Can., writes: "I had not been well for about four ears. I had kidney trouble, and, in fact, felt badly nearly all the time.

"This summer I got so very bad I sught I would try Peruna, so I wrote to you and began at once to take Peruna Manalin. "I took only two bottles of Peruna and one of Manalin, and now I feel bet-ter than I have for some time.

"I feel that Peruna and Manalin cured me and made a different woman of me altogether. I bless the day I picked up the little book and read of your Peruna."

It is the business of the kidneys to remove from the blood all poisonous materials. They must be active all the time, else the system suffers. There are times when they need a little assistance. Peruna is exactly this sort of a remedy. It has saved many people from disaster by rendering the kidneys service at a time when they were not able to bear their own burdens.

"Il love them," said an Atchison man to-

day, of his grandchildren, "but they near-ly set me crazy." (Chart: They live at

There was a fracas at the Globe office yesterday afternoon, and perhaps the truth about it will be interesting. For many years, railroad officials have had a habit of visiting towns on their lines once a year. Led by the local agent, they visit the newspaper offices, althought the railroad officials do not care to see the nine years, owing to passes, but passes having been withdrawn January 1, 1907, we rebelled yesterday; when Jim Garside eared at this office with a party of the Fe officials, we refused to let them appeared at this office with a party of Santa Fe officials, we refused to let them in. We regarded Jim Garside as the principal offender, since he knew the officials did not care to see us, and since we have often told him we did not care to see the officials, therefore we pushed him down the steps, which started the story that there had been a fight. In the railroad nger traffic manager, the general passenger agent, the second vice president, and two or three officials whose names we did not learn. We are tired of these officials looking over our office with a super-for air which seems to say: "These dubi air which seems to say: "These dub having been withdrawn, we do

CHANGE IN FOOD

Works Wonders in Health.

It is worth knowing that a change the food can cure dyspepsia. "I deem at my duty to let you know how Grape-Nuts food has cured me of indi-

"I had been troubled with it for years, until last year my doctor recpmmended Grape-Nuts food to be used every morning. I followed instructions and now I am entirely well.

"The whole family like Grape-Nuts, we use four packages a week. You are welcome to use this testimonial as you see fit."

The reason this lady was helped by the use of Grape-Nuts food is that it is predigested by natural processes and therefore does not tax the stomach as the food she had been using; it also contains the elements required for ilding up the nervous system. If that part of the human body is in perfect working order, there can be no dyspepsia, for nervous energy represents the steam that drives the engine.

When the nervous system is run down, the machinery of the body works badly. Grape-Nuts food can be used by amail children as well as adults. It As perfectly cooked and ready for in-

Corn Pudding.

Drain one can of corn and chop finely; mix with a cup and a half of milk, two beaten eggs, half a cup of cracker crumbs, one tablespoon of sugar, and salt and pepper to taste. Beat hard, pour in a buttered pudding dish, bake covered for fifteen or twenty minutes, then uncover and brown. Succotash may be used in the same way. This makes an excellent luncheon or supper dish, and with a little cold meat and with good bread and butter furnishes a substaptial meal. Corn Pudding.

Rice With Tomato Sauce.

Rice With Tomato Sauce.

Form plain boiled rice into croquettes, using a very little flour and white of eggs to hold the particles together. Roll in breadcrumbs, place in a wire basket and fry in deep fat. Place where they will keep warm, and then drain a can of tomatoes, adding a little of the pulp if it is desired. Place over the stove and thicken with a little cornstarch or arrow-root. Pour over the croquettes on the platter and serve at once.

Custard Pie.

Three tablespoons of sugar, one tablespoon flour, one teaspoon of but-ter; the yolks of two eggs, beat them to a cream; add one and a half cups of milk a little at a time and beat; add last the whites of the two eggs beaten stiff. Bake with rich crust. Mrs. C. A. Vining, Fonda, Ia.

Fried Mush.

Sift a cup of commeal into a quart Sift a cup of cornmeal into a quart of boiling water, add a teaspoonful of salt, stir steadily until it begins to boil and is free from lumps, cover and cook in a double boller for at least two hours, longer-if possible, stirring often. Set aside in a broad, shallow pan until cold and stiff. Cut into squares, dipeach of these into salted meal and fry until brown on one side, then turn and until brown on one side, then turn and brown on the other.

