

# Break Loose From the Creamery Trust

Farmers Organize to Manufacture and Market Their Own Product.

If you are tired of milking cows and getting small returns; If you want more money for your butter fat; If you want to be freed from the danger of combinations to keep down the price paid you; If you want to get the most for your cream, and to have a voice in its manufacture and sale, you will join the great movement for Co-OPERATION that is sweeping over the state like wildfire and become a member of the

## Farmers Co-Operative Creamery and Supply Co.

It is your only hope of getting your share of profits from your milk cows. You do the hard work—you ought to reap the profit.

Organize! Co-operate! Control the manufacture and sale. That's the only way.

This movement will unite 5,000 cream producers in a purely co-operative movement.

The society—incorporated under the laws of Nebraska, has already purchased the immense plant, equipment and business of the Harding Cream Co. of Omaha, with more than 3,000 patrons and a well established trade.

So we start with a growing, paying business. No money need be spent in experimenting or in pioneer work.

Our plant has a capacity of 40,000 pounds of butter, 5,000 gallons of ice cream, 25 tons of ice per day, and a good market for every pound we produce.

Members of the association not only share in the profits of this entire business, but also have their butter fat manufactured and marketed at actual cost.

Will you, as a cream producer and a clear-headed business man, join with us in the movement for co-operation and control of our products?

Why not reap our legitimate profits from our cream?

Why let them go to enrich a corporation or combination?

Why not be our own masters?

House Roll No. 343, a bill introduced by Hon. S. W. Green of Ewing, is a very important bill as it provides for an appropriation of \$7,500 for special investigation in animal diseases, giving particular attention to malarial or swamp fever in horses, corn stalk disease in cattle and tuberculosis in hogs. In Holt county alone 199 horses averaging four years of age, died of what is called swamp fever since 1903, and their total value was \$27,197. Mr. Green's efforts are in the right direction, and we feel assured his constituents will appreciate them.—The Advocate.
