# Not a Born Forger.

The indorsement of checks is a very simple thing, but, as the following story will show, it, too, has its difficulties:

A woman went into a bank where she had several times presented checks drawn to Mrs. Lucy B. Smith. This face of the earth or are serving prison | time the check was made to the order of Mrs. M. J. Smith-M. J. were her husband's initials. She explained this to the paying teller and asked what she should do.

"Oh, that is all right," he said. "Just indorse it as it is written there." She took the check and, after much hesitation, said, "I don't think I can make an M like that."

Animal hair differs in construction from that grown on a human head. In human hair the upper skin is smooth and thin. The circular section is comparatively broad, forming the main part of the hair shaft. It is striped in appearance and carries the color matter. The tubular part is thin, extending to about one-fifth and certainly not more than to one-quarter of the entire width of the hair. Animal hair also consists of three parts, but these are differently constructed, the tube often filling the entire hair.

# Heart Beat

Yes. 100,000 times each day. Does it send out good blood or bad blood? You know, for good blood is good health; bad blood, bad health. And you know precisely what to take for bad blood - Ayer's Sarsaparilla. Doctors have endorsed it for 60 years.

One frequent cause of bad blood is a sluggish liver. This produces constipation. Poisonous substances are then absorbed into the blood instead of being removed from the body daily as nature intended. Keep the bowels open with Ayer's Pills, liver pills. All vegetable.

# The Exposition At Jamestown.

WILLIAM COUPER.

O educate along the lines of national history is the great object of the Jamestown exposition. From April 26, when President Roosevelt will press the button, start the machinery and make a speech, to Dec. 1, when the gates will close, the people who visit the show will be kept busy replenishing their stores of historical knowl-

things have happened in the vicinity of Jamestown island since the little fleet of three ships under Captain Newport landed some passengers on its shores 300 years ago on May 13 next. It was on April 26, 1607, that Charles and up the river which they named the James, after the reigning monarch. So April 26 was chosen for the opening day of the exposition, May 13 being designated as the day for the beginning of the great naval display. Jamestown island, where the English settlers built James fort and James City, afterward called Jamestown, has been deserted for more than two centuries, so it was not a good place to hold an exposition. About all that is there now is the tower of the ruined church which the colonists built in 1620. Jamestown island is about thirty-five miles up the James river and is easily reached by boat from the exposition grounds, which overlook the waters of Hampton

edge, and they will be surprised to

Roads about five miles from Norfolk. The architecture of the buildings is colonial, to conform to the his-

COUPER'S STATUE OF CAPTAIN JOHN SMITH.

torical keynote of the exposition. Out into Chesapeake bay from the exposition grounds the United States government has built long piers, inclosing what is to be known as Smith harbor in honor of the gallant Captain John Smith, to whose indefatigable efforts in behalf of the Jamestown colony its preservation was chiefly due. One goes ashore from Smith harbor at Discovery landing and finds himself standing in Raleigh square. Even the exposition playground, which at Chicago was called the Midway Plaisance, at Buffalo the Midway, at St. Louis the Pike ated from Columand at Portland the Trail, is called here the Warpath in sacred memory of the red men who took to the warpath in war paint, to the great alarm of the colonists.

It was on one of these historic occasions that Captain Smith had a narrow escape from death, and the Indian princess, Pocahontas, who, according to the story, saved his life at the risk of her own, has been commemorated by a beautiful statue, the work of the sculptor William Ordway Partridge. Smith, too, is to be preserved in bronze. His statue is now being cast at the foundry and will be unveiled on Jamestown island in the autumn. The impressive figure, eight feet in height, will be placed on a stone pedestal eleven feet in height, so that it may be seen from the decks of all steamers passing up and down the river. It is the work of William Couper, one of the best known of American sculptors and a Virginian by birth. He is fifty-three years of age and studied as a young man with Thomas Ball, whose daughter he married. For twenty-two years his studio was in Italy, but he now maintains one in New York. Couper has very effectively portrayed the redoubtable Smith as a courtier, left hand resting on the hilt of his sword and in his right hand holding a book, for he was ready with sword and

Captain Smith was one of the most picturesque figures in the history of the colonies. Whatever exaggerations there may have been in his descriptions of his travels, he at any rate rendered the most valuable service to the struggling colony at Jamestown.

