CHAPTER IX .-- (Continued.) "Why have you lived so long in Alaska?"

"I could not get away," was the answer. "Yours is the only face I have seen since I left my friends, the Indians, save those who held me captive."

"And you have escaped?"

"Yes." "Then come with us to the camp

on the Klondyke." "Klondyke-I've heard of it; they

often talk about it when they think me asleep, but I do not always sleep when I seem to."

Paul was filled with delight, for here was a chance to unravel the mystery in which he was involved.

Another silence fell on the group, broken by Paul asking:

"Do you know a miner named Glum?"

"Glum-Glum-no."

"Glum Ralston."

The old man again shook his head, declaring he had never known such a person. Paul was disappointed. From what Glum Ralston had told him he was confident that this mysterious hermit of the woods was the longlost captain who had followed the Indians to the place where they said gold in great quantities was found. But when the mysterious hermit disclaimed any knowledge of him at all he was quite as far away from the solution of the problem as he had been before.

Next morning the party resumed their march guided by the sun, which shone a portion of the day. Paul and the hermit were constantly together, and hourly grew more and more friendly, until, as the noble nature of the hermit unfolded itself, Paul came to love him. He was known to the hermit by his sobriquet of Crack-lash, for he had been called by no other name since his arrival in Alaska.

Paul was hourly entwining himself about the rugged heart of the old man. One night when they had halted and the Indians were building a fire for the night the hermit said:

"Crack-lash, you impress me strangely. I don't know why, but I have grown to love you as if you were my nearest relative. When my own dear boy grows up to manhood I could only wish that he would make as noble a man."

Paul, deeply impressed with the old man's sad story, expressed a hope that he would soon be able to leave Alaska and reach his home, and that his wife and child might yet be alive to welcome him.

Their stock of provisions were running short. One day the Indians came on the trail of a moose and were anxious to start on its trail. gave them permission to go, Paul while he and the hermit kindled the fire and prepared to make themselves comfortable for the night.

The prisoner as usual sat in sullen silence, with his back against a tree and his eyes fixed on the fire. Paul and the hermit sat engaged in earn-

snow-capped head a hundred feet into the air. Paul's pack was removed from his

back and he laid on a blanket in front of the fire with the hermit by his side.

The rascal named Morris came to the old man's side and said: "You said you could not give up

that secret if you wished." "I did."

"What do you mean?"

"It is lost." Morris stared at him for a moment

with wide open eyes and gasped:

"I don't understand you, Cap; you are talkin' in riddles." "I care very little whether you understand me or not," the old man defiantly answered. "The secret is lost. It was written in cipher on a walrus

hide and the walrus hide is lost." It was some time before the idea could get through the thick skulls of

the ex-sailors, but when they came to fully comprehend the loss they roared like madmen. Ned seized his knotted stick and swore he would brain them both, but his more cool

companion interfered, saying: "It may all be a trick. After all it may be only a trick to throw us off the trail. If we decide for the old cuss to pass in his checks, let it be done deliberately and give him time to reflect."

So Padgett decided to let them live

and trust to some chance to reveal the hiding place of the money. Paul had heard the above conversation between their captors and waiting for an opportunity to speak with the hermit when he would not be overheard by them, whispered:

"Is the walrus hide you referred to the one left in the cavern where you took me?"

"Yes." "I took it."

"You?" There was an expression on the old man's face almost fierce as he asked the question.

'Yes, I took it.'

"What did you do with it?"

"Gave it to the miner who was with me before I fell from the precipice and whom I found after leaving the cavern. He said he had seen it before." "Where?"

"The Indians who had enticed his captain away in search of gold had some such hide, only there had been painting added to it since."

The hermit turned, and fixing his great, earnest eyes on him in astonishment, asked:

"His captain-had he been a sailor?" "Yes, sir."

"In what seas?"

"Almost all over the world, but his last voyage was in a sealing schooner to St. Paul Island, Alaska, and this coast."

"What was this sailor's name?" "He is called old Glum." "No other name?"

"I believe Glum Ralston is his name, but after all his real name, I don't think, is known. In this country nearly everybody goes by some nickname, and I fancy that Glum Ralston was only a nickname."