After washing and thoroughly drying hed quilts and "comfortables" fold and roll them tight, then give them a beat-ing with the rolling pin to liven up the batting. It will make them soft and

The failure of a cake, souffle, pudding or similar dish, the lightness of which or similar dish, the lightness of which depends in a great measure upon the white of the eggs, may be traced to the cook's ignorance, who, instead of folding in the stiff whites, stirs them in, thus undoing all the work of the

Broken china may be mended by brushing the edges with white lead, such as painters use. Press the pieces together and tie them in place and leave two or three days to dry.

To sprinkle cornmeal on the matting or carpet will make it look bright and clean when it is swept with a broom, then a carpet sweeper.

Save sour milk for making various cakes and suet puddings; it makes them very light, and thus a constant source of waste is avoided.

Fine granulated sugar makes a better cake than the coarse grade, and confectioners' sugar will make a smoother frosting than the powdered.

pinch of bicarbonate of soda mixed with tomatoes, which are to be cooked with milk or cream, will prevent curdif added before they begin

Saffron added to the rinsing water will make ecru lace curtains look much better than coffee when used in the rinsing water.

A drop of cinnamon extract and three or four drops of vanilla added to a pot of chocolate will greatly improve

Mold can be kept from the top of preserves by putting a few drops of glycerine around the edges of the jar before screwing on the cover.

When making starch be sure to boil it well or it will stick to the iron, and if it is not strained it will be lumpy.

Before placing a roast of beef in the oven dip in boiling water. It prevents the juices from escaping.

with the spiritual properties and the spiritual spiritua

The little notary sat for some moments with knitted brows. At last he shook his head.
"That would be the height of the

season, you see, monsieur," he said apologetically, "There are a great many people here, at that time, and I cannot know all of them. Nevertheless, it seemed to me for a moment

that there was about the name a cer-

tain familiarity—as of an old tune, you know, forgotten for years. Yet it must have been my fancy merely, for I have no recollection of the event you mention. I cannot believe that such a birth took place at Etretat."

There was another chance and I gave Mr. Royce the clew.
"Monsieur Fingert," he asked, "are you acquainted with a man by the name of Pierre Bethune?"

And again the notary shook his head. "Or Jasper Martingy?"
"I never before heard either name, monsieur," he answered.

anxious to see that it was properly re-

An hour had passed; the shops were

Again we fell silent. Mr. Royce got

out his purse and paid the fee. We had come to an impasse—a closed way, we could go no farther. I could see

that the notary was a-hunger for his roll and coffee. With a sigh, I arose to go. The notary stepped to the door

and looked up the street.
"Ah," he said, "the train has arrived,

but it seems there was not many pas-

sengers. Here is one, though, who has

finished a long journey."

He nodded to someone who approach-

ed slowly, it seemed. He was before the door-he passed on-it was Mar-

"That is the man!" I cried to Mr.

He understood on the instant, and caught the notary's arm.

"Monsieur Fingert, who is that

The notary glanced at him, surprises

The notary glanced at him, surprises by his vehemence.

"That," he said, "is Victor Fajolle. He is just home from America and seems very ill, poor fellow."

"And he lives here?"

"Ob, surely; on the cliffs just above the town—the first house—you cannot miss it—buried in a grove of trees. He married the daughter of Madame Alix some years ago—he was from Paris."

some years ago—he was from Paris."
"And his wife is living?"
"Oh, surely, she is living; she herself returned from America but three

weeks ago, together with her mother and sister. The sister, they say, is— well——" and he finished with a signi-

ficant gesture toward his head.

I saw my companion's face turn white—I steadled myself with an ef-

fort. I knew that, at last, the vell was to be lifted.

"And they are at home now?"

"I believe so," said the notary, eying him with more and more astonishment.

They have been keeping close at home

since their return—they will permit no one to see the—invalid. There has been much talk about it."
"Come, we must go!" I cried. "He must not get there before us!"
But a swuden light gleamed in the notary's eves

"Wait, messieurs!" he cried. "A mo-ment. But a moment. Ah, I remem-ber it now—it was the link which was

ber it now—it was the link which was wanting, and you have supplied it—Holladay, a millionare of America, his wife, Madame Alix—she did not live in the villa, then, messieurs. Oh, no; she was very poor, a nurse—anything to make a little money; her husband, who was a fisherman, was drowned, and left her to take care of the children as best she could. Ah, I remember—one a mere baby!"

