

Phew! Salts and Castor Oil!

Why take sickening salts or repulsive castor oil? "Goes through you like a dose of salts" means violence, grips, gripes, gases, soreness, irritation, and leaves your stomach and bowels weak and burnt out. Might just as well take concentrated lye. Then there's castor oil, disgusting, nauseating truck that your stomach refuses unless you disguise the taste. Fool your own stomach, eh? Don't ever believe that anything offensive to your taste or smell is going to do you real good. Nature makes certain things repulsive, so you will not take them. Force yourself to nauseous doses, and you ruin your digestion, weaken your bowels, destroy your health. On the other hand see what a delightful, palatable, perfect modern laxative, liver regulator and bowel tonic you find in

DO YOU KNOW WHAT WHITE LEAD IS?

Its Chief Use and a Method of Determining Good from Bad Explained.

White Lead is the standard paint material all over the world. It is made by corroding metallic lead into a white powder, through exposing it to the fumes of weak acetic acid and carbonic acid gas; this powder is then ground and mixed with linseed oil, making a thick paste, in which form it is packed and sold for painting purposes. The painter thins it down to the proper consistency for application by the addition of more linseed oil.

The above refers, of course, to pure, genuine White Lead only. Adulterated and fake "White Lead," of which there are many brands on the market, is generally some sort of composition containing only a percentage of white lead—sometimes no White Lead at all; in such stuff, barytes or ground rock, chalk, and similar cheap substances are used to make bulk and imitate the appearance of pure White Lead.

There is, however, a positive test by which the purity or impurity of White Lead may be proved or exposed, before painting with it.

The blow-pipe flame will reduce pure white lead to metallic lead. If a supposed white lead be thus tested, and it only partially reduces to lead, leaving a residue, it is proof that something else was there besides white lead.

The National Lead Company guarantee all White Lead sold in packages bearing its "Dutch Boy Painter" trade-mark to prove absolutely pure under this blow-pipe test, and that you may make the test yourself in your own home, they will send free upon request a blow-pipe and everything else necessary to make the test, together with a valuable booklet on paint. Address, National Lead Company, Woodbridge Building, New York.

Oriental Etiquette.

Everybody's Magazine: A peasant named Ali, according to a good old orient chestnut, needing badly a donkey for some urgent work, decided to apply to his neighbor Mehmed, whose donkey Ali knew to be idle in the stable that day.

"I am sorry, my dear neighbor," said Mehmed, in reply to Ali's request, "but I cannot please you. My son took the donkey this morning to the next village."

"I assure you," insisted Ali, "I shall take the very best care of him, my dear neighbor."

"Can you not take my word?" demanded Mehmed with a show of anger. "I tell you the donkey is out."

"But—" at this point the donkey began to bray loudly. "There. That is the donkey braying now."

"Well," said the justly indignant Mehmed, "if you would rather take my donkey's word than my word, we can be friends no longer, and under no circumstances can I lend you anything."

It has been definitely announced in Paris that Dr. Berget has succeeded in solidifying the rare earths used for the Weisbach mantles by means of the electric furnace, while at the same time the oxides retain their radiating properties. M. Berget, by whom the results will be controlled, is a well known physician, and the Societe Halla will shortly put its "buisons ardents" on the market. This name is due to the shape of the ordinary burner, the substitute for the mantle being cast in the form of a thick set or bush of filaments. Any desired shape can be formed, however, so that the process lends itself naturally to fancy effects. The new filaments, it is asserted, resist shocks, tremors, or drafts to an enormously increased extent.

Wait a Minute. Winamac Democrat: A Winamac man who has had no trouble in getting cash from the local banks when he wanted it, was in a neighboring town the other day, where the banks are paying only a small amount in currency. While in one of the banks there, he overheard two Irish friends greet each other while waiting their turn at the window.

"This reminds me of Finnegan," remarked one.

"What about Finnegan?" inquired the other.

"It's a story that Finnegan died, and when he greeted St. Peter he said: 'It's a fine job you've had here a long time.'"

"Well, Finnegan," said St. Peter, "here we count a million years as a minute and a million dollars as a cent."

"Ah," said Finnegan, "I'm needin' cash; lend me a cent."

"Sure," said St. Peter, "just wait a minute."

Among the curious insects of the Malay peninsula is one called the lantern fly, which is remarkable for its sudden leaps made without the aid of its wings. It was only after a number of specimens of this queer insect were carried to London for examination that it was discovered that a curious projection on the front of its head, a kind of nose with a crease in it, was the leaping organ. When bent back under the abdomen and suddenly released it sent the insect flying.

WESTERN CANADA CROPS CAN'T BE CHECKED.

Oats Yielded 90 Bushels to the Acre. The following letter, written the Dominion Government Commissioner of Emigration, speaks for itself. It proves the story of the agents of the government that on the free homesteads offered by the government it is possible to become comfortably well off in a few years:

Regina, Sask., Nov. 23, 1907.

Dear Sir—It is with pleasure that I reply to your request. Some years ago I took up a homestead for myself and also one for my son. The half section which we own is situated between Rouleau and Drinkwater, adjoining the Moose Jaw Creek; is a low level and heavy land. We put in 70 acres of wheat in stubble, which went 20 bushels to the acre, and 30 acres of summer fallow, which went 25 bushels to the acre. All the wheat we harvested this year is No. 1 hard. That means the best wheat that can be raised on the earth. We did not sell any wheat yet, as we intend to keep one part for our own seed, and sell the other part to people who want first-class seed, for there is no doubt if you sow good wheat you will harvest good wheat. We also threshed 9,000 bushels of first-class oats out of 160 acres. Eighty acres has been fall plowing, which yielded 90 bushels per acre, and 80 acres stubble, which went 30 bushels to the acre. These oats are the best kind that can be raised. We have shipped three car loads of them, and got 53 cents per bushel clear. All our grain was cut in the last week of the month of August before any frost could touch it.

Notwithstanding the fact that we have had a late spring, and that the weather conditions this year were very adverse and unfavorable, we will make more money out of our crop this year than last.

For myself I feel compelled to say that Western Canada crops cannot be checked, even by unusual conditions.

I am, dear sir, yours truly,
(Signed) A. KALTENBRUNNER.

Dr. Sven Hedin, the Swedish explorer, says that he has discovered the true sources of the Bramaputra and Indus. The Bramaputra, he says, is the Kubitampso, which rises from an enormous glacier on the northern side of the northernmost part of the Himalayas. The Marumochu, which has hitherto been regarded as the source, is merely a small tributary flowing in from the west.