HE Rev. C. F. Aked, who has come from Liverpool to take charge of the Fifth Avenue Baptist church, New York, protests against its being called "Rockefeller's church." He says: "Mr. Rockefeller is not officially connected with REV. C. F. AKED. the Fifth Avenue

church. It isn't fair to the church to have Mr. Rockefeller's name associated with it all the time. It is a powerful church without Mr. Rockefeller." He added that it is not a millionaires' church and that he wanted shopgirls and workingmen just as much as richer people in his congregation.

Mr. Aked is forty-two years old, a native of Nottingham and was auctioneer, clerk and sheriff's deputy before entering the Baptist ministry. Until his health broke down he was a devotee of outdoor sports-golf, cycling and hunting. He was threatened with tuberculosis and spent eighteen months in the Alps. He comes to this country in the hope that the climate will agree with him better than that of Liverpool, where for sixteen years he was in charge of Pembroke chapel. He is known as the "Fighting Parson" because of his fearlessness of speech. During the war against the Boers he freely criticised the British policy. At a time when his countrymen had met with crushing defeat in the Transvaal he announced a lecture on the iniquity of the British rule for the following Sunday. Two hundred policemen came to his Liverpool chapel to preserve order. So great was the excitement that Mr. Aked and his wife were forced to leave the building by a side door. mob of 1,000 persons followed their carriage, tried to wreck Mr. Aked's dwelling and shattered the windows.

Dr. Felix Adler, who has been appointed Roosevelt professor at the University of Berlin for the years 1908-09 in succession to Professor Burgess, is professor of social and political ethics at Columbia university. He is more widely known, however, as founder of the Society For Ethical Culture, which has for its motto "Diversity In Creed; Unanimity In Deed." He was born in Alzey, Germany, in 1851. His father, who was at one time rabbi of Temple Emmanuel, New York,

brought him to this country when he was five years old. The boy was educated to be a rabbi. but found when he came to manhood that he could not accept in its entirety the Jewish system of doctrines. He gradubia in 1870, being a classmate of Seth Low, afterward

president of Co-DR. FELIX ADLER. lumbia and also mayor of New York. He studied at Berlin and Heidelberg universities and from the latter obtained the degree of Ph. D. He was for several years professor of Hebrew and oriental languages at Cornell and in 1876 founded the Society For Ethical Culture, which now has branches in most of the large cities of the world. Its aim is not to antagonize regularly established churches, but to carry on work for humanity along nonsectarian lines. Dr. Adler has been identified with movements for tenement house betterment, manual training, kindergartens for poor children and other reforms.

### MRS. JOSEPH B. FORAKER.

Clever Wife of Senator From Ohio and Her Aspirations.

Mrs. Joseph Benson Foraker, whose husband is contesting the political field in Ohio with Secretary William H. Taft, has a contest of her own on her hands. While Serator Foraker is appealing to the Republicans of the Buckeye State to indorse his presidential aspirations his wife is seeking the indorsement of her claims to the headship of the Daughters of the American Revolution.

She was Miss Julia Bundy and graduated from the old Ohio Wesleyan college at Delaware, O., in 1868. It was there that she met Captain Foraker. who had gone into the war at sixteen and come out at nineteen and who took a course at Delaware, finishing his studies at Cornell university. She married the senator in 1870.

Mrs. Foraker keeps among her souvenirs a pair of slippers, once white, now

yellow with age. When Benjamin Harrison was inaugurated in Washington Mrs. Harrison naturally had an extremely busy day. When evening came she was greatly fatigued, and her feet, cased in new shoes all day, were aching. Her inauguration ball slippers were of pearl embroidered white satin. She managed to get them on, but when she arrived in the ballroom she was in agony. She took off her slippers, and the consequence was that when it came time to lead the grand march she could not get them on again. Mrs. Foraker was near by and offered her own slippers. They "felt like heaven," said Mrs. Harrison. Thereupon Mrs. Foraker said, "You wear them through the evening, and I will keep on my street boots." It saved the grand march. Mrs. Harrison presented her own slippers to her friend.

When a Trout Is Hungry.

A curious incident, showing that trout will not be easily frightened from a book when they are hungry, is told by a Maine sportsman. He felt a good bite, but before he could haul in the fish it broke loose and got away. He readjusted his balt and made another cast. In a minute the hook was again taken, and he pulled in a two pound trout. It was booked in the side of the mouth, while upon the other side a piece more than an inch long had been torn from the jaw, and the wound was still bleeding. This showed conclusively it was the same fish that had just taken the hook and had got away. The singular part was that a fish so badly wounded should bite a second