"Might have been Jack Ralston." "Well, since you mention it, I be lieve I once heard him say his real name was Jack Ralston; however, I

will not be sure." The hermit was very calm. Paul waited a long time for him to answer, but the old man was silent as the grave. Then two of their captors came

near where they were sitting, and

side of a great stone which reared its on the dried grass, striving to persuade himself that after all this was some horrible dream. The man whom he had assaulted in company with Padgett and Morris approached him. Morris handed Paul a letter in the well-known handwriting of Laura Kean. It was dated at Juneau and addressed to Paul's mother in Fresno. The letter was brief, saying she had just arrived, and would rest a day or two before proceeding farther. "Isn't that evidence?" asked Morris.

"Yes; but she did not come with him."

",Oh no; he came on another ship.' Then he lied when he said they ame together."

Morris laughed a cold, sardonic laugh, and in a voice that seemed to have all the evil of a demon in it, answered:

"Though they came on different ships from America, there is but one train going to the Klondyke and both will be in that train. The chances are she knows no one but him, and you know Lackland's feelings towards the girl. When he starts to win he wins; he's got millions to work with, and if it's necessary to buy the entire pack train off he can do it."

Paul Miller groaned aloud, but made no answer. He realized how great her danger and how uterly hopeless he was to aid her.

"Now you san save her," said Morris.

"Save her? My Heaven, how? What other infernal scheme have you on hand?"

"You were overheard talking with the old man about a walrus hide. From what you said it was understood you knew something about it. If you will give us information that will lead to finding it, you shall be given your liberty and be taken to this young lady, Laura Kean."

"I cannot," groaned Paul.

"Why." "I don't know where it is."

"What did you do with it?" asked Morris, his face expressing the deepest concern.

"I gave it to another. Where he is or what he has done with it I do not know."

A look of disappointment swept over the faces of the captors at this announcement. They retired to near the entrance of the cavern and there held a consultation.

"It's all a pack of lies," cried Padgett. "We've been twenty years in these woods waitin' t' grab that pile, an' no nearer to it now than before Knock out their brains an' go away is what I say."

Tom Ambrose, though equally as much a villain as his companion, urged moderation. During all the years the unprincipled rascals had struggled to get possession of their captive's secret, Tom had acted as a brake to fiery Ned's temper.

"We have a hold on the old man," one of the plotters at last declared. "He can be made to tell where the

gold is cached." "But he don't know."

"He does know. He must know. "Well, what good'll that do? Hain't we been the last eighteen or twenty years tryin' to open the hatches o the old capen, who's as close-mouthed as a clam? We've threatened t' hang him-done everything any one kin, but it's all no use."

"We got a stronger pull now than ever."

"What is it?"

"Come here."

His companions gathered about him shoulders and began to reveal the plan which emanated from his won derful brain-a plan that was diabolical, but promised success.

TASK IS A HARD ONE To prevent a secession to the enemies

CONTROL OF CORPORATIONS A DIFFICULT MATTER.

Herald. President Roosevelt Realizes the Gravity of the Situation-Amendment to the Constitution Necessary to Effect Desired Results. Industrial commission tabulates 416 replies received by the commission

bearing on the question of foreign The president says: "I believe and domestic prices. The report firmly that in the end there will have says: "The great majority of the to be an amendment to the constituanswers indicated that prices are no tion of the nation conferring addilower abroad than they are for domestional power upon the federal governtic consumers, and a considerable ment to deal with corporations. To number indicate that foreign prices are higher." A few, however, state that they sell a portion of their goods

to overcome the state pride which will bid the states retain jurisdiction over If congress were this year, through this moment would be that the remedies which congress can administer with the constitution as it is have not been given a sufficient trial. This is a reason which will appeal strongly to many. In all human probability no amendment can be adopted until all other measures have been tried faithfully and the r failure is beyond dispute.

The president does not exaggerate when he says it will be "a matter of difficulty and a matter of time" to get the constitutional amendment he desires. Many difficulties will be encountered and much time will be needed. Federal control of corporations is not a thing of the immediate future. Probably that is the view President Roosevelt takes of the matter.-Chicago Tribune.

The West and the Tariff.

of protection its friends must give AGRICULTURE the one convincing proof of their sincerity that is required by changing the now unreasonable schedules of the Dingley law .- Chicago Record-Foreign and Domestic Prices. Volume XIII. of the report of the

> Onion Crep of the United States. We have no full statistics of the onion crop in the United States later ;han 1899, the year covered by the welfth census. In that year the rield was over 11,000,000, and the screage was in excess of 47,000. The arm value of this crop amounted to \$6,637,413. New York leads as a profucer of onions, the yield that year being 2.177.271 bushels. Ohio followed with 1,671,442 bushels. Almost one-:hird of the entire crop of the country in 1899 was produced in these two states, their combined output amountng to 3,848,713 bushels, valued at \$1,-392,254.

