STRINGING PEARLS

A Difficult Task That Calls For Skill and Judgment.

CORDED ON SURGEON'S SILK.

A Soft, Round Strand of Pure White Woven Thread is Employed, and an Intricate System of Knotting Guards the Gems Should the String Break.

Every now and then a story is printed about the loss of a valuable string of pearls through the breaking of the cord on which they were hung and their slipping off and scattering over the floor or sidewalk. Those who know anything about the stringing of pearls, however, always read these tales with incredulity, because nowadays, as a general thing, only false pearls or those of small price are strung without a knot being tied between each of them, so that if the cord breaks no more than one can fall off.

It is common belief that because of their great value pearls are strung on something durable, like catgut or wire. As a matter of fact such material is never employed. There is no beauty to a string of pearls that looks wiry or stiff. It must be flexible to the highest degree, otherwise all its graceful effect will be lost. Up to the time of the introduction of surgeon's silk for pearl stringing nothing had been found that would absolutely meet the requirements of strength and flexibility.

That the most valuable pearls are today strung on cords of surgeon's silk is due to the suggestion of a woman employee of a New York jewelry house.

Surgeon's silk—the thread that is used for sewing up cuts and wounds—is a soft, round strand of pure white silk which is woven, not twisted. The weave, when viewed under a magnifying glass, closely resembles that of the silk braid and is capable of only a small degree of expansion. This thread is produced in several diameters or grades, which makes it all the more desirable for pearl stringing. These are numbered instead of being lettered like ordinary sewing silk and are wound on small cards like darning cotton.

When the young woman's idea was first adopted it seemed as though it would prove impracticable owing to the quantity of surgeon's silk manufactured being insufficient to meet the new demands from the jewelers. It was also very expensive. But the idea was such a good one and the surgeon's silk was so much superior to anything ever tried before that in time it was found possible to secure it in sufficient quantities and at wholesale prices.

The principal safeguard against loss, however, is in the method of stringing. An intricate system of knotting the thread between each pearl is employed. This prevents the escape of more than one jewel should the thread break. This knotting is done with tweezers and is a task that requires great skill. There must be no unsightly gaps between the knots and the pearls, and the whole when finished must be immaculate in its whiteness. The tiny knots instead of detracting from the beauty of the necklace enhance it, for they look like seed pearls alternating with the larger ones. Knotting lengthens the necklace also and is often resorted to for that purpose.

When a strand of a certain length is desired and the number of large pearls is not sufficient imitation pearls of the exact size and color are often substituted. Some of these imitations will deceive the eye of any but the most expert.

It often happens that the largest pearls have the smallest holes drilled through them, for every grain that is taken from the pearl reduces it in weight. In such cases, however, the risk of the cord breaking is increased owing to the slenderness of the thread and the sharp edges of the pearls cutting through it quickly.

Stringing pearls is never done with a needle. A needle is not yielding enough to pass through very small holes, and the doubling of its diameter at the eye makes its use impracticable. Therefore the end of the thread is sharpened to a very fine point, which is waxed stiffly enough to be used exactly as a needle would be.

Ordinarily pearl stringing is mechanically difficult and also requires taste and judgment. The pearls may have to be rearranged in order to improve their general appearance. In the laying out of collarets especially a great deal of skill is required. In the first place, the collaret must fit exactly. This seems comparatively easy, but it is not. A pattern is always fitted beforehand, but it is rarely the case that the result is satisfactory the first time. Some necks require straight collars and others slightly curved. The same care is given to the fitting of a collaret as to the set of an expensive gown, and it has to be tried on and changed and adjusted as many times.

Dividers are used to gauge the exact position in which the vertical diamond bars that support the strands of pearls should be placed. Endless care and judgment may be given to laying out the pattern for one of these baubles and getting the measurements absolutely exact, but when it comes to be fitted there is sure to be trouble. It may be too tight at the bottom and too loose at the top, or perhaps the ends may not even meet at all.—Thaddeus S. Dayton in Chicago Record-Herald.

Ordinance No. 38 A.

An ordinance granting to Robert W. McGinnis, and his successors and assigns, the right to construct, erect, and maintain gas plants, electric plants and heating plants and all structures and appliances in connection therewith for the manufacture, generation, sale and distribution of gas, electricity and steam for heating, lighting and power purposes, and to enter upon, occupy, and use public streets and alleys and public grounds in the city of O'Neill; for the construction, erection and maintenance of gas pipes or mains and all appliances and structures in connection therewith, electric light poles, wires, cables and other structures and appliances in connection therewith, for the sale and distribution of gas and electric current for light, heat and power purposes; to construct, maintain and operate a system of pipes, conduits and all other appliances and structures in connection therewith for the sale and distribution of steam and hot water for heating and power purposes to public and private consumers of the city of O'Neill; and to manufacture and generate such gas, electricity and steam for such purposes during the life of this grant.

BE IT ORDAINED BY THE MAYOR AND CITY COUNCIL OF THE CITY OF O'NEILL, HOLT COUNTY, NEBRASKA, Section 1. That there is hereby granted to Robert W. McGinnis, his successors and assigns, the right to acquire, erect, construct and maintain all necessary and convenient buildings, structures, gasholders and appliances for the manufacture, and generation of gas, electricity and steam for heat, light and power purposes, and the right to construct and maintain all necessary and convenient pipes, conduits, and other structures and appliances for the sale and distribution of gas and steam or hot water for heat, light and power purposes, and to erect, construct and maintain poles, wires, cables, or other structures and appliances for the sale and distribution of electric current for light, heat and power purposes in the City of O'Neill, and in any future additions thereto.

