English papers announce that the fund for the purchase and preservation of Glastonbury Abbey is now com-plete. Glastonbury Abbey is one of the most interesting buildings in England. According to the legend, Joseph, of Arimathea, went thither, bearing the Holy Grail, and founded the first Chris-tan church in Britain. The present abbey was built by Henry de Blois in 1866. A quaint story is told of the ab-bot's kitchen. Some of the old abbots used to entertain so lavishly that an English monarch threatened the de-truction of their wooden kitchen. So the monks built a stone kitchen. So the monks built a stone kitchen with walls several feet thick, which they hought would withstand assaults. The itchen exists now in a good state of preservation. Four oxen could be tonated in it at once. asted in it at once.

The question of the influence of the stock on the graft and vice versa has been much discussed. The experiments recorded by M. L. Guignard in the "Comptes Rendus" were made with a view of discovering whether there is any migration of chemical substances from the one to the other. Plants rich in compounds of hydrocyanic acid were chosen as this is easy to detect. It was found that when a plant containing a hydrocyanic glucoside is grafted on one destitute of it, or inversed, there is no passage of this substance from the one to the other. The general conclusion seems to be that grafting is a sort of artificial symbiosis in which each species retains its individuality.

Red Wing is a town of only 10,000 persons, 40 miles down the Mississippi river from St. Paul, and to it several years ago a citizen left \$50,-000 to found a municipal theater. A ditizens' committee, under the terms of the bequest manages the playhouse and so well has it done its work that for the last three years a dividend on the capital invested has been paid to the town. Professor Richard Burton pre-dicts that "in 10 years probably, and in 25 years certainly, every considerable city in the United States will have a municipal theater."

At a recent meeting of scientists in Dublin, Professor G. Elliott Smith, the Egyptologist, said that the earliest known human remains found in the Nile valley, when compared with those of later times, demonstrated the fact that at a very remote period Egypt and Nubla were inhabited by the same race which had existed in Egypt with little or no change in physical characteristics throughout the Intervening 6,000 years until the present day. WING OF COMMONER Lincoln, Neb., Nov. 21.-Governor-elect Shallenberger fully realizes that the democratic party must make its platform promises good or it will have no chance of success two years hence. Friends of the successful candidate de-clare he has the business capacity, physical powers and political tact to make him a commanding figure and dominate legislation. He will seek the counsel of William J. Bryan, and it is asserted that there is no question but that the platform promises will be car-ried out. Bank guaranty is the issue that Shallenberger pushed to the front in his campaign for governor and his political associates say that this will get his first attention. It is expected that Dr. P. L. Hall, president of the Central National bank, of Lincoh, for-mer vice chairman of the democratic national committee, will have much to do with the drawing of a bill, and his advice will be frequently sought. Dr. Hall has made an exhaustive study of the bank guaranty plan.
