Almost everywhere in the far east the old days of cheap living are passing away. Steamers, railways, telegraphs newspapers, labor-saving machinery and the production of western ideas are slowly but surely revolutionizing the orient. Shantung wheat, which for-merly had no market beyond a radius of a few dozen miles from the wheat of a few dozen miles from the wheat field, can now be shipped by rallway and steamship to any part of the world, and in consequence every Chinese buy-er has to pay more for it. In like man-ner new facilities for export have doubled, trebled, and in some places quadrupled the price of rice in China, Siam and Janan Siam and Japan.

In 1815, the earliest year for which exact figures are obtainable, our ex-ports were valued at \$106,040,111 and our imports were \$113,184,322. Our exports jassed the \$200,000,000 mark in 1853, the \$300,000,000 in 1860, and did not exceed \$400,000,000 until 1871. During all the years from 1845 to 1876 our imports ex-ceeded our exports in value. except ceeded our exports in value, except four. Since then our exports have exceeded our imports every year except in 1888 and 1889. We now frequently ex-port goods of as much value in a single month as were exported in the year

. In 1875 it was communicated to the British government that the khedive Ishmail Pasha, being in desperate need of money, was willing to sell his 176,601 shares of stock in the Suez Canal company at a fair price. Disraeli was then premier and he didn't hesitate a minute. England paid \$20,000,000 for the khedive's holdings, or at the rate of \$113.60 per share. Since then the dividends on its purchase have aggregated \$24,000,000, and today the shares are selling at \$700 each. This shows a profit on the transaction of \$103,600,000.

According to the report of the attornew general of South Carolina to the general assembly of that state, the cir-cuit solicitors have tried since 1888 2,781 cases for murder. During the last five years 938 murder trials have been held, and in 492 of these the verdict was "not cuilty." The murder record for the and in 422 of these the vertice was not guilty." The murder record for the state last year was 222, or nearly five a week. Of these 102 were convicted, but the sentences in many instances were ridiculously inadequate.

Of birds now in existence, probably the one with the greatest expanse of wing in proportion to the body, and with the greatest power of flight, is the frigate or man-o'-war bird. "This bird apparently files more by skill than by strength, for it has no great carrying powers. The wandering albatross, the largest of all sea birds, is also one of our strongest flyers. One bird was known to fly at least 3,150 miles in twelve days.

The noted Japanese gardens, famous for their beauty, owe much of their charm to the quaint lanterns which are used in great profusion. The best of their garden lanterns are made of Some of them are richly carved and are of great intrinsic value. Many of these lanterns are of great antiquity, and the best examples are seen at Nikkho, famous for its exquisite bronzes.

A correspondent in the London Times says that the Chinese care nothing for the provinces of Manchuris. They form no part of the eighteen provinces which fill the Chinese conception of his native and, though they gave birth to the ruling dynasty. This indifference may be real and may account for the ease with which the Russians have overrun the country; yet Manchuria is worth fighting for.

George Fourcloud, Winnebago Brave, Accused of Death of Four Girls.

JURY HOLDS HIM FOR ONE

Recent Death of Cora Elk Is Laid at His Door, Together With the Murders of Three Other Young Women.

Winnebago Agency, Neb., Aug. 10 .-At 4 o'clock Sunday morning the coroner's jury in the case of George Fourcloud, the young Winnebago Indian accused of the murder of Cora Elk, decided that he committed the murder, and held him to the federal grand jury. The young brave, who is only 25 years old, is accused of the murder of no less than four young women of his tribe, and in addition he recently at-tacked and almost killed his mother. He is the worst desperado, if the crimes of which he is accused can be brought finally to his door, that the reservation has ever known. His mania for attacking young women is remarkable

FOUND DEAD ON TRACK.

Man Supposed to Be Engineer Fright-

fully Mangled by Train. Florence, Neb., Aug. 9.-With his body frightfally mangled, Elmer Sites, a locomotive engineer, was found dead on the tracks two miles north of Florence.

Indications are that he had been riding on a freight train and had fallen between the cars. The body was taken to Omaha by Coroner Brailey. Papers and letters on the body give the man's name as Elmer Sites. There was no address except on a letter from a friend, Ida Bays of 2022 De Kalb street, St. Louis, Mo. Cards showed him to be a locomotive engineer and a member of "L. W. Parr Division, 396." The card was signed by George Atherton, expiring February 7, 1903.

A pawn ticket was dated August 2, 1904 at St. Louis, Mo. It is for a telescope and contents, and the amount borrowed was \$6. Other receipts show that he was a member some years ago of a division of the locomotive firemen at Argentine, Kan,

REAL OCCASION OF **ROW WITH TURKEY**

Practically the Sultan Has Shut **Off Diplomatic Relations** With Us.

HE WANTS AMBASSADOR

And as Uncle Sam Sends Only a Minister, He Declines to Be Interviewed, Now Washington Will Try to Scare Him.

Washington, Aug. 8.—Secretary Hay today bluntly told Chekib Bey, the Turkish minister here, that the pa-tience of the American government is well nigh exhausted. The minister is expected to communicate this infor-mation to his covernment speedily mation to his government speedily.

