Manager of Club in Tenderloin District at Window Early in the Morning.

New York, March 1.-Memories of the days when Canfield's and "Hon-est John" Kelly's were running wide open, have been revived in the Tenderion district by the story of a faro play in a club house not far from Broadway and Thirty-eighth street, which ended with the house \$25,000 richer and a man staying at the Wal-dorf-Astoria that amount poorer.

## BOMB THROWN AT ARGENTINE RULER

Buenos Ayres, March 3.--A dynamite bomb was thrown against a carriage in which President Alecorta was driving, but failed to explode. Four persons were arrested, charged

with complicity in the plot. Recently there has been political unrest in Argentina owing to the issuance Jan-

In Argentian owing to the Islander Santary uary 26 of an executive decree closing the extraodinary sessions of congress and putting into effect for the current fiscal year the budget of 1907. This extreme measure was made necessary by the obstructive tactics of a majority in the senate which made impossible the passage of the budget or other legislation leaving the government powerless to meet ordi-nary expenses. President Alcorta an-nounced at the time that the government was prepared promptly to suppress any subversive or violent movement on the part of the opposition, and on January 27 large forces of police prevented the sena-tors and deputies from attempting to take possession of the parliamentary halls. It was stated at the time that the decree of President Alecorta was approved by a majority of the people.

All of them assert that they have found it impossible to procure the services of competent, efficient and dependable telegraph operators in such numbers as will enable them to comply with the provisions of the law; and that, even if they could obtain the necessary operators, the enforced employment of so many additional men would be a financial hardship which the carriers ought not to be subjected to. Nearly all of the petitions also indi-cate that, in the circumstances, if the law is enforced the companies will be obliged to close many small stations on their lines, thus interfering with the service, causing inconvenience and pos-sible loss to the traveling and shipping public and preventing the prompt movement of trains. **BANKRUPTCY LAW** 

Washington, Mch. 2 .--- The bankruptcy law has been construed in so many conflicting ways that it is declared nowadays to be almost impossible to tell what it means. Only a limited classification of corporations can be proceeded against by creditors and thrown into bankruptcy; while no corporation can become a voluntary bankrupt under the act. This distincbankrupt under the act. This distinc-tion is objected to on principle by the critics of the law; but the strange de-cisions which have been made under it have so complicated the question that new legislation is declared necessary if the law is to have anything like uni-form exploration

new legislation is declared necessary if the law is to have anything like unl-form application. In New York a corporation construct-ing bridges is liable to bankruptcy, but it is not in Virginia. A laundry company which launders new shirts, collars and cuffs for the manu-facturers, is liable to be made a bank-rupt: but a company doing a general laundry business is not.
