CLEARING HOUSE FOR INDIANS.

\$1,000,000 a Year of Tribal Money. Kansas City Journal: A vast amount of business passes through the Union Indian agency at Muskogee, Indian Territory, every day, Fentress Wis-dom, clerk in charge of the agency,

dom, clerk in charge of the agency, says that it is now sending out an average of 600 letters a day and re-ceiving fully as many. Some weeks as high as 4,000 letters are sent out. The Indian agency performs many of the functions of a big bank or clear-ing house. It is estimated that more than \$1,000,000 passes through the hands of the Indian agent each year, some of which he handles twice. This does not include money paid out for does not include money paid out for salaries or running expenses of the agency, but merely the funds which are intrusted to him arising from tribal

Mr. Wisdom estimates that the agency at Muskogee handles as much business as all the other Indian agencies in the United States combin-ed. It handles the finances of five of the most powerful and highly civilized of Indian tribes, some of which are immensely wealthy and none of them lacking revenues.

lacking revenues. In the Choctaw and Chickasaw na-tions the common funds of the two In the Choctaw and Chickasaw ha-tions the common funds of the two tribes receive big revenues from the coal and asphalt lands, as well as from the oil and gas fields. These revenues arise largely from leases and royatties. They are placed in the hands of the Indian agent to go into the educational funds of the two nations. Vast sums of money also flow into the coffers of the Choctaw and Chickasaw nations from the sale of town sites and town lots. This year nearly \$1,000,000 has been placed to the credit of the Indian agent to be paid per capita to the citi-zens of the two nations. A large ad-ditional sum will be placed to the credit of these nations from the sale of segregated coal lands, which will be distributed by the Indian agent. The heavlest revenues in the Creek

The heaviest revenues in the Creek nation come from interest on bonds representing loans to different states and paying 4 and 5 per cent. interest annually. The nation receives \$125,-000 interest annually on these bonds. The revenues from mineral royalties and the cattle tax in the Creek and and the cattle tax in the creek and Cherokee nations pass through the hands of the Indian agent, but instead of being placed to the credit of the nations collectively, the money is paid out to individual citizens.

A continual stream of money orders is coming into the Indian agent's of-fice every day, representing payments upon town lots which have been pur-chased by individuals after the town site appraisements have been made. So many of these come through the Muskogee postoffice at times that the postmaster runs out of money with which to cash them, and has to suspend payment temporarily until he can send out and replenish his ready cash.

To Keep Rid of Moths. This is a season of the year when

provident housewives have all the closets thoroughly renovated, as it is the month in which the moths do their work. Everything should be removed from the closet, all boxes opened and their contents carefully examined. Anything in the shape of wool must be hung in the open for a few hours, thoroughly brushed and wrapped up in a clean piece of cloth, several moth balls being inserted in the package. Nothing is more wholesome for a closet than calcimine.

It should be allowed to dry thor-oughly before the door is closed. Shelves and drawers should be remov-Shelves and drawers should be remov-ed and thoroughly cleansed. It is even better if possible to treat them to sev-eral coats of fresh paint, as there is nothing that kills moths or vermin generally sooner than fresh paint. In addition to this thorough clean-ing many housewives paint the crev-ices and seams in the floor with oil of turpentine or with oil of cedar. But these are really not necessary if moths are not discovered in the closet. This is, as well, the month to put away winter clothes. Naturally, if the pocketbook is a long one, valuable furs of all kinds are sent either to a furrier or to cold storage to be kept during the warm months. It is, however, very

Each article should be thoroughly aired and thoroughly brushed; in fact, many times it will be found in the end more economical if they are sent to the cleaner's or tailor's and thor-oughly sponged, as dirt is the moths' most certain means of subsistence. In putting away fur-lined garments or articles trimmed with fur, news-

A few moth balls should be used, and the ar-ticle to be stored away wrapped in paper or in close, coarse muslin. The object is to exclude the air as well as to hermetically the package so that insects cannot enter into it.

Don't Poison Baby.

FORTY YEARS AGO almost every mother thought her child must have PAREGORIC or laudanum to make it sleep. These drugs will produce sleep, and A FEW DROPS TOO MANY will produce the SLEEP FROM WHICH THERE IS NO WAKING. Many are the children who have been killed or whose health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are prohibited from selling either of the narcotics named to children at all, or to anybody without labelling them "poison." The definition of "narcotic" is: "A medicine which relieves pain and produces sleep, but which in poisonous doses produces stupor, coma, convulsions and death." The taste and smell of medicines containing opium are disguised, and sold under the names of "Drops," "Cordials," "Soothing Syrups," etc. You should not permit any medicine to be given to your children without you or your physician know of what it is composed.