> The five states which rank next, and together produce about onefourth of the entire crop, are, in the order of their importance as producers, Michigan, Massachusetts, Illinois, California and Indiana. The combined product of these five states in 1899 amounted to 3,098,807 bushels, valued at \$1,528,776. No state other than those mentioned above produced as much as a half million bushels. Connecticut is credited with over 400,000 bushels: Pennsylvania, Kentucky, and Wisconsin each raised upwards of 300,000 bushels; Iowa, Missouri, Minnesota, Oregon, Virginia and Colorado each produced a crop of upwards of 200,000 bushels, and the combined product of the group of the ten states last enumerated amounted to 2,814,-320 bushels, or almost 24 per cent of the entire crop of the country. It is thus seen that about \$2 per cent of the onion crop of the United States in 1899 was the product of 17 states, the remaining 18 per cent being distributed among 32 states and territories.

> > Rich Land.

The man that dreams of farming always imagines himself owning rich land. There is no other kind that it is a pleasure to till. There is no other kind that will yield a profit from the operation of tillage. The richness of land regulates the value of the farm both in the market and in the operation of farming. Yet in the face of this well-known fact, millions of acres of our most valuable and productive land have been allowed to deteriorate in fertility. The great problem of how to bring them back to their former state of fertility is one with which the best of scien. tists are working. It is not practical for a man to buy enough stable manure or commercial fertilizers to at once bring back his land to its origin. al state. A few facts in relation to the composition of the soil helps us in determining the best course to pursue. One of these facts is that the poverty of the land comes principally from the exhaustion of available plant food and not from the exhaustion of the plant food that is not at once available. In the process of years the new unavailable plant food becomes available, some each year, We have but to put back on the soil year by year as much as we take off in the way of fertilizer to gradually bring back the land to a rich condition, by the annual increase of avail-

get that will be a matter of difficulty and a matter of time." The last sentence shows that the president is aware of the fact that to amend the constitution, even to reach an end desired by a considerable majority of the people, is no light task. It will be necessary for the advocates of the amendment the president believes necessary to overcome the resistance of corporate interests which prefer state to federal rule:

the corporations which are their own creatures; and to reconcile conservative slow moving elements in the community to a new departure-to a greater centralization of the powers of government. John Adams said of the national constitution that it was extorted from "the grinding necessi-ties of a reluctant people." It may require a similar pressure to extort an amendment giving to the general government the control over corporations it is proposed to bestow upon it. a sudden impulse, to submit to the states an amendment transferring from them to the federal government the jurisdiction over corporations the amendment would fall far short of the necessary three-fourths vote. There are states where no trust has a home and where trusts are most unpopular which, influenced by the habits of thought of a century, would refuse to give additional power to the general government. There are states whose legislatures are so far subject to corporate influences that they would refuse ratification peremptorily. It would take something in the nature of a revolution to get the assent of states like New York, New Jersey and Pennsylvania. The general reason assigned for nonconcurrence in the amendment at

conversation. The former was talking in a low tone, telling how he had been robbed by the prisoner and three others, and followed them into the forest. He was in the midst of his narrative when two objects suddenly appeared before them, each with a Winchester rifle and said:

"Surrender or you are dead men." Resistance was useless; they were prisoners almost before they knew it.

CHAPTER X.

Paul Learns That Laura Is in Alaska. "He, he, he!" chuckled Ned Padgett, rubbing his hands gleefully at seeing the tables turned. "You hove in sight, mates, in good time. Must 'a' had fair winds."

Paul had no difficulty in making out the two men, companions of the third, whom he had met on other occasions. As these were the men who had robbed him and whom he and old Glum had chased in the forest, there was little mercy to expect from them. With thongs of seal-skin Paul and the hermit were quickly tied hard and fast, and told they must move on before the Indians returned.

As it was dark and the snow falling rapidly, there was little danger of even the Indians following on their trail, shrewd as they were in such experiences.

