"Mt. McKinley."

A bill will be introduced into the next New Hampshire legislature changing the name of Mount Pleasant, in the Presidential range, to 'Mount McKinley." There is preceient for the change, inasmuch as, besides the five early Presidents, only those who have been shot by assasins have had their names given to mountains. The name Lincoln was bestowed on the second highest peak of the Franconia group, and "Mount Garvice and answers, without charge, in- leld" displaced Haystack mountain in

SERVANT GIRLS' ROOMS.

Domestics Are Entitled to More Comfortable Sleeping Apartments. The servant girls throughout the

country are asking that comfortable sleeping apartments be assigned them. As a rule the bedroom of the "hired girl" is the most cheerless and contracted in the house and it is no wonder that she seeks to fly from it on every occasion that she receives an invitation to spend an evening elsewhere. Every charitable institution in the country built for paupers and orphans is fitted up with steam heat, hot and cold water, and the matrons take great pride in showing visitors the bathrooms with all the modern improvements. And it is not strange that girls who work for their living would like a few of these privileges that are given to those who are living on charity. It is not too much to assume that the girls who live in our homes and who cook our meat and bread for us to eat may possibly have the same ambitions to keep clean and comfortable as those who are living in charitable institutions. It is not going beyond the bounds of all reason to suppose that if a girl is earning her living she has a natural desire to be selfrespecting and might like a closet to keep her clothes where the moth and dust doth not corrupt; that she may like an opportunity to take a bath once in a while and that she may enjoy a decent room.

Great Reach of Roots.

It has been remarked as a serious fact of science that a person cannot feel pain in two different places at the same time. To be sure, there are people who maintain that the place sometimes covers the entire body, but that does not interfere with the general An American syndicate has just theory. "I knew it was a big one, and I was afraid it would come hard, but I never supposed the roots went so far down as this," and he rubbed the spot on his leg where the doctor had jabbed him with a look that was partly awe and partly pride.

Odd Marine Rella

An ancient ship was recently discovered in the bed of the old River i.ea, in England. The vessel, found at a depth of seven feet below the surface, is about fifty feet long and is constructed of oak throughout, with the exception of the keel, which is of elm. The ribs of the boat are secured to the sides by tree-nails, while the timbers are secured with crude iron nails. The floor boards are fastened together with nails and the calking is done with felt. Antiquarians think it belonged to the fleet with which King Alfred the Great fought the Danes.

Use Rhone River Power.

Switzerland presents an object lesson in the practical applications of scientific principles. Geneva now derives all the electricity it requires for public and private lighting and the traction of its cars from the impetus of the Rhone as it rushes out of Lake Leman, and there is still left an enormous amount of power unused. Electric railways and lighting everywhere are supplied by the innumerable waterfalls, while heat and power to an incalculable extent can be derived from the same source.

Wasps Storm a Beehive.

A story of a curious battle between bees and wasps comes from Semperingham, England. A band of wasps entered a beehive in search of honey. The bees not unnaturally defended their property and tried to turn the enemy out. They were, however, badly beaten, and the wasps gained possession. When the beekeeper examined the hive later on he found that nearly all his bees had been killed and that the wasps were enjoying the fruits of their victory.

Press Bringing Universal Peace.

Max O'Rell, who recently joined the staff of the Paris Figaro, thinks that the press now fulfills the duties formerly monopolized by diplomacy and urges his companions of the pen to refrain from writing on any subject with which they have not at least an elementary acquaintance. If this plan were followed everywhere he says that twenty years hence the peace of the world would be assured.

Crusade Against Fat Policemen.

A crusade is on in Jersey City against fat policemen. They must get down to fighting and running weight. The other day a thoroughly equipped gymnasium was opened and orders were issued by the president of the police board and chief of police to every policeman to report at the gymnasium at certain hours for exercise necessary to reduce them to athletic proportions.

Asymptote.

Asymptote from the Greek, meaning "not coinciding," is a line that continually approaches nearer and nearer to some curve, but only meets it at an infinite distance. It is only with regard to mathematical lines that the proposition is true; and the truth of it has to be conceived by an effort of pure reason, for it cannot be represented.-Montreal Herald and Star.
