London, May 24 .- A dispatch to the St. James Gazette from Kobe, Japan, dated today, after confirming the re-port of the stranding of the Russian protected cruiser Bogatyr on the rocks near the entrance of Vladivostok, adds that the Bogatyr was subsequently blown up by the Russians to prevent her falling into the hands of the Japa-

her falling into the h-nds of the Japa-nese. The Bogatyr was a fine modern cruiser of 6,750 tons displazement. Her crew numbered 580 men. A dispatch to the Japanese legation from Tokio says Vice Admiral Togo reported today as follows: "The gunboat squadron and torpedo boat destroyers and torpedo boat flo-tillas approached Port Arthur yester-day for the purpose of reconnoitering, which was successfully effected with little damage, in spite of the hot cross-fire from the forts. There were no cas-ualties on our side." **Russia Admits It Now.** St. Petersburg, May 24.—In spite of

St. Petersburg, May 24.-In spite of denials from the admiralty here, re-ports emanating from Russian sources were persistently circulating that the Russian protected cruiser Bogatyr is on the rocks near Vladivostok.

Her exact position is not revealed. Rear Admiral Jessen, according to reports, is making a determined effort to save her, with what is considered to be a good chance of success. It is known positively the Bogatyr has not been blown up, no necessity for such action having yet arisen.

Will Storm Fort Arthur.

Chicago, May 21 .- A special to the

Daily News from Tokio says: Port Arthur is to be taken by storm the moment proper preparations have been completed. Siege guns have yet to be placed in position and the land forces appointed for the assault have to be strengthened. The unexpected loss of two fine vessels has emphasized the insecurity of sea power and the authorities feel that no chances must be taken that would encourage Russia to send out the Baltic fleet, counting on finding a harbor of refuge in Port Arthur.

It is realized that the storming of the fortress will inevitably cost many lives, but it is said that the waters where the Japanese ships are forced to maneuver are becoming so dangerous because of floating mines that heroic measures are imperative. Under these circumstances it is thought that life will be economized by storming the stronghold and eliminating it and the adjacent waters from the area of actual -conflict.

A Japanese Victory.

Tokio, May 24.—The Japanese forces which landed at Taku Snan at the mouth of the Dayan river, west of the Yalu, Thursday, surrounded and rout-ed a force of Russian cavalry Friday evening in the neighborhood of Wang Chi Tung, seven miles north of Taku Shan. The Russian force, which consisted of about one squadron, lost many men killed or wounded, and the captain was captured. The Japanese sustained no losses. Although it has not been officially re-

ported, it is said on good authority, the Japanese forces have captured Kai Chou, driving the Russians back te returning, and Tashi Chia, in the direction of New- go and get it. chwang, and preventing an advance of the Russian troops at Newchwang in the direction of Kai Chou.

fored the most disastrous seven days' period since the conflict be-gan. There is even some disposi-tion among volatile observers to assume that the turn of the tide, which the Russians from the start so confidently predicted, has set in. . The great Japanese naval disaster in losing a great battleship and also a cruiser on the same day will hardly be overestimated in its seri-ousness. Yet the claim that it can possibly disturb the balance of na-val power is hardly warranted. Today come report, apparently so definite and detailed as to warrant acceptance, of the loss of one of the finest vessels of the Vladivo-sok squadron of the Russians. Go-ing back to the. Petropavlovsk hor-ror, this makes a battleship and a cruiser lost by the Russians, and a battleship and cruiser by the Japs. It is practically an even exchange. Yet before any of these four ves-sels were lost, the Japanese con-trol of the sea was established and unquestioned. The forces compare now just about as they did before the series of accidents began. The Japanese would seem as safely in the ascendant as on the day before the series of accidents began. The Japanese have seriously lost ground. Rather, it seems to bear out the theory that they are playing for 4 sure thing, and have it in sight. It is now accepted by military ex-army behind Mukden; probably of about 35,000. They also have two or three to the south of Mukden. The object is to draw these various forces about Kuropatkin's force and by a united and simultaneous attack crush or capture him. Sedan, where Von Moltke captured almost 100,-00 French soldiers by surrounding them while they did not realize their danger, is the comparison con-stantly made with the present strategic plan of the Japanese. The skill with which the army now known to be northeast of Mukden was handled to get it there with-out the energy of the Japanese ne not fight the south, encountering a su-perior Russian force and realize their danger, is the comparison con-stanting were part the positions from which t

Italian Shoots Down a Woman and Is in Turn Killed by Victim's

Dubois, Pa., May 24.—At Cardiff, a village near here, an Italian woman sacrificed her life for her husband's hat, being shot down in cold blood by another Italian while recovering the hat, and a half an hour later the murderer was lying dead, his head full of buckshot from the gun of the hus-band of the murdered woman. A quarrel arose between Paul and filchers. Cook county hates Yates be-cause he has sided with the corrupt machine that has sought to use the legislature to despoil the city. Deneen has done a great work towards purging Savorio Pellingereno, an inmate of the house. Although the quarrel was trivial, Paul, suspicious of danger would not remain, and left hurriedly for his house. His wife urged him to return for the hat, but Paul was timid about returning, and his wife volunteered to go and get it. She walked to the board-ing house, which was in plain sight of Paul's home and as she stooped to re-cover the hat Pellingereno fired point blank at her with a shotgun. The charge of shot entered the woman's head and she fell dead. Paul, who had witnessed the scene, took a revolver and shotgun and started to avenge his wife's death. As the Italian was trying to escape Paul fired several shots from his re-volver, but missed. Pelligereno suc-ceeded in locking himself in his room and Paul stood guard in the hallway. The people about the house were terrorized and would not interfere. After half an hour Pelligereno, hear ing no stir, stuck his head through the door. Paul, quick as a flash, fired his quick as a flash, fired his shotgun, killing the murderer of his wife After examining the body to see that no life remained, Paul picked up his wife's body and tenderly carried it to his home. The government press is pointing out that the visit of King Edward has absolutely no political significance, and that the king merely comes because of his personal interest in all kinds of sport. In political circles, however, there is some anxiety which cannot be con-cealed. It will take years before the German people will be able to forget that King Edward stole a march on Germany by arranging for a peaceful understanding and regulating of all claims with France in Morocco.

It is thought rather peculiar here that the king should visit the kaiser in Kiel instead of Potsdam or this city. especially as some time ago a London paper closely connected with the Engpaper closely connected with the Eng-lish government announced that when the king should go to Germany he would go direct to Potsdam, with the added information that the kaiser had told King Edward that he could count on an enthusiastic reception from the people of Berlin.
