With Malfeasance in Accepting Money.

Chicago, July 27.—Police Inspector Edward C. McCann, was indicted today charged with malefeasance in office in the alleged collection of "protection" money from illegal establishments of the West Side "tenderloin." McCann's predicament was foreshad-

owed yesterday when an indictment was returned against Detective Sar-geant Jeremiah Griffin, alleged to have been the collection agent working out of McCann's office. Half a dozen witnesses testified be-

fore the grand jury that Griffin har-vested as high as \$9,000 a month, most of which went to men "higher up." The aggregate collected under this system is said to be \$150,000. Vice of every sort is alleged to have been protected.

The indictment against the inspector contains 10 counts, five charging malfe sance in office and an equal number charging the acceptance of bribes.

Besides McCann and Griffin four oth-ers are under indictment. They are Louis Frank, said to be a millionaire, Louis Frank, said to be a millionaire, who has always been politically potent in the "levee" districts of the west side: Michael Heitler, otherwise known as "Mike, the Pike;" Morris Shatz, who is said to have confessed astounding details of the alleged "graft," and M. A. Sanchez, who is charged with col-lecting money on the pretext that he would secure protection.

Inspector McCann has been with the police department for a generation, ris-ing from the ranks to his present position. He declares that the charges come from a powerful clique which, despair-ing of forcing him to protect vice has determined as a last resort to try to ruin him.

The sewers, already overflowing, were inadequate to carry off the water, and the streets and avenues quickly turned into tor-rents, with the water running three feet deep. Street cars were compelled to suspend. Citizens stripped off their shoes and waded home. The theater crowds came up to find the streets a miniature lake and the men, picking up their women companions, carried them to higher ground. Automobiles them to higher ground. Automobiles and hacks were impossible, owing to the accumulation of mud in the streets. The hotels were crowded with those unwilling to venture forth.

Japan undoubtedly is becoming restive under trade conditions imposed in her treaty with the United States. Japan's statesmen are now at work on revisions of a number of treaties which expire in 1910, and it was her earnest desire that the United States should consent to a termination of our agreement next year so that we might join in the negotiations with other powers. Our trade interests in Japan, however, are not suffering and for this and other reasons this government does not see its way clear to discuss the questions involved before the ex-
