In Praise of Old Missouri.

From the Wellsville, Mo., Record. Missouri is the garden spot of the earth. There is but one thing that would excuse a man for leaving the would excuse a man for leaving the state, and that is to avoid being lynched. We would not leave to avoid that calamity. We have noticed that a majority of those who leave here in search of fame and fortune return clothed in rags and full of regret. There is not a place in all the wide would is not a place in all the wide world where so small an amount of energy will procure so many of the necessities and comforts of life as in Missourl. Here we have everything that heart could wish. There are sunshine and shade, water and wood, fruit and flowers, grain and grass, corn and cash. There are spirited horses, stately mules, splendid cattle, superb sheep and such swine as Missouri alone can grow swine as Missouri alone can grow. Best of all, we have the most beautiful women in the world. In our homes there is happiness, in our lives there is love, in our hearts there is charity. In Missouri we reap the richest blessings of divine favor.

A short walk daily will benefit any man in the long run

TWO SISTERS HAD ECZEMA.

Cuticura Cured Scalp Troubles of Two Illinois Girls-Another Sise ter Took Cuticura Pills.

"I must much praise to all the Cuticura Remedies. I used but one cake of Cuticura Soap and one box of Cuticura Ointment, as that was all that was required to cure my disease. I was very much troubled with eczema of the head, and a friend of mine told me to use the Cuticura Remedies which I did, and am glad to say that they cured my eczema entirely. My sister was also cured of eczema of the head by using the Cuticura Remedies. Another sister has used Cuticura Resolvent and Pills and thinks they are a splendid tonic. Miss Edith Hammer, R. F. D. No. 6, Morrison, Ill., Oct. 3, 1906."

Sending a Wireless.

Charles F. Lummis, the well known author, traveler, and authority on Indians, appeared recently in Washington in a corduroy suit, a sash, and a sombrero. "Mr. Lummis," said a reporter, "in your study of the Indians you must have come upon many strange things?" "In any study," said the novelist "one

comes upon strange things. Take, for instance, the study of childhood. Nothing reveals stranger things than that. "I know a little boy in Los Angeles. He

was bad the other day, and his mother punished him.

punished him. "After his punishment he was seen to go to his father's desk and write some-thing on a sheet of paper. Then he went out into the garden, dug a little hole and buried the paper in it. "His mother, after he had gone away, dug up the paper it contained themat

dug up the paper. It contained these words: "'Dear devil, please come and take

HANDLING THE FOAL.

HANDLING THE FOAL. When one has only a team of mares and both of them have young colts, it is pretty difficult at times to do just what is best for both mares and foals. The brood mare can do her share of the farm work, if she must, but when-ever it is feasible allow the brood mares freedom from work after foal-ing, and give them the job of raising, usty big colts. When mares are than most farmers are willing to admit mares freedom from work after load-ing, and give them the job of raising, lusty big colts. When mares are worked after foaling, the colt should be kept at the barn, in a roomy box-stall or paddock. It is a crime and a real injury, to both colt and mother, to allow the colt to follow along after its mother, in the field. With a little patience the colt may be taught to stay away from its mother, without fretting and after a few days the mother does not mind the sevaration. With the colt at home there is no danger of barb-wire, or other accident, which are li-able to occur any time when the colt is running around. When the mother is to be taken along. If it has been broke to the halter, it is best to have to date alongside of its mother. It will not do the colt any good to take these into a dot the colt any good to take these into a covernment it takes more brains to look into the mysteries of life than it does to look into available. It takes more brains to look into the into a covernment it is best to have into a covernment it to be a breeder of cattle. It is just as true today as it was then. It takes more brains to look into the into the colt any good to take these into a covernment it takes more brains to look into the into a the colt any good to take these into a covernment it to be a breeder of life than it does to look into government it takes more brains to look into the into a covernment it takes more brains to look into the into a covernment it takes more brains to look into the into a covernment it takes more brains to look into the into a covernment it takes more brains to look into the into a covernment it takes more brains to look into the into a covernment it takes more brains to look into the into a covernment it takes more brains to look into the into a covernment it takes more brains to look into the into a covernment it takes more brains to look into the into a covernment it takes more brains to look into the into a covernment it takes more brains to look into the into a covernment it takes

it lead alongside of its mother. It will It takes more brains to look into the mysteries of life than it does to look long jaunts, and they had best be into government. It takes more brains to look into the mysteries of life than it does to look long jaunts, and they had best be into government. It takes more brains to be a successful farmer than a successful mare than a successful mechanic, merchant or professional man. The great reason why so many men, young and old, leave the farm, is because they know they have of her colt, and she goes about her ience.

STUDY EACH COW.