He had got down another book, and was running his finger rapidly down the page—his finger all a-tremble with excitement. Suddenly he stopped

"Here it is, messieurs! I knew 1 could not be mistaken! See!"

an entry of which this is the English:
"Holladay, Hiram W., and Elizabeth,

his wife, of the city of New York

nis wife, of the city of New York, United States of America; from Celeste Alix, widow of Auguste Alix, her daughter Celeste, aged 5 months, All claim surrendered in consideration of the payment of 25,000 francs."

Mr. Royce caught up the book and glanced at the back. It was the "Rec-

birth took place at Etretat.

Then, in that first moment of inactivity, the fear of Martigny came back upon me, Had he really gone to the hotel? Had he deemed us not worth watching? Or had he watched? Was watching? Or had he watched? Was he on the train with us? Was he able to follow? The more I though of him, the more I doubted my ability to de-

I looked out cautiously from the win dow, up and down the platform, but saw no sign of him, and in a moment more we rattled slowly away over the switches I sank back into my seat with a sigh of relief. Perhaps I had with a sigh of rel really blinded him!

hour's run brought us to Beuze-An hour's run brought us to Beuze-ville, where we were dumped out, to-gether with out luggage, in a little frame station. An official informed us that we must wait there three hours for the train for Les Ifs. Beyond that? He could not say. We might possibly reach Etretat next day. "How far is Les Ifs from here?" in-

quired my companion.
"About twelve kilometers, monsieur."

"And from there to Etretat?" 'Is twenty kilometers more, mon-

'Thirty-two kilometers altogether,' said Mr. Royce. "That's about twenty miles. Why can't we drive Lester? We ought to cover it easily in three hours—

monsieur," he answered.

We sat silent a moment, in despair.
Was our trip to Etretat to be of no avail? Where was my premonition now? If we had lost the trail thus early in the chase, what hope was there that we should ever run down the quarry? And how explain the fact that no record had been made of Frances Holladay's birth? Why should her parents have wished to conceal it? Would they not naturally have been anxlous to see that it was properly refour at the most."

Certainly it seemed better than wait ing on the uncertain railway, and we sat at once about the work of finding a vehicle. I could be of little use, since English was an unknown tongue at Beuzeville, and even Mr. Royce's French was sorely taxed, but we succeeded at last in securing a horse and light trap, together with a driver who claimed to know the road. All this had An nour had passed; the snops were opening and a bustle of life reached us through the open door. People began to pass by twos and threes.

"The first train for three days is about to arrive," said the little notary.

"You see, this is a very small town, messieurs. The arrival of a train is an event."

Again we fell silent. Mr. Royce got

taken time, and the sun was setting when we finally drove away northward. The road was smooth and level—they manage their road making better in France—and we bowled along at a good rate past cultivated fields with little dwellings like doll houses dotted here and there. Occasionally we passed a man or woman trudging along the road but as the darkness deepened, it be-came more and more deserted. In an hour and a half from Beuzeville, we reached Les Ifs, and here we stopped for a light supper. We had cause to congratulate ourselves that we had secured a vehicle at Beuzeville, for we learned that no train would start for Etretat until morning. The damage wrought by the storm of two days before had not yet been repaired, and the wires were still down, and we were warned that the road was badly washed

Luckily for us, the moon soon arose, so that we got forward without much difficulty, though slowly; and an hour before midnight, we pulled up triumph-antly before the Hotel Blanquet, the principal inn of Etretat. We lost no time in getting to bed; for we wished to be up betimes in the morning, and I fell asleep with the comforting be-lief that we had at last eluded Monsleur Martigny.

CHAPTER XVII.

ETRETAT. We were up at an hour which as-tonished the little fat keeper of the inn, and inquired the location of the office of the registrar of births. It was office of the registrar of births. It was two steps away in the Rue Alphonse Karr, but would not be open for three hours at least. Would messieurs have their coffee now? No, messieurs would not have their coffee until they returned. Where would they find the residence of the registrar of births? His residence, that was another matter. His residence was some little distance. His residence was some little distance away, near the Casino, at the right we should ask for Maitre Fingret—anyone could tell us. When should messieurs be expected to return? It was impossible to say.

