Esperanto has made more headway than any of the other efforts to estab-lish a universal language. It was creat-ed by Dr. Zamendorf, a Russian phy-sician, who published his pamphlet, "An International Language, by Dr. Esperanto," in 1887. It has now the in-dorsement of 'scores of the most con-spicuous scholars in the world, and the French government has conferred upon spicuous scholars in the world, and the French government has conferred upon Dr. Zamendorf the Cross of the Legion of Honor. Books for the study of Es-peranto are already published in 22 different languages, and some 25 mag-azines and newspapers are regularly published in the language. All navigators will be interested in the news' which comes from Liverpool that Sir Oliver Lodge recently suc-ceeded in completely clearing away for a radius of 60 feet a thick fog by means of electrical 'discharges. The Marine Journal states that the Lodge system consists of driving electricity into a fog-laden atmosphere at a very high voltage from a series of disks at the tops of peles. The current acts di-rectly upon the constituents of the fog, the electric influence whirling these hither and thither, causing them grad-ually to fall to the ground. Him Get Out of Jail, Husband Hangs Himself.

Lyons, Neb., July 27.—Andrew Meyer, under arrest for wife beating and in jail at Tekamah, committed suicide yesterday at 3 o'clock by hanging him-self with straps from his suit case. His wife had taken the suit case full of clothes to him yesterday. When he pleaded for aid from his wife for his release she told him he was safer in jail, as sentiment was very strong against him at home. Meyer brutally beat his wife about 10 days ago for some trivial difference, and she took refuge in a cornfield.

They re-veal the fact that King Alfonso, in-stead of refusing his consent to the marriage, as was reported by Madrid Madrid dispatches, favored and actually advised the prince to marry her secret-ly, gave him leave of absence for that purpose and personally intervened by telegraph with the Bamberg ecclesias-tical authorities, in whose diocese the marriage took place, to procure a dispensation for it.

Pure Food Law Cannot Prevent

Gifts and Premiums to the Purchaser.

Lincoln, Neb., July 24.—It is no of-fense against the law for the manu-facturer of a food product to include in the package containing his stuff a prize, gift or premium, and that sec-tion of the pure food law which de-clares this to be misbranding is uncon-stitutional. So holds District Judge Stewart in a test case brought by the manufacturers of ice cream powder and a mince meat, who gave slips that could be redeemed in cash or in maga-zine or book subscription.

zine or book subscription. The attorney general holds that this is a device that is intended to deceive the purchaser of a food product into believing that he is getting something for nothing and that the cost of the prize being included in the price charged, it means deterioration in the food product sold. The court says that there being no element of chance in it, public morals are not lowered, and that, therefore, the police power of the state cannot be invoked. The manufacturers complained that the law was secured by manufacturers who didn't want to give premiums and tried to make it impossible for those who did to do so.
