

RACE & AVIATION MEET, O'NEILL

August 21-22-23

Every day the big day as we have arranged the classes so evenly there can be no difference. We not only expect to have as good races as last year but beyond any question they will be better and larger as we are receiving entries at this early date from some of the fast ones. \$2,000.00 will be given in purses.

THE MOISANT AVIATOR CO.,

Star Bird-Man Will Make Two Flights Each Day

The Holt County Race Meet of O'Neill have engaged for their special attraction at the Race Meet this year, at an enormous outlay of money, the Moisant International Aviators, which company will send on of the most daring bird men to the O'Neill Meet this year. The Directors of the Meet had propositions from 50 Aviation Companies, many of whom would present their aerial demonstrations much cheaper than the Moisant's, but the O'Neill Race Meet, knowing the reputation of the Moisant Company, readily paid the increased price for these famous navigators of the air. The Moisant International Aviators will send on of their most daring bird men to the O'Neill Race Meet on the dates of August 21, 22 and 23 and Moisant Bleriot type of Mono-Planes will be used and the exhibitions will furnish the greatest display ever witnessed in this section of the country.

The Moisant Aviators have but recently returned from a tour through Central America and Mexico where they encountered a considerable amount of excitement other than that usually accompanying navigation of the air, having escaped from the latter country just after the revolutionary out-break. The flights at O'Neill Meet will take place on the infield of the big race track in the afternoon and early evening and the Moisant people guarantee to send the Aviators and machines to O'Neill that will make flights regardless of weather conditions. In view of the fact that the Moisant's are recognized as the dare devils of Aerial world and the additional fact that the members of the Aeronautical force use only the Mono-Plane type of air craft, the exhibitions of these great Aviators will undoubtedly prove a novel feature standing out prominent and leading all the many sensational features that will be presented at the Race Meet for the year 1912. It has been indisputedly demonstrated during the past year that the difference between the Mono-Plane and the Bi-Plane in speed, spectacular features of flights, endurance and other sensational elements, is about like the difference between an automobile and a two-horse dray. It is the type of flying machine that has been brought to its highest type of perfection by the French School of Aviation, the Bleriot and Moisant types being the ones most commonly in use. The Moisant's guarantee that their Aviators while at the Meet will present some altitude, duration, speed, racing and Vol-Plane features in the air that have never been attempted by any other Aviators or machines and as the Moisant Mono-Plane flown by the Moisant Aviators holds the speed, altitude, quick starting, duration and boon throwing records of all flying machines at present in existence, the patrons of the Race Meet are going to be treated to a sight this year that should bring people from all over the country and be the most talked of of all the many spectacular features that have been introduced in the last few years by the enterprising directors of the O'Neill Meet. Flights will be given twice a day on each of the Race Meet dates beginning August 21 and concluding on August 23.

The Four Flying Baldwins

Will give their big act for the edification of the people on the grounds. Their Big Free Act will be given each afternoon during the races in front of the grand stand.
