

# GOVERNOR OF OREGON

## Makes Use of His Family

## Pe-ru-na in For Colds.

CAPITOL BUILDING, SALEM, OREGON.

Peruna is known from the Atlantic to the Pacific. Letters of congratulation and commendation testifying to the merits of Peruna as a catharr remedy are pouring in from every State in the Union. Dr. Hartman is receiving hundreds of such letters daily. All classes write these letters, from the highest to the lowest.

The outdoor laborer, the indoor artisan, the clerk, the editor, the statesman, the preacher—all agree that Peruna is the catharr remedy of the age. The stage and rostrum, recognizing catharr as their greatest enemy, are especially enthusiastic in their praise and testimony.

Any man who wishes perfect health must be entirely free from catharr. Catharr is well-nigh universal. Peruna is the best safeguard known.

Ask Your Druggist for Free Peruna Almanac for 1906

### A Letter From the Ex-Governor of Oregon.

The ex-Governor of Oregon is an ardent admirer of Peruna. He keeps it continually in the house. In a letter to Dr. Hartman, he says:

STATE OF OREGON,  
EXECUTIVE DEPARTMENT.  
The Peruna Medicine Co., Columbus, O.  
Dear Sirs—I have had occasion to use your Peruna medicine in my family for colds, and it proved to be an excellent remedy. I have not had occasion to use it for other ailments. Yours very truly,  
W. M. Lord.

It will be noticed that the Governor says he has not had occasion to use Peruna for other ailments. The reason for this is, most other ailments begin with a cold.

Another in High Finance. From the Chicago Record-Herald. People who are interested in the intricacies of high finance will not be likely to overlook the case of Mr. and Mrs. Ralph Savage of Frederick county, Virginia. Some time ago Mrs. Savage secured a divorce and was awarded alimony of \$400 a year for life. To secure the payment of this money she secured a trust deed on her former husband's property. Matters having thus been settled, the two were remarried, after which Savage went into bankruptcy with heavy liabilities. His creditors endeavored to levy on his property, but the courts found that the trust deed to cover the payment of the \$400 a year alimony as long as his wife lived shut out everybody else.

The scheme is so simple that it is a wonder nobody ever worked it before, and it will doubtless readily commend itself to many of the people who are trying to "get ahead" and find it slow work on account of their inability to establish relationship with our eminent life insurance presidents. We deem it our duty in this connection, however, to sound a solemn warning. Women who deliberately take the course that was adopted by the Virginia lady do so at a great risk. What if their husbands, being free, decline to go on with the program? Some men might be just mean enough to be willing to pay \$300 or \$400 a year alimony rather than get married again. The lady to whom the proposition is made should always consider the possibility of such a contingency. Even here we find that the element of chance enters largely into the case. Is there no way of getting ahead without encountering it?

Japan expects to boom in electric railways.

### The President as a Hunter.

From the Country Calendar. Mr. Roosevelt's success and a great part of the pleasure in hunting come in large measure from the fact that by temperament and inclination he is a naturalist. When Mr. Roosevelt went to Harvard in 1876, he intended to take a scientific course there and to become a naturalist. This he probably would have done except for the influence of the instructors at Cambridge. They wished him to go into the laboratory and study the low forms of invertebrate life and to devote himself to the cutting of sections and the study of cells. They told him that the day of the field naturalist had passed, that his work had all been done and that there was no future for a man in study of that sort. Theodore Roosevelt, however, did not care to spend his life in cutting sections and mounting them on slides and then studying them through a microscope. Nevertheless those early years of study and observation left their mark on his character. As a boy he went to Egypt and while there made a collection of Egyptian birds, which he afterward gave to the national museum in Washington, where they now are. An important contribution to ornithology was made many years ago, when he sent to the national museum certain Long Island specimens of seaside finches, which enabled the committee on nomenclature of the American Ornithologists' union to decide as to the validity of certain alleged species and subspecies at a time when no other specimens were available on which the decision could be based.

In 1902 when the president went bear hunting in Mississippi, he secured a number of bear skulls which he sent to the biological survey, and by this established the fact that the bear of that region is *Ursus luteolus* of Griffith, a little-known form, very different from the ordinary black bear.

President Roosevelt's writings on big game have given us the best accounts extant of the life and habits of the species of which he has written. All his papers on hunting, nature and wilderness travel reveal the close observation and accurate knowledge of a naturalist. If this is a long explanation of the influence which moves President Roosevelt as a sportsman, it is not too far from the truth. His interest in sport and success in it. A great naturalist was lost to the world when politics and statesmanship took the place in his mind of nature study and science.

