This increase in buildings in the cities, and the vis increase in taxable improved lands, which should have added a hundred millions of dollars to the grand assessment roll of the state, would much more than make up for any amount of improvement on railroad property in the same time. In other words, improvement in the state has more than kept pace with improvement in the

These decreases of valuation in Dongles and Lancaster counties were to such an extent that there was not sufficient taxable property returned in the cities of Liucoln and Omaha to raise sufficient revenue on which to successfully carry on the city administration with rate of valuation is placed so low that the rate of taxation is entirely out of line with any other city in this section of the country. These cities succeeded in having a special law passed for the purpose of raising revenues in these two places, and to-day they report one set of valuations for city taxation and another for that of the state and county, and the result is that in their reports the values for taxation for county and state purposes practically run riot.

A marked example of the injustice done the cities themselves by this arrangement is for reports to go out that the assessed valuation per capita in Omaha is the lowest in any city west of the Mississ pp , which would indicate to the casual investigator that the place was poverty stricken, and at the some time this low valuation obliges a high levy that turows an investor into