The night was dark and the snow falling, so it was difficult traveling. A strip of walnus hide was tied about the arms of each above their elbows and fastened about their backs. They were heavily loaded, and threatened with the knotted stick which Ned carried in his hand when they staggered under their heavy loads.

On, on and on they staggered through the darkness and over the uneven ground. At last Paul, utterly exhausted, sank down at the root of a tree.

"Get up! Go on!" cried one of their captors.

"I cannot."

"Ye lie!" cried Padgett and raised his club.

But one of his companions quickly interposed with:

"Hold on, Ned. Don't be a fool, now, and throw away every chance we have."

"What ye goin' t' do?" asked Ned. "We're too far away for the Metlakahtlans to overtake us, so we will go into camp and wait till mornin'." A roaring fire was built against the

no, it is not true."

they dared not talk anymore. Their journey was very painful and

difficult. Grown desperate, Paul had determined to escape from their captors even if he had to kill them. One day they reached a great gloomy cavern which extended to an unfathomable depth in the earth. Their captors had pine knots on the wall about the cavern, and lighting two of these went back to where there were piles of dead grass and

a table of stone on which lay a pack of greasy cards. Here they took up their abode.

Several days passed, and then Morris and Padgett left the cavern in charge of Tom Ambrose, who tied the prisoners every night, established a deadline in the cavern in daytime.

and swore he would shoot the first one who attempted to cross it.

Two or three weeks had elapsed, for in that dungeon night and day were one, when the two men came back and with them another whom Morris seemed to have known. He introduced the newcomer to Tom Ambrose as a friend fresh from San Francisco.

Padgett took Paul to where the stranger sat on a musk ox hide and the latter asked:

"Is your name Paul Miller." "It is."

"Are you from Fresno, California?" "I am."

"Do you know Laura Kean?"

"I do; what of her? His whole frame was trembling with anxiety and emotion."

"She is in Alaska. Just landed a few days ago at Juneau in company with Mr. Theodore Lackland."

"It is a lie-a lie!" roared Paul, beside himself with rage and mortification. "It's a lie and I will crowd it down your throat!"

Before anyone knew what he intended he had his informant by the throat and hurled him to the ground.

The guards came to the relief of their companion. Paul was quickly torn away from him and his hands bound. He lay upon the dead grass piled in the cavern. His mind was in a whirl and he kept saying to him-

self: "Can it be possible? No, no, it is not possible. The whole world may be false, but Laura is not. Come to Alaska in company with that man-

A thousand tumultuous emotions were stirring his breast as he lay and \$4,500.

(To be continued.)

RACIAL FEUDS IN EUROPE.

Antagonism Engendered Between Prussians and Poles.

Hardly a day passes but the newspapers contain striking evidence of the antagonistic spirit which is being engendered between the Poles and the Prussians. Last week it came to the ears of the publishers of a Polish paper circulating in Westphalia that one of their compositors was about to marry a German girl. They considered that this stamped him as a traitor to Poland, and although he had served them faithfully for many years they dismised him on the spot A large number of Poles work in the Westphalia coal mines, and in order to further the amalgamation of the races the authorities have issued regulations to the effect that no person shall be employed underground who is not proficient in the German language. The Poles obstinately re fuse to know a word of German when they happen to be called up to make

statements in public. A few days ago a Polish miner had to give evidence in a Westphalia police court. He was, of course, as innocent as a newly-born babe of any knowledge of German until the magistrate threatened to report the case to his employers, who would have been 'compelled to dismiss him. Thereupon his German came back and he replied fluently to all the questions put to him. His wife had been present during the hearing of the case, and was waiting for him in the passage just outside the court room door. As soon as he appeared she bitterly reproached him for having given way, and to render her arguments more forcible, soundly boxed his ears. She then kicked him with such vigor that he had to race dowp the corridor into the street to escape the attentions of his "patriotic" better half .-- London Leader.

Novels Read by Statesmen. The yearly bill for novels supplied to the library of the French Chamber of Deputies is usually between \$4,000

Herald has said as to the sentiment of western Republicans on the tariff. He testifies that in his section of the country there is a very strong feeling in favor of revision, and he describes the western idea of a protective tariff as follows: "It should not afford protection to

monopoly, that is, to an industry absolutely controlled by an individual, a partnership, a corporation, or a trust, nor to those industries that reduce their employes to the conditions they are protected against, but all indenendent industries should receive sufficient protection to enable them to compete on more than even terms with similar ones in foreign countries. Where our present tariff law fails in any of these particulars, and it does in many, it should be altered or amended."

