography is taught ladis attending drawing rooms. Hithhim, says a German correspondent. It is pointed out to him, that he stands upon an island completely surrounded by the mist, which, for the purpose of this comedy, has had handed to it the part of water, which it plays with much success. The twin rivers of mist on either side of Act of the Legislature Repealing the him, filling both valleys, are, for him, estuaries; the spur of mountain oprosite is a peninsula. He descends, it is certain, with geographical ideas in his head that could never have been put there by mere maps hanging upon a wall.

The Cheapest "Keep."

By actual experience the Ruskin ites, a colony of socialists near Waycross, Ga., have demonstrated what is probably the lowest possible daily cost for food. They live at an actual cost per capita of less than 10 cents a day. Of course, this could not been accomplished except have through co-operation. Everything they consume is bought at wholesale in large quantities, and is cooked in the community kitchen. In the community dining room tables are set for 300 people. Those who do not wish to eat with the crowd are allowed the privilege of purchasing company stores and cooking them at home.

But We Sell 'Em Steel Rails.

While England has sent out an earl to be governor-general of Australia. the successful bid of 17,400 tons of steel rails for the state of Victoria in that commonwealth goes to American firms in the face of the world's competition.

The Deering Harvester Works are the largest of their kind in the world, covering eighty-five acres and employing 9,000 people. They are equipped with modern automatic machines, many of which perform the labor of from five to fifteen hands.

This Company is also the largest manufacturer of Binder Twine in the world, having been first to produce single-strand binder twine, such as is in general use today, making over a third of the product of the entire world. The output of its factory for a single day would tie a band around the earth at the equator, with several thousand miles to spare. The annual production would fill a freight train twenty miles long. Made into a mat two feet wide, it would reach across the American continent from ocean to ocean

Deering machines are known as LIGHT DRAFT IDEALS, consisting of Binders, Mowers, Reapers, Corn Harvesters, Shredders and Rakes.

This company exhibited at the Paris Exposition an Automobile Mower. which attracted much attention, and exhibitions were given with one of these machines in the vicinity of Paris throughout the season.

A Fortune in Old Violins. Special United States Treasury Agent Partello, who owns a violin col-lection valued at \$50,000, has purchased from the estate of the late duke of Edinburg (duke of Saxe-Coburg and Gotha) his nine famous violins, among which are several of Stradivarius' make.

Garfield Tea purifies the blood, regulates the digestive organs and promotes good health. It is the herb medicine that has been used successfully for many years.

More than one woman keeps a "best dress" hanging on hooks until it is out of style.

An Artist in Courtesy.

The New York Times relates a dinner incident to illustrate the essence of courtesy and politeness on the part of a New Yorker who lately returned from a long sojourn abroad. He met an old friend at a dinner party the other night, who gave him a cordial handshake and asked him when he had arrived home. "The moment I saw you," was the quick answer.

insurance law.