### Nitroglycerin for Fuel.

Illustrative of possibilities in future warfare, William K. Stewart in his story, "The Flight of the Nixon II," in the December issue of the *Technical World Magazine*, describes a fuel composed of nitroglycerin and gunpowder, which generates a speed in a submarine of fifty miles an hour. One of the characters relates the story:

"I was in the boiler room when we needed more speed than the boiler-fed engines could give, and the order went down to change from coal to explosive. Long rods of compound of nitroglycerin and gunpowder, a foot in diameter, solidly encased in steel cylinders which forced the burning from only one end, were attached to auxiliary engines and turbines. A stream of water was turned on, and the explosion, burning without atmospheric oxygen under a pressure of 250 pounds to the square inch, and mixing with the water, generated a power of 25,000 pounds' pressure per square inch.

"As the rush of the new motive was felt on the turbines, the boat, already going at eighteen miles an hour, leaped like a spurred horse jaggling in a race, and in a minute we were speeding at a rate a little short of fifty miles an hour. A great mountain of water welled up in our wake, following and towering over us to a height above the level of the conning tower. Within the latter the dash of the spray against the armor and the rush of the air made hearing difficult."

### Things That Went Wrong.

From the Chicago Tribune. When Mr. Columbus Gadsden, a west side clothing merchant, went home from his store one evening last week his wife asked him if he noticed a strange and oppressive smell that seemed to fill the house.

"Of course I notice it," he said. His keen nostrils had recognized the odor of escaping gas as soon as he entered the building. In order to be sure about it, however, he went down into the basement to make an examination. Following his nose he groped his way to a far corner, where the odor was almost overpowering. Thoughtlessly he struck a match. The result surprised him. On the floor he found a huge cabbage in the last stages of decomposition.

On board the lake steamer bound for St. Joe one fine day a few weeks ago were two young persons whose names, for obvious reasons, are suppressed. They seemed to avoid each other while on the boat. It was observed, however, that they left the steamer together and went to a hotel. Leaving his fair companion there the young man went to the court house and hunted up the county clerk. "Say," he whispered to that dignitary, "you ought to know something about such matters. Can you direct me to a good, low priced lawyer? My wife and I want to get a divorce."

### MERCILESS ITCHING.

Another Speedy Cure of an Itching Humor with Loss of Hair by the Cuticura Remedies. "For two years my neck was covered with sores, the humor spreading to my hair, which fell out, leaving an unsightly bald spot, and the soreness, inflammation, and merciless itching made me wild. Friends advised Cuticura Soap and Cuticura Ointment, and after a few applications the torment subsided, to my great joy. The sores soon disappeared, and my hair grew again, as thick and healthy as ever. I shall always recommend the Cuticura Remedies. (Signed) Harry J. Spalding, 104 West 104th street, New York City."

### She Sent Him Off.

From the New York Weekly. Clara—I am ashamed to hear that you have broken your engagement. Dora—What else could I do? His beard is so stiff and rough that I was continually going about with my face full of scratches.—New York Weekly.

## W. L. DOUGLAS

### \$3.50 & \$3.00 SHOES FOR MEN

W. L. Douglas \$4.00 Gilt Edge Line cannot be equalled at any price.

W. L. DOUGLAS MAKES AND SELLS MORE MEN'S \$3.50 SHOES THAN ANY OTHER MANUFACTURER.

**\$10,000** REWARD to anyone who can disprove this statement.

W. L. Douglas \$3.50 shoes have by their excellent style, easy fitting, and superior wearing qualities, achieved the largest sale of any \$3.50 shoe in the world. They are just as good as those that cost you \$5.00 to \$7.00—the only difference is the price. If I could take you into my factory at Brockton, Mass., the largest in the world under one roof making men's fine shoes, and show you the care with which every pair of Douglas shoes is made, you would realize why W. L. Douglas \$3.50 shoes are the best shoes produced in the world.

If I could show you the difference between the shoes made in my factory and those of other makes, you would understand why Douglas \$3.50 shoes cost more to make, why they hold their shape, fit better, wear longer, and are of greater intrinsic value than any other \$3.50 shoe on the market to-day.

W. L. Douglas Strong Boys' School & Dress Shoes, \$2.50, \$2.00, \$1.75, \$1.50

**CAUTION.**—Insist upon having W. L. Douglas shoes. No imitations. Name genuine without his name and price stamped on bottom.