Washington, Aug. 10.—Until the sul-tan of Turkey indicates a willingness to show some regard and respect for the government of the United States and its representatives there will be continuous friction between the two governments. Primarily the sultan has declined to appoint an ambassador to this government and refuses to treat the American minister as having high-er rank than consul. Exception is not made of the United States in this re-gard, for the sultan insists there is no intermediate rank between ambassa-dor and consul. No foreign government that does not think enough of the sultan to send an ambassador to his court can hope for an audience through court can hope for an audience through the usual diplomatic channels. Ambas-sadors can have an audience with the sultan at any time. This is their right with the ruler of any court. A minis-ter plenipotentiary must deal with the grand vizier and officials in the foreign office

When Minister Leishman tries to do When Minister Leishman tries to do anything with the porte this is pointed out to him. When he sees the grand vizier or officials of the foreign office they plead lack of authority to deal with the questions he raises. They are always able to receive that au-thority from the suitan—but they never do On the rare occasions when Mindo. On the rare occasions when Min-ister Leishman sees the sultan he is soothed with promises and there it ends. The sultan will delegate no au-thority to settle these pending differences

America Demands Respect.

As for Chekib Bey, who represents Turkey at this capital, that official, if Turkey at this capital, that official, if indeed he has a title, has never pre-sented his credentials. He is carried in the official directory as "appointed en-voy extraordinary and minister pleni-potentiary." His credentials have never been seen by Secretary Hay, hence the word "appointed." Accordingly there is no method of communication between no method of communication between this government and that of Turkey, and if the American battle ships perfect their target practice under the pal-ace window of Abdul Hamid it will be because of the bumptiousness of that potentate. The present controversy over the recognition of medical degrees conferred by American mission-ary schools at Beirut is merely incidental to the greater issue of compelling proper respect for the American povernment.

Practicing medicine is the larger part of the modern missionary's business. But no physician can practice in the Turkish empire without its authority. The same thing holds in most American states, where every physician must have authority to practice from a state board of medical examiners. In Turboard of medical examiners. In Tur-key, however, pull and backsheesh con-stitute the examination. The necessary, authority has been granted to gradue ates of French mission schools in Tur-key and to those of other countries. It is withheld only from Americans and the native graduates of their schools. For years the state department has tried in vain to get it for them.

well. A Fearful Disaster.

The disaster is the worst that ever occurred on the Denver Rio Grande road. A cloudburst had filled the creek, the water flowing over the trestle when the train, consisting of six cars, started across. The engine, baggage car, smoker and chair car were precipi-tated into the torrent; the diner and two sleepers remained on the track. When Superintendent Bowern reach-

ed the scene the missing cars had not been located. The passengers and trainmen who accompanied him organized a searching party to follow the course of the creek cars and found them close to the shore in Fountain creek. The chair car was a half mile from the scene of the accident, half filled with sand, in which were buried

many bodies. The smoker was washed still further down stream. The body of Engineer Hindman was found 200 feet from the wreck. J. M. Killen, a Pueblo merchant, was swept badly injured and exhausted he was unable to talk coherently. When the train pulled out of Den-

ver last evening nearly every coach was filled and it was running at high speed through the storm to make the fast schedule time, when it dropped through the bridge. TO HAVE LONDON BANK.

Reported That the Standard Oil Group Will Purchase an Old

Institution.

New York, Aug. 10-The National City bank, the most important of banking institutions allied with the Standard Oil interests, according to reports current in local banking circles today, is

negotiating for the purchase of one the London banks, with the purpose of extending its facilities for handling foreign business. James Stillman, president of the National City bank, and himself one of the most active of the Standard Oil group of financiers, is now in Europe. According to reis now in Europe. According to re-ports, it is Mr. Stillman who has been engaged in the task of obtaining control of a bank in London. Confirma-tion of the report could not be had at the National City bank, where it was

said by one of the vice presidents that nothing is known here of such action down stream but crawled out from the wreckage a mile below the accident, so badly injured and exhausted he was would not be carried out by the bank itself, but through financiers working in co-operation, with it, as is usual in

such cases.

The National City bank has been making heavy remittances to London recently. On Friday last it arranged recently. On Friday last it arranged to send abroad \$2,500,000 in gold. This is taken as partly confirming the report of the purchase of a banking institu-tion in London, it being inferred that these remittances are for the purpose of making payment for that bank.

Long Pending Claims Paid.

The state department has found its efforts to get anything else from the Turkish empire equally vain. Long pending claims are unpaid. Official business receives no attention. Letters are unanswered. As far as the United States are concerned the sultan oc-cupies the position of a debtor who has issued a bad check, but who is not yet exempt from arrest and refuses to either receive the collector in his ofeither receive the collector in his of-fice or open any dunning letters sent him. This state of affairs has con-tinued for years—ever since the United States had diplomatic relations with Turkey, in fact. Minister Leishman, who is a Carnegie millionaire from Pittsburg, has failed, as has his prede-cessors, although he has made more progress in the way of making the Turks sit up and think than have any Turks sit up and think than have any of the others. Some of his language in official communications has been of the curtest and most vigorous known to diplomatic history. Now a powerful naval display with

Now a powerful hava display will be made for the sultan's especial bene-fit. In the slang of the street the ad-ministration will try to "throw a scare into him." Efforts which have been in progress for some time to secure an adjustment of this question would have been much nore successful, it is as-sured, but for the frankness of the American press. America has had a quadron of the navy at Fiume, but it was soon cabled abroad that it would pot go further, but from there would return to Gibraltar. The Turkish of-ficials naturally saw this information and forwarded it to the sultan for his eassurance.

Porte Has Been Jarred.

Constantinople, Aug. 10.—The an-nouncement of the dispatch of the American European squadron to Smyrna has perturbed the porte, and will doubtless hasten the solution of the questions at issue between the United States and Turkey in a manner satisfactory to the former.