We went off along the

ssible to say. went off along the street, leaving the innkeeper staring after us-along the Rue Alphonse Karr, lined on both houses, each with its little shop on the ground floor. Three min-utes' walk brought us to the bay, a pretty, even picturesque place, with its perpendicular cliffs and gayly colored fishing smacks. But we paused for only a glance at it, and turned toward the Casino at the other end. "Maitre Fingret?" we inquired of the first passerby, and he pointed to a little house half hidden in vines.

A knock brought the notary himself to the door, a little dried-up man, with keen face, and eyes incredibly bright. My companion explained our errand in laborious French, supplemented gesticulation-it is wonderful how the hands can help one to talk!— and after a time the little Frenchman caught his meaning, and bustled away get his hat and coat, scenting a fat fee. Our first step was to be an easy one, thanks to the severity and thoroughness of French administration, but I admit that I saw not what we should do further, once we had verified the date of Miss Holladay's birth. The

next step must be left to chance.

The notary unlocked the door, showed us into his office, and set out chairs for us. Then he got down his register of births for 1876. It was not a large book, for the births of Etretat are not overwhelming in number.
"The name, I think you said, was Holladay?" he asked.

'Hiram W. Holladay," nodded Mr.

And the date June 10th?" 'Yes-June 10th.'

The little man ran his finger rapidly down the page, then went back again and read the entries one by one more slowly, with a pucker of perplexity about his lips. He turned the leaf, began farther back and read through the list again, while we sat watching

list again, while we sat watching him. At last he shut the book with a little snap and looked at us.

"Messieurs," he said quietly, "no such birth is recorded here. I have examined the records for the months of May, June, and July."

"But it must be there!" protested Mr. Boyce. 'North,' and the next is 'Alaska,' and the next is 'United States,' and the next is

Royce, "Nevertheless it is not here, Mon-

sieur."

"Could the child have been born here and no record made of it?"

"Impossible, monsieur. No physician in France would take that responsi-'For a large fee, perhaps," suggested my companion.

In Paris that may, sometimes, be possible. But in a small place like this, I should have heard of it, and it would have been my duty to investi-You have been here for that length

"Oh, yes, monsieur," smiled the little man. "For a much longer time than Mr. Royce leaned forward toward

him. He was getting back all his old power as a cross-examiner.

"Monsieur Fingert," he began impressively, "I am quite certain that Hiram W. Holladay and his wife were know it and laugh. If he has an incapable wife she works him. People know it and laugh.

HOT WEATHER AHEAD.

How to Keep the Kitchen Cool and Comfortable in Mid-Summer.

Comfortable in Mid-Summer.

Many a housewife is wondering how she will pass through the coming summer months with the stove she well knows will make the kitchen unbearably hot—to gay nothing of the dirt, dust and ashes that will add to the discomfort.

There is a way out of it all—a way that not only lessens the work and keeps the kitchen cool, but that also reduces fuel expense. This convenience, comfort and economy is all effected by the New Perfection Wick Blue Flame Oil Cook-Stove, an oil stove so superior to other makes that it is fast replacing the coal and wood range, the old fashioned oil stove, and in many cases the gas stove.

many cases the gas stove.

Anyone who has had to wait ten or fifteen minutes for the fire to get started will appreciate the New Perfection, which gives a strong working flame at moment of lighting. "Blue Flame" means the hotwill appreciate the New Perfection, which gives a strong working flame at moment of lighting. "Blue Flame" means the hottest and cleanest flame produced by any stove. The flame is always under immediate control and can be raised or lowered instantly. The convenience of this will be understood when it is considered that while the flame of one burner is boiling the kettle or roasting a large joint, that of another can be reduced to simmering point—in this way enabling the housewife to cook a variety of dishes at one time.

Then the comfort of it. While the flame of the New Perfection is intensely hot, yet the heat is not thrown off into the kitchen because it is concentrated by blue-enameled chimneys.

On washing and ironing days the comfort and convenience of the New Perfection.

on washing and ironing days the comfort and convenience of the New Perfection will be greatly appreciated. It gives best results in the least time, and does away with all coal and wood carrying and the many other disagreeable jobs that have to be done with other stoves. The New Perfection is made in three sizes, with one, two, and three burners, and is warranted to give full satisfaction.

Another home comfort is the Rayo Lamp, which produces a light of unusual brightness, yet soft and mellow—a light that will not hurt the eyes. The Rayo Lamp can be used in any room, whether it be library, dining-room, parlor or bedroom. It is highly ornamiental, being made of brass throughout and beautifully nickeled. Every lamp is warranted and makes a valuable and handsome addition to any home.

home.