The idea, it will be observed, is in no sense destructive of the protective system, and the congressman adds that what the western Republicans want is not a general revision but a readjustment of those schedules which give a premium over and above a reasonable protection. This, we believe, is commonly desired among them, and the desire has found expression, as Mr. Eddy notes, in the declaration of their state conventions. Construing his just analysis of the tariff situation with his very sanguine predictions of Republican success next fall, there is this to be said: Success if it is attained will be due in no small degree to the platform utterances to which he refers. They have been the only effective answer to the Democratic demand for revision, and they are everywhere treated as a party pledge that the tariff will actually be revised by its friends for the correction of its abuses, while the principle of protection is kept invio-

ate. The Republican congressmen who are elected on this pledge will take their seats a year from next December. It would be excellent policy for the present congress to anticipate revision, but if it does not a year of grace is pretty certain to be the limit of indulgence which the Republican party will enjoy. For the promises. now made are seriously interrupted, and the revision sentiment is growing so steadily that the people are likely to become thoroughly impatient and to revolt if they are disappointed.

trend of the speeches made at the butchers' convention I discover a sentiment well nigh universally expressed there that meat is being monopolized by the great packers. But I happen to have a tenant out in Iowa who has a fine bunch of cattle,

on which no packer holds a lien of any kind, and he writes me that he is willing to sell them to butchers if they will pay as much as the packers offer. I am quite sure the people would as soon buy this meat of the butchers as of the packers. Thus there is afforded a splendid opportunity for any one to make all kinds of money if he will but give the farmer as much money for his beeves and give the people as much beef for their money."-Secretary Shaw, at Morrisville, Vt., Aug. 19, 1902.

Trouble with the Democrats.

On the 29th of July, talking at Bar Harbor to a New York World man, William C. Whitney, for many years one of the most conspicuous members of the Democratic party, declared his intention of staying out of politics forever, and added:

"The trouble is that the Democrats have no issue and no man."

That is the exact situation of the Democratic party to-day, simply and solely because of the five years of unequaled prosperity that have followed

the restoration of the Republican party to the control of national affairs. No man knows this better than does President Cleveland's secretary of the navy.

Few men have better reason for knowing it, for few indeed have profited more sumptuously than William C. Whitney has in these five years of protection prosperity. It is because of the splendid issue-Prosperity-upon which the Ropublicans stand before the country that Mr. Whitney says "the Democrats have no issue."

A Better Reason Needed.

"There ought to be some more tangible reason for such a dangerous expedient than the existence of a sentiment in certain localities, now as always, that demands a reduction of the tariff on articles there consumed and not produced, while it stands ready to fight to a finish any reduction on the things there produced." -Secretary Shaw at Morrisville, Vt., Aug. 19, 1902.

able plant food from natural causes. This is a slow process, but it is far better than no process of recuperation.

Seed Wheat.

Much of the trouble with raising wheat comes with the quality and condition of the wheat we sow. Some forget that in varieties there has dur ing the past few years been great improvement. At various experiment stations investigations have been carried on that have shown that some varieties are worth double what others are. A few varieties have given large yields year after year on various kinds of soils and under all conditions. Yet this information is being taken advantage of but slowly. It will pay to have good seed and the proper amount per acre. Care must be exercised to keep out the impurities, which are frequently the cause of great crops of weeds in the wheat field. Well-cleaned seed only should be used. Seed containing weed seeds should not be purchased at any price, as the weed seeds will take more nourishment away from the growing wheat than the whole cost of the seed will amount to. Every farmer should know how to clean his own seed and should do it where necessary.

Harrowing Wet Ground.

Ground should not be harrowed when it is too wet. Only the skillful farmer can tell when it is too wet. One farmer follows the practice of taking a handful of soil and working it into a ball. If the ball holds together he considers the soil too wet to be worked. The harrowing should be done when there is sufficient moisture in it to keep it from being very hard on the surface but should also be dry enough so that when harrowed the particles of soil will fall away from each other. The time during which ground is just right for harrowing is of short duration. This is especially true of clayey land. On sandy soil there is little trouble in harrowing at any time, especially if the soil be very sandy.

It is estimated by experts that it costs about \$30 per acre to raise sugar beets. This is on account of the large amount of handwork that must be given to grow beets of proper size and shape.
