TROUBLE IN CUBA

REBEL FLAG RAISED IN EASTERN PART OF REPUBLIC.

SOLDIERS DEMAND THEIR PAY

Sixty Armed and Mounted Men Appear in the Cauto River District Proclaim Revolution—Rural Guard is Hastily Called Out.

HAVANA.—In spite of the assertion made Thursday by Senor Yero, secretary of the interior, that the killing of three men and the capture of a fourth man, their leader, who had attempted to cause an uprising in the vicinity of Bayamo, province of Santiago, effectually ended the only semblance of an uprising in Cuba, the rumors of uprisings in eastern Cuba were fully confirmed in the government reports received from the governor and other officials of Santiago province.

These are to the effect that since the fight Sunday last sixty armed and mounted men have appeared outside villages in the Cauto river district proclaiming a revolution and demanding the payment of the former members of the revolutionary army. No acts of violence have been reported, but the inhabitants of the Cauto region are excited.

The leader of the revolutionary party is named Pupo. He is a brother of one of the bandits killed by the rural guard on Monday.

General Rodriguez, commander-in-chief of the rural guard, has ordered the mobilization of all the rural guards in eastern Cuba and the governor of Santiago province has been instructed to enlist as many volunteers as may be deemed necessary to co-operate with the mounted troops.

Secretary of the Interior Yero says there is no doubt that the authorities will be able to cope successfully with the situation, as all reports, he adds, agree that popular sentiment is with the government of President Palma, and that those who have risen in rebellion mostly belong to the wanton, lazy class of Porto Principe.

UNION PACIFIC IS REBUILDING.

Three Hundred Miles of Double Track in Nebraska in Two Years.

Reconstruction work on the Union Pacific railway is being pushed all along the line and the intentions of the engineers to improve the road until it is second to none in the country it seems will soon be realized. At Yutan a new steel bridge across the Platte river connecting that place with Valley is nearing completion. The bridge is a modern affair and it rests upon concrete piers similar to those under the viaduct across the tracks at Twenty-fourth street in Omaha.

The branch between Valley and Lincoln is being greatly improved, the intention being to reduce the curves and perfect the road bed, thus making it possible to increase the speed of all trains. The work will be completed some time next year. The terminus at Lincoln is being bettered.

All along the line in Nebraska new ties are replacing old ones, and large section gangs are at work every day in the year preparatory to replacing the old steel with a much heavier article.

Construction for the second track throughout Nebraska is being pushed and it is predicted that within the next two years 300 miles of double track will cover that much of the state. The enormous business of the road which is expected to increase very materially during the next few years has forced the company to place the second track. Long sidings also will be built and when the improvements are completed the engineers say the roadbed and trackage of the company will not be excelled in any part of the country.
