snow is about gone, while the winds are piping up their merry lay again. There is plenty of moisture in the ground now as the snow melted slowly, and every bit of it went into the ground.

The Spring Branch was down in several places as a result of the big storm.

Mrs. May Gerard, an old time neighbor of ours, came up from Bellwood, Butte county to visit her numerous friends here, she arrived in O'Neill May 1st. Here is hoping she will stay in our midst a long time.

The Reason It Was Taken From its Niche in the Capitol.

"Where is the bust of Tecumseh that used to be in a niche on the senate side of the capitol?" Richard Livingston, a student of American history, asked recently.

"I know that years ago there was a fine bronze bust of an Indian, and the name Tecumseh was on the pedestal, and as Tecumseh was about the most famous Indian chief of our school history books every American boy took more interest in surveying his features than in looking over the faces of eminent white men in the big building. I walked all over the building and saw Indians enough in paintings and statuary, also some live ones, but no Tecumseh. Then I hunted up my congressman, and he went through a guidebook--no use. Then we questioned the guides. They had not heard of a Tecumseh bust, and most of them asked, 'What state was the senator from?'"

"I was about to give it up. Then a somber sort of chap with a silk hat and a red flower in his buttonhole relieved my anxiety. He explained what I had not thought of before, and that was the fact that Tecumseh was killed in battle wearing the uniform of a British general. He died fighting the American flag. Why should he be honored with a bust in the capitol?"

"And then I was told that the Tecumseh bust really had been in the capitol for many years until one day a wise senator, familiar with the history of his country, made a protest. That sent the Tecumseh bust to the cellar or to some museum here in town"--Washington Post.

The Bull of Phalaris.

Perillus of Athens is said by the ancient authorities to have invented for Phalaris, tyrant of Agrigento, B. C. 570, a brazen bull which opened on the side to admit victims who were to be roasted to death by the fire which was built underneath. The dying groans of the sufferers closely resembled the "roaring of a maddened bull," hence the name that was given to the invention. It is refreshing to know that later on the populace rose against Phalaris and burned the tyrant in the bull that he had made to be the cause of death to so many others.--New York American.

A Roundabout River.

The Kentucky river at Jackson is a freak. It runs for five miles or more to advance sixty feet. The circuit of the water forms what is known as the "panhandle." Standing on the backbone you can flip a stone into the river on the north side and one into the river on the south side, five miles below. You are on the north side of the river and on the south side of the river and going up the river and down the river at the same time.--Winchester News.

Her Status.

"Are you a friend of the groom's family?" asked the usher at the church wedding.
"I think not," replied the lady addressed, "I'm the mother of the bride."--Yonkers Statesman.