WANTED. A shoe dealer in every town where W. L. Douglas shoes are not sold. Full line of samples sent free for inspection upon request. Foot Color Eyelets used; they will not wear brass. Write for Illustrated Catalog of Full Styles. W. L. DOUGLAS, Brockton, Mass.

Gray Hair Restored to its natural color. Harmless, guaranteed. Never fails. Particulars free. Vegetable Remedy Co., Dept. 6, Shamokin, Pa.

PLEASE MENTION THIS PAPER.

## YOU WRONG YOURSELF TO SUFFER

from Constipation and Stomach Trouble.

Why suffer or take needless chances with constipation or stomach troubles when there is a perfect, harmless, natural, positive cure within your reach?

### CONSTIPATION AND STOMACH TROUBLE

cause blood poison, skin diseases, sick headache, biliousness, typhoid fever, appendicitis, piles and every kind of female trouble as well as many others. Your own physician will tell you that all this is true. But don't drug or physio yourself. Use

## MULL'S GRAPE TONIC

the natural, strengthening, harmless remedy that builds up the tissues of your digestive organs and puts your whole system in splendid condition to overcome all attacks. It is very pleasant to take. The children like it and it does them great good.

25 cent, 50 cent and \$1.00 bottles at all druggists. The \$1.00 bottle contains about six times as much as the 25 cent bottle and about three times as much as the 50 cent bottle. There is a great saving in buying the \$1.00 size.

MULL'S GRAPE TONIC CO., 21 Third Ave., Rock Island, Ill.

## PISO'S CURE FOR CONSUMPTION

CURES WHERE ALL ELSE FAILS.

Best Cough Syrup, Tastes Good. Use in time. Sold by druggists.

This name stands for the best kerosene made in the world. A pure Pennsylvania product. No oil "just as good." Try a gallon. It's the kerosene you've been looking for. Marshall Oil Co., sole refiners, Marshalltown, Ia., Lincoln, Neb.

"Chewing the Rag." From the Montreal Herald. "He kept chewing and chewing, Yer Honor, and I threw him out." "Kept chewing what?" "He kept on chewing the rag." "What rag?" I see no rag mentioned in the indictment. This seems to be an assault case. I am not supposed to have even a nodding acquaintance with all this slang, not any more than I am expected to be able to understand all the various languages of the African black."

It may come that Recorder Wier and many others may care to hear of its origin. That high honor belongs to Tommy Atkins of the British army.

Walking his weary rounds on a cold night, Tommy of the earlier days was wont to carry a piece of cloth rag between his teeth, tobacco at the time being probably too expensive for general and salivary purposes. That rag the soldier boy chewed hard and fast, doubtless to keep his bad temper from flowing out of him in words, the while he kept muttering in his throat his accumulation of grumblings against all in authority over him, with more particular reference to the individual who was responsible for his being on sentry-go when the hard pallet of the barracks dormitory would have better filled the bill.

By and by it came to be that all discontented mutterings and complainings in an undertone came to be set down in the vocabulary of Tommy as "a-chewin' of the rag."

Piso's Cure for Consumption cured me of a tenacious and persistent cough.—Wm. H. Harrison, 227 W. 121st street, New York, March 25, 1901.

Girls Drink Goats' Milk. From the Chicago Chronicle. "Do they need all those for the frat initiation?" "No, they have introduced a course for Alpine shepherdesses." "You're both wrong. It's for the complexion," and the last speaker came nearer than either of the others to solving the problem which puzzled Winnetka residents Monday, when a herd of fifteen goats were driven through that fashionable suburb and to the entrance of the Gorton school for girls.

The goats came all the way from Switzerland and will furnish milk for those among the young women whose health demands that particular form of nourishment.

"The goats are of two breeds, Pocaburg and Sonnaul," said Mrs. G. L. Cook, in charge of the dietary at the seminary. "None of the girls will be obliged to drink the goats' milk unless she is ill and needs, but any who desire may make it a regular part of their diet."

The Pennsylvania railroad is planting trees so as to provide cross-ties for use up to twenty years from now.

The Baptist women of the world are supporting 300 missionaries.

# LYDIA E. PINKHAM

## A BRIEF SKETCH OF HER LIFE

How the Vegetable Compound Had Its Birth and How the "Panic of '73" Caused it to be Offered for Public Sale in Drug Stores.

## THE STORY READS LIKE A ROMANCE

This remarkable woman, whose maiden name was Estes, was born in Lynn, Mass., February 9, 1819, coming from a good old Quaker family.