FEEDING GRAIN HAY. Many farmers are feeding grain hay with very satisfactory results. This hay takes the place of both hay and grain, and where animals are not put to very heavy work, it does fairly well. It is cut when the grain is in the dough stage, for at that stage the straw seems is be at its best for feeding. In the western states, where timothy hay is high, farmers rely upon wheat hay al-most altogether. It is rather "washy" but it is surprising how well stock keep up on it. This is harvested in the regular way, just when the grain is well in the milk. The bundles are put in shock for a few days, and are them hay has been selling for \$22 a ton, but not a pound is fed on many western farms. While feeding this kind of grain hay may not be practicable on farms in the central west, yet it shows what may be done in the saving of high priced hay. Grain hay made from oats, made just as the straw is turning, is valuable, and it is the cheapest hay made upon the farm. SPREADING MANURE BY MA-FEEDING GRAIN HAY. Not all the good milkers are found

SPREADING MANURE BY MA-CHINE. BY MA-

In watching farm work and the prac-tice of different farmers I have been struck this season with the good re-sults of spreading manure thinly and evenly. I had an opportunity recently of comparing the results of machine spreading and hand spreading on two adjacent Illinois farms. The work was done on meadow lands. The field upon which the spreader was used showed a

adjacent Illinois farms. done on meadow lands. The field upon which the spreader was used showed a fine, even growth. The bare spots of last year filled in, and the spread by hand was very patchy. A very rank growth was made where ever this growth was too rank for first-class bay, and there were many thin spots hav, and there were many thin spots growth was too rank for first-class hay, and there were many thin spots over the field. I believe it is a mistake to pile on too much manure on grass or

to pile on too much manure on grass or meadow lands. Put it on thin, and put it on frequently. That will surely give best results. Some think that one cow will make just as good butter as another, under like conditions. I do not believe that I have seen cows whose milk was hardly churnable, and whose butter could not

Milk cans must be well dried after

SENSE OF SIGHT IN ANTS.

Experiments Indicating That They Don't Depend on Smell, The old theory that ants could not see and were guided entirely by sense of smell

has been demolished by a series of experi-ments reported in the Revue Scientifique A little platform of ourdboard was set up near one of these nests and inclined plane leading conventently down to the entrance, Then a number of the insects and a quanof their eggs were placed upon the tity platform.

For a few minutes the ants seemed greatly perturbed, but they very soon found the incline plane and at once started Carrying the eggs down it to the nest. A second inclined plane was located on the opposite side of the platform, but they took no notice of it. The experimenters then twisted the platform around so that the second plane pointed to the nest en-

Without hesitation the ants ceased using the old plane and took to the new one, showing conclusively, it is argued, that they were not following a trail by scent but were getting their bearings by some other sense

The next step was to mark some of the ants with a view to seeing whether each individual always used the same path and the same entrance to his nest. It was found that no such thing was the case. They all seemed to know all the en-trances and to have a sense of their ditrection. They struck out new paths for themselves and always reached their des-tination without fail. This was regarded as establishing some form of vision. Finally, an electric light bulb was set up

near one entrance to the nest. It seemed to have an immediate attraction for the ants, as they unanimously used the entrance on that side coming to and going from the nest. Then it was changed over to the other side, causing great excitement apparently among the insects, which end-ed in their changing over to the newly

illuminated way. Changes in the brilliancy of the light seemed to have no perceptible effect on the ants, but they never falled to detect the change of direction. All possible pre-cautions were taken to prevent the heat from the lamp from reaching them, so that it is regarded as certain that they perceived the light.

The Good Provider. "Though Mrs. McKinley," said a Canton clergyman, "left an estate of about \$200,000, she was one of the most charitable women in Ohio. Her experiences in charity work were interesting. I used to like to hear her talk of them.

"....e once told me about a colored widow whose children she had helped to educate. The widow, rather late in life, married. A few months after her marriage Mrs. McKinley asked her how she was getting

"'T'se a-gittin' on fine, thank ye,' the

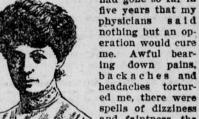

bride answered. "'And is your husband a good provid-er?' said Mrs. McKinley.

"''Deed he is a good providah, ma'am,' was the reply. 'He got me five new places to wash at dis las' week.'"

A WOMAN'S SUFFERINGS.

A Dreadful Operation Seemed to Be the Only Outcome.

Mrs. Clyde Pixley, Bridge street, Belding, Mich., writes: "I had inflam-mation of the bladder, and the trouble had gone so far in

spells of dizziness The Place III and faintness, the kidney secretions were like blood and passed with intense pain. I had lost pounds when I began using Doan's Kidney Pills, and was dreadfully nervous. In one week I felt better and today I am a well woman and have been for a long time."

Is Pe-ru-na Useful for Catarrh? Should a list of the ingredients of Pe-

runa be submitted to any medical expert, of whatever school or nationality, he would be obliged to admit without reserve that each one of them was of undoubted value in chronic catarrhal discases, and had stood the test of many years' experience in the treatment of such diseases. THERE CAN BE NO DISPUTE ABOUT THIS WHAT-EVER. Peruna is composed of the most efficacious and universally used herbal remedies for catarrh. Every ingredient of Peruna has a reputation of its own in the cure of some phase of catarrh. Peruna brings to the home the COM-BINED KNOWLEDGE OF SEVERAL SCHOOLS OF MEDICINE in the treat-

ment of catarrhal diseases; brings to the home the scientific skill and knowledge of the modorn pharmacist; and last but notleast, brings to the home the vast and varied experience of Dr. Hartman, in the use of catarrh remedies, and in the treatment of catarrhal diseases.