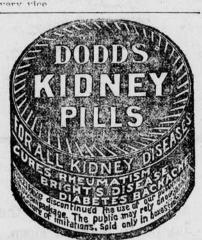

The New Perfection Wick Blue Flame
Oil Cook-Stove and the Rayo Lamp are
two real essentials to home comfort. Their
easy operation, absolute safety and handsome appearance commend them wherever stoves and lamps are used.

INDIANA PEOPLE IN WESTERN CANADA.

"What Shall We Do? I've Got to Build Granaries."

A letter written to a Canadian government agent from Tipton, Ind., is but one of many similar that are in the hands of the Canadian government agents whose privilege it is to offer one hundred and sixty acres of land free, and low railway fares. But here is a copy of the letter:

"Tipton, Ind., Nov. 28, 1906. "At your earnest solicitation a party of us from Tipton left May 15 for Western Canada. Our Interviews with you and a careful study of your literature led us to expect great things of your country when we should arrive there, and we were not disappointed. We went prepared to make a careful examination of the country and its resources, and we did so. At early dawn the second morning out of Tipton we awoke in a new world. As far as the eye could reach was an apparently limitless expanse of new sown wheat and prairie grasses. The vivid green of the wheat just beginning to stool out, and the inky blackness of the soil contrasted in a way beautiful to see. An hour or two later we steamed into Winnipeg. Here we found a number of surprises. A hundred thousand souls well housed, with every convenience that goes to make a modern, up-to-date city-banks, hotels, newspapers, stores, electric lights, street railways, sewerage, water works, asphalt pavements, everything. With eyes and ears open, we traveled for two thousand miles through Manitoba, Saskatchewan and Alberta, going out over the Canadian Pacific Railway, via Calgary to Edmonton and returning to Winnipeg over the Canadian Northern Railway. In the meantime we made several side trips and stopped off at a number of points where we made drives into the surrounding country. On every hand were evidences of prosperity. The growing wheat, oats, rye, flax, barley, not little patches, but great fields, many of them a square mile in extent, the three, five and sometimes seven horse teams laying over an inky black

ribbon of yellow stubble, generally in

furrows straight as gun barrels and

at right angles from the roads stretch-

ing into the distance, contrasted

strangely with our little fields at home.

The towns, both targe and small, were

doubly conspicuous, made so, first by

their newness and second by the tow-

ering elevators necessary to hold the

immense crops of wheat grown in the

immediate neighborhood. "The newness, the thrift, the hustle, the sound of saw and hammer, the tents housing owners of buildings in various stages of completion, the piles of household effects and agricultural implements at the railway stations waiting to be hauled out to the 'Claims,' the occasional steam plow turning its twenty or thirty acres a day, the sod house, the unpainted house of wood, the up-to-date modern residence with large red barn by, all these were seen everywhere we went, an earnest of prosperity and wealth to be. We talked with men and visited their places that four years ago was unbroken prairie. Their houses, barns, implements and live stock were the equal of anything in Tipton County and why not, when they were raising five, ten and twenty, yes in one instance forty thousand bushels of wheat a year. The fact that such large yields of wheat are raised so easily and so surely impressed us very favorably. And when we saw men who four or five years ago commenced there with two or three thousand dollars, and are now as well fixed and making money much easier and many times faster than lots of our acquaintances on Indiana farms fifty years cleared and valued at four times as much, we decided to invest. So we bought in partnership a little over two thousand acres, some of it improved and in wheat.

"Before leaving Indiana, we agreed that if the opportunities were as great as they were represented to be, that we would buy, and own in partnership a body of land, and leave one of our number to look after and operate it. This we accordingly did.

"Just before time to thresh I received a letter from him. 'What shall we do,' said he, 'I've got to build granaries. There's so much wheat that the railways are just swamped. We can't get cars and the elevators are all full. I never saw anything like it.' In reply we wrote 'Good for you. Go ahead and build, your story sounds better than the letters we used to get from our friends in Kansas when they bewailed the fact that the hard wheat had been destroyed by the chinch bugs and the corn by hot winds, and that they must sell the stock for means to live on.' 'Yes, build by all means.' And he did, and our wheat put in by a renter made twenty-seven bushels