For many years she taught school, and during her career as a teacher she became known as a woman of an alert and investigating mind, and an earnest seeker after knowledge, and above all, she was possessed with a wonderfully sympathetic nature.

In 1843 she married Isaac Pinkham, a builder and real estate operator, and their early married life was marked by prosperity and happiness. They had four children, three sons and a daughter.

In those good old-fashioned days few drugs were used in medicines; people relied upon nature's remedies, roots and herbs, which are to-day recognized as more potent and efficacious in controlling diseases than any combination of drugs.

Mrs. Pinkham from her youth took a deep interest in medicine, in botany—the study of roots and herbs, their characteristics, and power over disease; she believed that as nature so bountifully provides food for the body so she also provides medicine for the ills and weaknesses of the body, in the roots and herbs of the field, and as a wife, mother and sympathetic friend, she often made use of her knowledge of roots and herbs in preparing medicines for her family and friends.

Knowing of so much suffering among her sex, after much study and research, Mrs. Pinkham believed that the diseases of women have a common cause, and she set to work to find a common remedy—not at that time as a source of profit, but simply that she might aid the suffering.

How her efforts have been rewarded the women of the world know to-day. In 1873 the financial crisis struck Lynn. Its length and severity was too much for the large real estate interests of the Pinkham family, as this class of business suffered most from this fearful depression, so when the Centennial year dawned it found their property swept away.

At this point the history of Lydia E. Pinkham's Vegetable Compound commences:

The three sons and daughter, with their mother, combined forces to restore the family fortune. They resolved to give to the world the vegetable compound that Mrs. Pinkham

had so often made from roots and herbs for such of her women neighbors and friends who were sick and ailing. Its success in those cases had been wonderful—its fame had spread, and calls were coming from miles around for this efficacious vegetable compound.

They had no money, and little credit. Their first laboratory was the kitchen, where roots and herbs were steeped on the stove, gradually filling a gross of bottles. Then came the question of selling it, for always before they had given it away free. They hired a job printer to run off some pamphlets setting forth the merits of the medicine, now called Lydia E. Pinkham's Vegetable Compound, and these pamphlets were distributed by the Pinkham sons in Boston, New York and Brooklyn.

The wonderful curative properties of the medicine were, to a great extent, self-advertising, for whoever used it recommended it to others, and the demand gradually increased.

In 1877, by combined efforts, the family had saved enough money to commence newspaper advertising on a small scale, and from that time the growth and success of the enterprise was assured, until to-day Lydia E. Pinkham and her Vegetable Compound have become household words everywhere, and thousands of pounds of roots and herbs are used annually in making this great remedy for woman's ills.

Although Lydia E. Pinkham passed to her reward some years ago, the perpetuation of her great work was guarded by her foresight.

During her long and eventful experience she was ever methodical in her work and was careful to preserve a record of every case that came to her attention. The case of every sick woman who applied to her for advice—and there were thousands—received careful study, and the details, including symptoms, treatment and results, were recorded for future reference, and to-day these records, together with thousands made since, are available to sick women the world over, and represent a vast collaboration of information regarding the treatment of woman's ills which, for authenticity and accuracy, can hardly be equaled in any library in the world.

Another act of foresight on the part of Lydia E. Pinkham was to see that some one of her family was trained to carry on her work, and with that end in view, for years before her death, had as her chief assistant her daughter-in-law, the present Mrs. Pinkham. Therefore, under the guidance and careful training of Lydia E. Pinkham, and a vast experience of her own, covering twenty-five years, the present Mrs. Pinkham is exceptionally well equipped to advise sick women, which she is always glad to do free of charge.

The record of Lydia E. Pinkham's Vegetable Compound, made of simple herbs and roots, is a proud and peerless one. It is a record of constant conquest over the obstinate ills of women, greater than that of any other one medicine of its kind in the world, and will ever stand as a monument to that noble woman whose name it bears.

## Mayer's HONORBILT Shoes for Men

These elegant, stylish and up-to-date shoes are made of the finest leather. They are built over "foot form" lasts that insure a perfect fit and are guaranteed to wear better than most shoes sold at higher prices. Every piece of material used is honest. The workmanship is perfect; style correct.

**They are built on honor.**

Let your next pair of shoes be "Honorbilt." Your shoe dealer will supply you. If he refuses write to us. See that the name "Honorbilt" and Mayer trade-mark appear on the sole. It is a guarantee of quality. We make the "Western Lady" and the "Martha Washington Comfort shoes."