Section 2. That for said purposes, the said grantee, his successors and assigns, or agents or employees, may enter upon the streets, alleys and public grounds of said City and make such excavation therein as may be necessary or convenient for the erection and maintenance of poles, posts and other structures and appliances in connection therewith for electric wires and cables, and for the purpose of laying and maintaining therein gas pipes, steam pipes, conduits, and other structures and appliances in connection therewith for the sale and distribution of gas, steam and hot water, provided that such excavations shall be properly protected when open, and shall remain open not longer than necessary, and shall be so filled or repaired as to leave the streets or alleys in as nearly as possible as good condition as before such excavations.

Section 3. The grantee or his successors or assigns, shall commence the construction of the electric light plant within six months from the date of the approval of this ordinance, and shall within eighteen months of said date have so completed said system as to be able to furnish electric current for light, heat and power purposes to the inhabitants of O'Neill. Delay however, caused by strikes, malicious interference, order of courts or acts of elements shall work an extension of time equal to the loss of time so occasioned.

Section 4. That said grantee, his successors and assigns shall be required to extend electric wires for the distribution of electric current on the streets within said City, where shall be six resident families in each block of said proposed extension, and said extension shall be petitioned for by three-fourths of the residents thereof, provided such number of residents shall contract with the grantee to use electric current for light from said system in their respective residences for a period of not less than one year.

Section 5. Said grantee, his successors or assigns, shall hold the city exempt and harmless from all liability arising from the erection, maintenance and operation of all works in any manner growing out of the granting of this franchise and all costs and expenses, and shall use none but insulated or other approved wires for the conducting of electricity upon the main and principal streets of said City.

Section 6. The grantee, his successors and assigns may use the Doherty rate of charges for the sale of gas and electric current to public and private consumers and shall have the right under this franchise to charge a flat rate of \$2.00 per thousand cubic feet for gas to private consumers; and twenty cents (20c) per kilowatt hour for electric current to private consumers; and \$2.00 per thousand pound for condensed steam, provided it shall be optional with the consumers to take gas or electric current upon the flat rate, or upon the Doherty rate to be fixed and established by the grantee, his successors and assigns. The grantee shall furnish gas and electric current to the city of O'Neill at such prices and upon such terms as may be agreed upon between the City of O'Neill and said grantee, his successors and assigns.

Section 7. That the rights and privileges herein granted shall be continued in full force and effect for the period of twenty-five years from the passage, approval and publication of this ordinance.

This ordinance shall take effect and be in force from and after its passage, approval and publication according to law.

Passed and approved June 20, 1910.

Notice To Contractors.

Sealed proposals will be received by the City Clerk of the City of O'Neill, Nebraska, until eight (8) o'clock p. m. on Wednesday, the 13th day of July 1910, for furnishing material and constructing a complete Sanitary Sewer System for the City of O'Neill, Nebraska, in accordance with the plans and specifications on file in the office of the City Clerk, O'Neill, Nebraska, and in the office of the Engineers, Omaha, Nebraska.

Each bid to be accompanied by a certified check of Five Hundred (\$500.00) Dollars.

Any one desiring a set of plans and specifications for personal use, may obtain the same by application of the Engineers and a payment of Five (\$5.00) Dollars per set.

The city reserves the right to reject any and all bids.

1-3 O. F. BIGLIN, Mayor.
H. J. HAMMOND, City Clerk.
The Consolidated Engineering Co.,
Engineers,
640 Bee Building, Omaha, Neb.

of Christian S. Kennel praying that the instrument, filed on the 13th day of June 1910, and purporting to be the last will and testament of the said deceased, may be proved, approved, probated, allowed and recorded as the last will and testament of the said John Kennel, deceased, and that the execution of said instrument may be committed and the administration of said estate may be granted to Christian S. Kennel as Executor.

Ordered, That Wednesday the 6th day of July A. D. 1910, at 10 o'clock a. m. is assigned for hearing said petition, when all persons interested in said matter may appear at a County Court to be held in and for said County and show cause why the prayer of petitioner should not be granted; and that notice of the pendency of said petition and the hearing thereof, be given to all persons interested in said matter by publishing a copy of this order in The Frontier, a weekly newspaper printed in said County, for three successive weeks, prior to said day of hearing.

(Seal) C. J. Malone,
52-3 County Judge.

(First publication June 9.)
Estimate of Expenses.

On motion the City Council made the following estimate of the probable amount of all moneys necessary for all purposes to be expended by the city government during the present fiscal year, commencing May 3, 1910, and ending on the first Tuesday in May, 1911:

Salaries of city officers	\$1800
Fuel	1500
Railroad sinking fund	2500
Repairs on water works	2500
Streets and sidewalks	2000
Interest on sewer bonds and repairs on sewer	1000
Total	\$11300

The entire revenue for the previous fiscal year was as follows:

Received of county treasurer	\$3327.49
Saloon occupation tax	900.00
Water rental	1967.27
Occupation tax, beer vault	200.00
Police Judge	20.00
City scales	94.50
Miscellaneous licenses	662.50
Total	\$7171.76