The fact is, chronic catarrh is a discase which is very prevalent. Many thousand people knew they have chronic catarrh. They have visited doctors over and over again, and been told that their case is one of chronie catarrh. It may be of the nose, throat, lungs, stomach or some other internal organ. There is no doubt as to the nature of the disease. The only trouble is the remedy. This doctor has tried to cure them. That doctor has tried to prescribe for them.

BUT THEY ALL FAILED TO BRING ANY RELIEF.

Dr. Hartman's idea is that a catarrh remedy can be made on a large scale, as he is making it; that it can be made honestly, of the purest drugs and of the strictest uniformity. His idea is that this remedy can be supplied directly to the people, and no more be charged for it than is necessary for the handling of it.

No other household remedy se uni-versally advertised carries upon the label the principal active constituents, showing that Feruna invites the full inspection of the critics.

has shown splendid results. Reports from fruit centers say that unsprayed apple trees are only in fair condition, while sprayed orchards are looking fine. Save the heifer calves of your best cows, and the first thing to do is to find out which is your best cow-

A correspondent asks what to do with a cow that is hard to milk. There is not much that can be done. Some-times plugs are used, but if these rc-main in the teats for any great length of time inflamation is liable to set in. With a good root system, and plenty of moisture, all we need now is some sizzling weather to push the corn crop along. Corn fields are in pretty good shape.

About the worst nuisance that one Numerous accidents have been recan imagine is a scrub bull running at large on the highways. The chances are he will land in some neighbor's pasture, where he is not wanted.

The man who now has corn, mid-dlings and clover for his spring pigs has the finest kind of a combination for making growth. Right now is the time when the cheapest pork is made.

Most all weeds may be destroyed by This shows how important early spring work is in keeping the weeds down. After the fields are in crops weeds cannot always be reached.

botted from the small pieces of baling wire which are clipped off, falling in the hay where a cow gets hold of it. It is a mean thing to lodge inside of any animal. There is no reason why dairy butter should not sell at as high a price as creamery butter. The only reason it does not is because the cream is not properly cared for and handled right.

If the cows are falling off give them a bunch of fresh clover or oats and peas, when they come in at night. And don't neglect the water supply.

On account of close, badly ventilated When grain crops are turned under stables dairy cows suffer from disease the work should be done at the right more than other cattle. It is important that disinfectanats such as carbolic acid and whitewash be used without s'int. A good system of ventilation will do wonders in keeping up the tone of the herd. time. These crops should be turned under just when they are flowering. At that condition they most readily rotted, and contain a large per cent. of ash.

Barley will not do well on all kinds of soil. Growers have learned that plant food must be available early, so us to give the crop a good start. It is well known that barley takes up during the first four weeks almost ene-half of the plant food needed to mature the crop.

A teacher in one of the public schools of Baltimore was questioning a boy pupil about the word "recuperate." | "As an example," said the teacher, "we will take the case of your father! He is, of course, a hard working man?" "Yes"m," assented Charlie. "And when night comes he returns home tired and worn out, doesn't he?" "Yes'm," in further assent from Charlie.

"Yes in, in "Charlie. "Then," continued the teacher, "it being night, his work being over and he being tired and worn out, what does he do?"

'That's what ma wants to know." said Charlie

Of Interest To Women.

To such women as are not seriously out of health but who have exacting duties of health out who have exacting duties to perform either in the way of house-heid cares or in social duties and func-tions which seriously tax their strength, as well as to nursing mothers, Dr. Pierce's Favorite Prescription has proved a most valuable supporting tonic and invigorat-ing nervine. By its timely use, much serious sickness and suffering may be serious sickness and suffering may be avoided. The operating table and the surgeons' knife, would, it is believed, seldom have to be employed if this most valuable woman's remedy were resorted to in good time. The "Favorite Prescrip-tion" has proven a great boon to expectant mothers by preparing the system for the coming of baby, thereby rendering childbirth safe, easy, and almost painless.

Bear in mind, please that Dr. Pierce's Favorite Prescription is not a secret or patent medicine, against which the most intelligent people are quite naturally averse, because of the uncertainty as to their composition and harmless character, but is a MEDICINE OF KNOWN COMPOSI-TION, a full list of all its ingredients being printed, in plain English, on every bottlewrapper. An examination of this list of ingredients will disclose the fact that it is wrapper. An examination of this his of ingredients will disclose the fact that it is non-alcoholic in its composition, chemic-ally pure, triple-refined glycerine taking the place of the commonly used alcohol, in its make-up. In this connection it may not be out of place to state that the "Favorite Prescription" of Dr. Pierce is the only medicine put up for the cure of woman's peculiar weaknesses and ail-ments, and sold through druggists, all the ingredients of which have the un-animous endorsement of all the leading medical writers and teachers of all the several schools of practice, and that too as remedies for the ailments for which "Favorite Prescription" is recommended. A little book of these endorsements will be sent to any address, post-paid, and absolutely free if you request same by postal card, or letter, of Dr. R. V. Pierce, Buffalo, N. Y.
