The **Food Value** of a Soda Cracker

You have heard that some foods furnish fat, other foods make muscle, and still others are tissue building and heat forming.

You know that most foods have one or more of these elements, but do you know that no food contains them all in such properly balanced proportions as a good soda cracker?

The United States Government report shows that soda crackers contain less water, are richer in the muscle and fat elements, and have a much higher per cent of the tissue building and heat forming properties than any article of food made from flour.

That is why Uneeda Biscuit should form an important part of every meal. They represent the superlative of the soda cracker, all their goodness and nourishment being brought from the oven to you in a package that is proof against air, moisture and dust-the price being too small to mention.

You are required to answer said petition on or before Monday, the 12th day of Febru-ary, 1906. Laura Perkins, Plaintiff.

The Salts In the Ocean.

The salts of the sea have fed throughout all time countless living things which have thronged its water and whose remains now form the rocks of continents or lie spread in beds of unknown thickness over 66,000,000 square miles of the 143,000,000 square miles of the ocean's floor. They have lent the substance to build the fringing reefs of the land and all the coral islands of the sea, and there are at present on the basis of an average salinity of 31/2 per cent in the 290,700,000 cubic miles of water which make up the ocean's 90,000,000,000,000,000 tons, or 10,173,-000 cubic miles, of salt. This is sufficient to cover the areas of all the lands of the earth with a uniform layer of salt to a depth of 1,000 feet.

Costs 10 cents and equals 20 cents worth of any other kind of bluing. Won't Freeze. Spill, Break
